**The pneumatic arm may need adjustment for the lid to close properly.**

Le bras pneumatique aura peut être besoin d'ajustement pour que le couvercle se ferme correctement.

**Install screws through the oblong slots in the bracket and into the pre-drilled holes on the metal frame. Position the bracket so the screws are in the center of the oblong slots as (shown in Diagram B.)**

Installez les vis à travers les fentes oblongues dans la ferrure et dans les trous pré-perçés dans la charpente en métal. Positionnez la ferrure pour que les vis soient positionnées au centre des fentes oblongues (comme illustré dans le diagramme B.)

**Close the lid to see how if it closes flush with the box. If the lid closes properly then proceed to tighten the screws fully in the slots.**

**Finish securing the bracket by installing the self-tapping screws into the final two holes in the bracket. (Shown in Figure C.)**

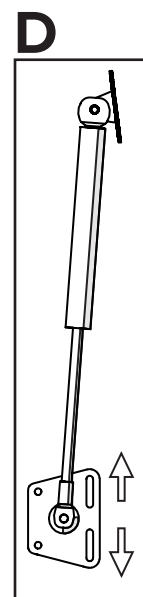

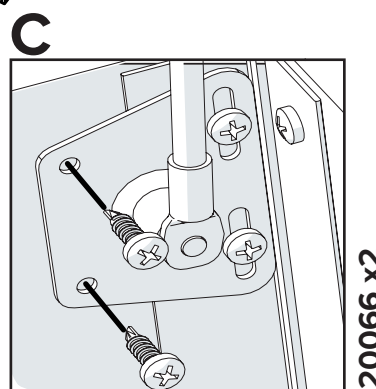

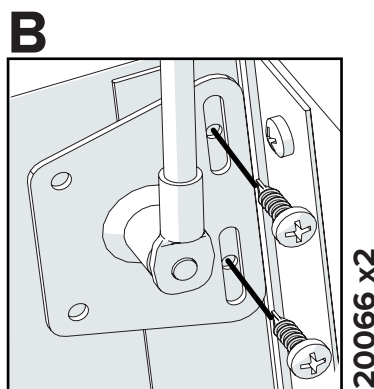

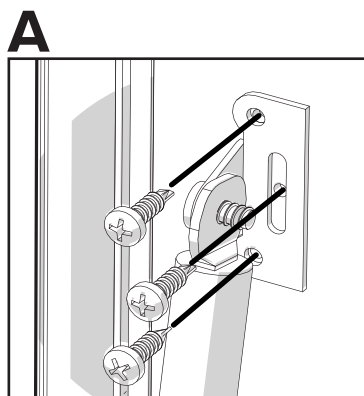

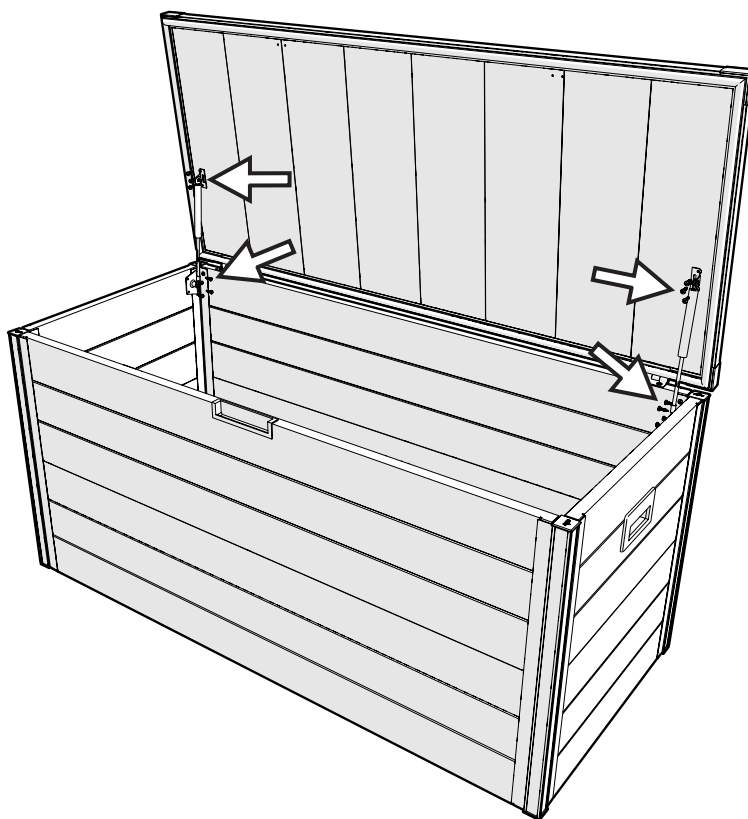

Fermez le couvercle pour voir si il ferme à plat avec la boîte. Si le couvercle ferme correctement, procédez à serrer les vis totalement dans les fentes. Finissez de sécuriser la ferrure en installant les vis auto-foreuses dans les deux derniers trous dans la ferrure. (Illustré dans la figure C.)

**If the lid does not close properly, proceed to adjust the position of the bracket on the oblong slots. Close the lid, and readjust if necessary. (Shown in Figure D.)**

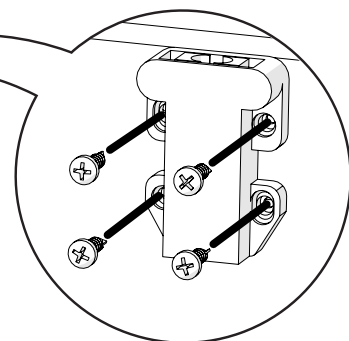

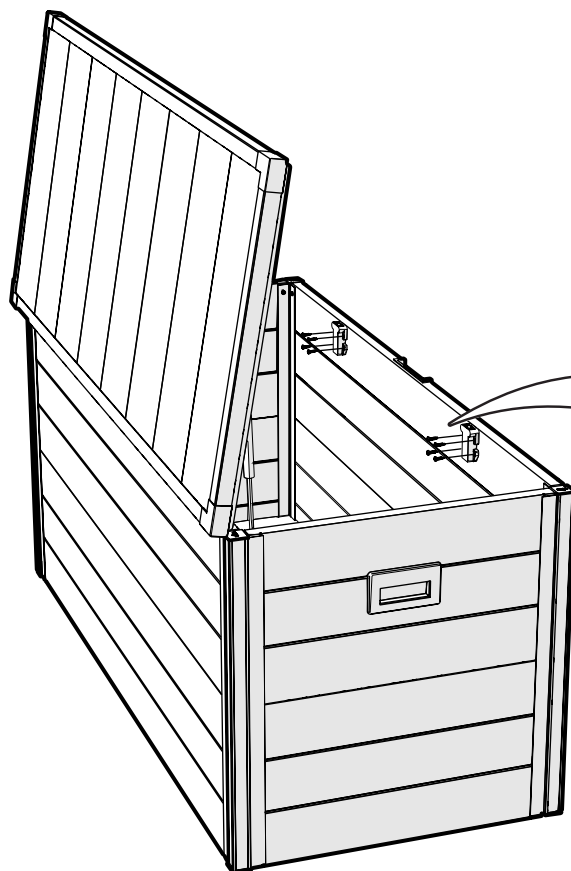

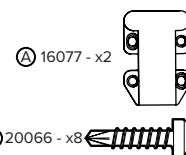

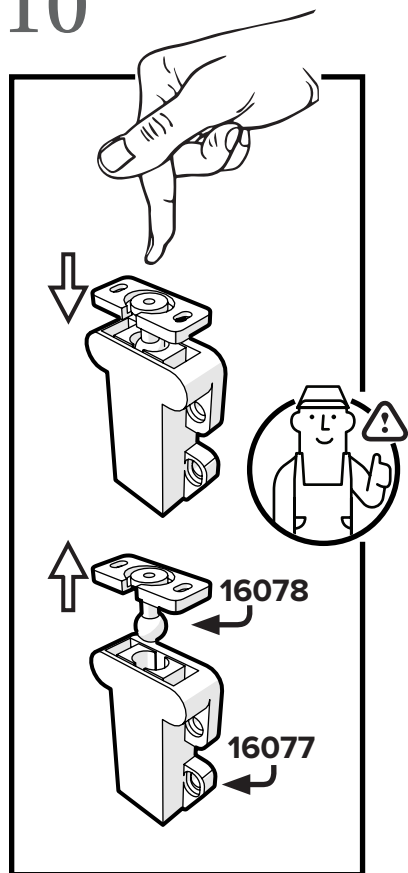

Si le couvercle ne se ferme pas correctement, procédez à l'ajustement de la position de la ferrure sur les fentes oblongues. Fermez le couvercle, et ajustez de nouveau si nécessaire. (Illustré dans la figure D.)

**Finish securing the bracket by installing the self-tapping screws into the final two holes in the bracket. (Shown in Figure C.)**

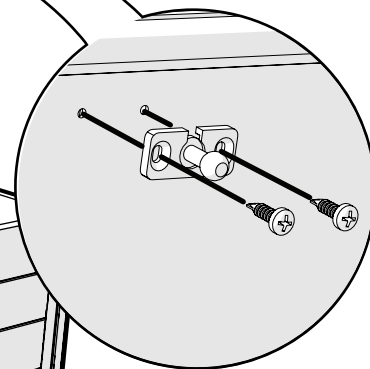

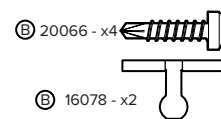

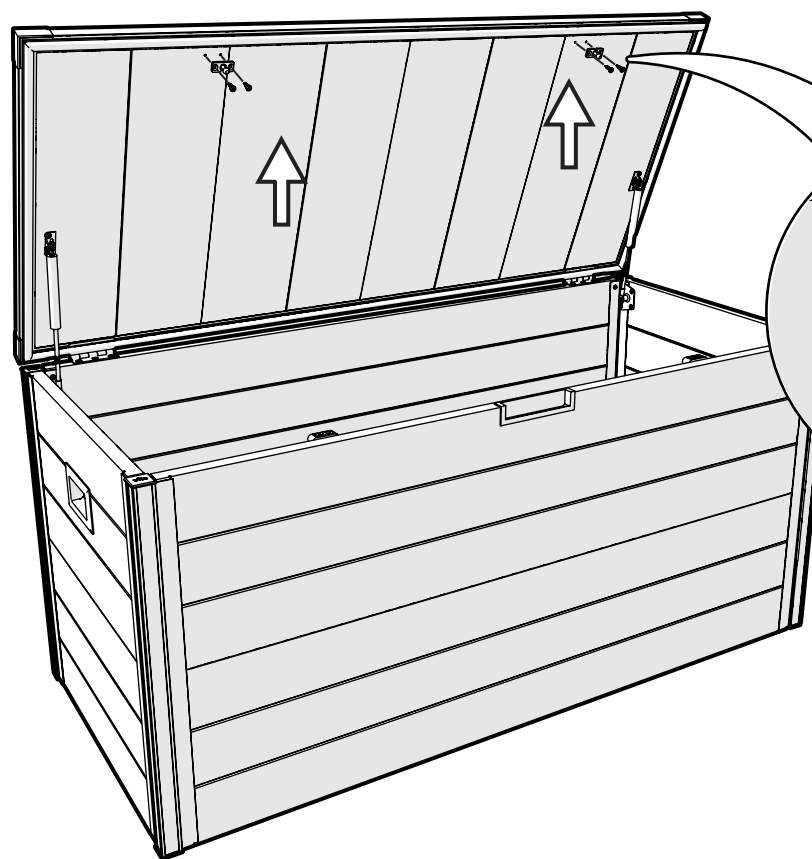

Finissez de sécuriser la ferrure en installant les vis auto-foreuses dans les deux derniers trous dans la ferrure. (Illustré dans la figure C.)
