IMPORTANT

- Important: Read all warnings and notes before beginning installation.
- Note: Post securing hardware is NOT included with the SOLO brackets. Please confirm with your local building permit office to determine the correct hardware in your area.
- Note: Customers agree to hold TOJA GRID INC and any authorized dealers free of any liability for improper installation, maintenance and repair of any TOJA GRID INC. products.
- Note: In the event of missing or broken parts, simply reach out to us at info@tojagrid.com
- Warning: Never leave your structure unattended before installing all necessary screws and securing it correctly to the ground.
- Warning: Follow instructions provided during installation.
- Warning: Avoid scratching parts to protect against rusting.
- Warning: Wear safety gloves and eyewear during installation.
- Warning: Only work with dry and straight wood.
- Warning: Avoid installation in the rain, or high wind conditions

LIMITED WARRANTY:

Toja Grid Inc. warrants products to be free from defects in material or manufacturing. Toja Grid Inc. products are further warranted for adequacy of design when used in accordance with design limits and when properly specified, installed and maintained. This warranty does not apply to uses not in compliance with specific applications and installations, or to or modified products, or to deterioration due to environmental conditions.

Due to the particular characteristics of potential impact events, the specific design and location of the structure, the building materials used, the quality of construction, and the condition of the soils involved, damage may nonetheless result to a structure and its contents even if the loads resulting from the impact event do not exceed Toja Grid specifications and Toja Grid connectors are properly installed in accordance with applicable building codes.

All warranty obligations of Toja Grid Inc. shall be limited to two (2) years against manufacturing defects, at the discretion of Toja Grid Inc., to repair or replacement of the defective part. These remedies shall constitute Toja Grid Inc.'s sole obligation and sole remedy of purchaser under this warranty. In no event will Toja Grid Inc. be responsible for incidental, consequential, or special loss or damage, however caused.

DISCLAIMER:

Shades and hammocks should be removed during storms/high wind conditions (exceeding 50km/hr).

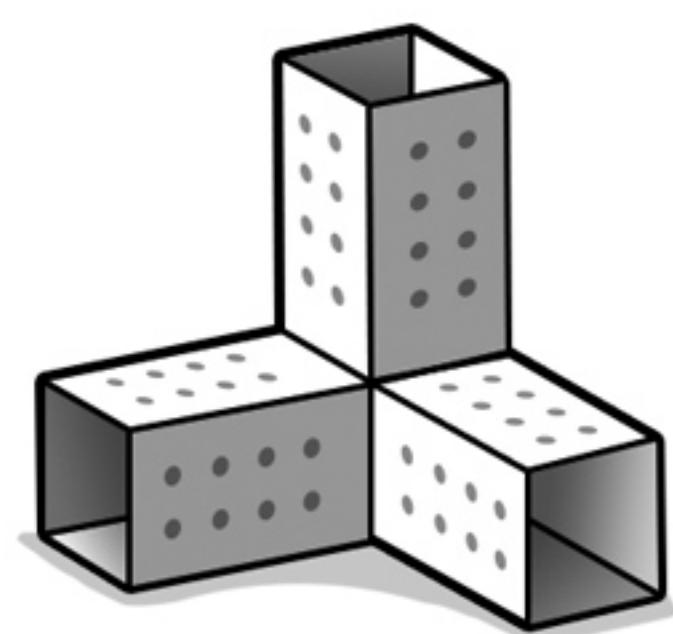

For installation into deck please ensure wood is adequately tied back to the main structure, with a minimum depth of 4" and a minimum width of 6" under each post & use four ¼" diameter 2" long lag screws at the base of each of the four posts.

For installation into concrete foundation please ensure the concrete is in uncracked with a minimum weight of 120 kg (approximately 0.05m³) & use four ¼" diameter concrete screws with a minimum embedment of 2" into sound concrete.

For installation into grass and/or soil, four 4"x 4" fence post spikes should be used in place of the provided 'Grid solo' base plates. Follow manufacturer guidelines for use and installation of fence post spikes.

Level

STEP 2.1**BUILDING THE TOP**

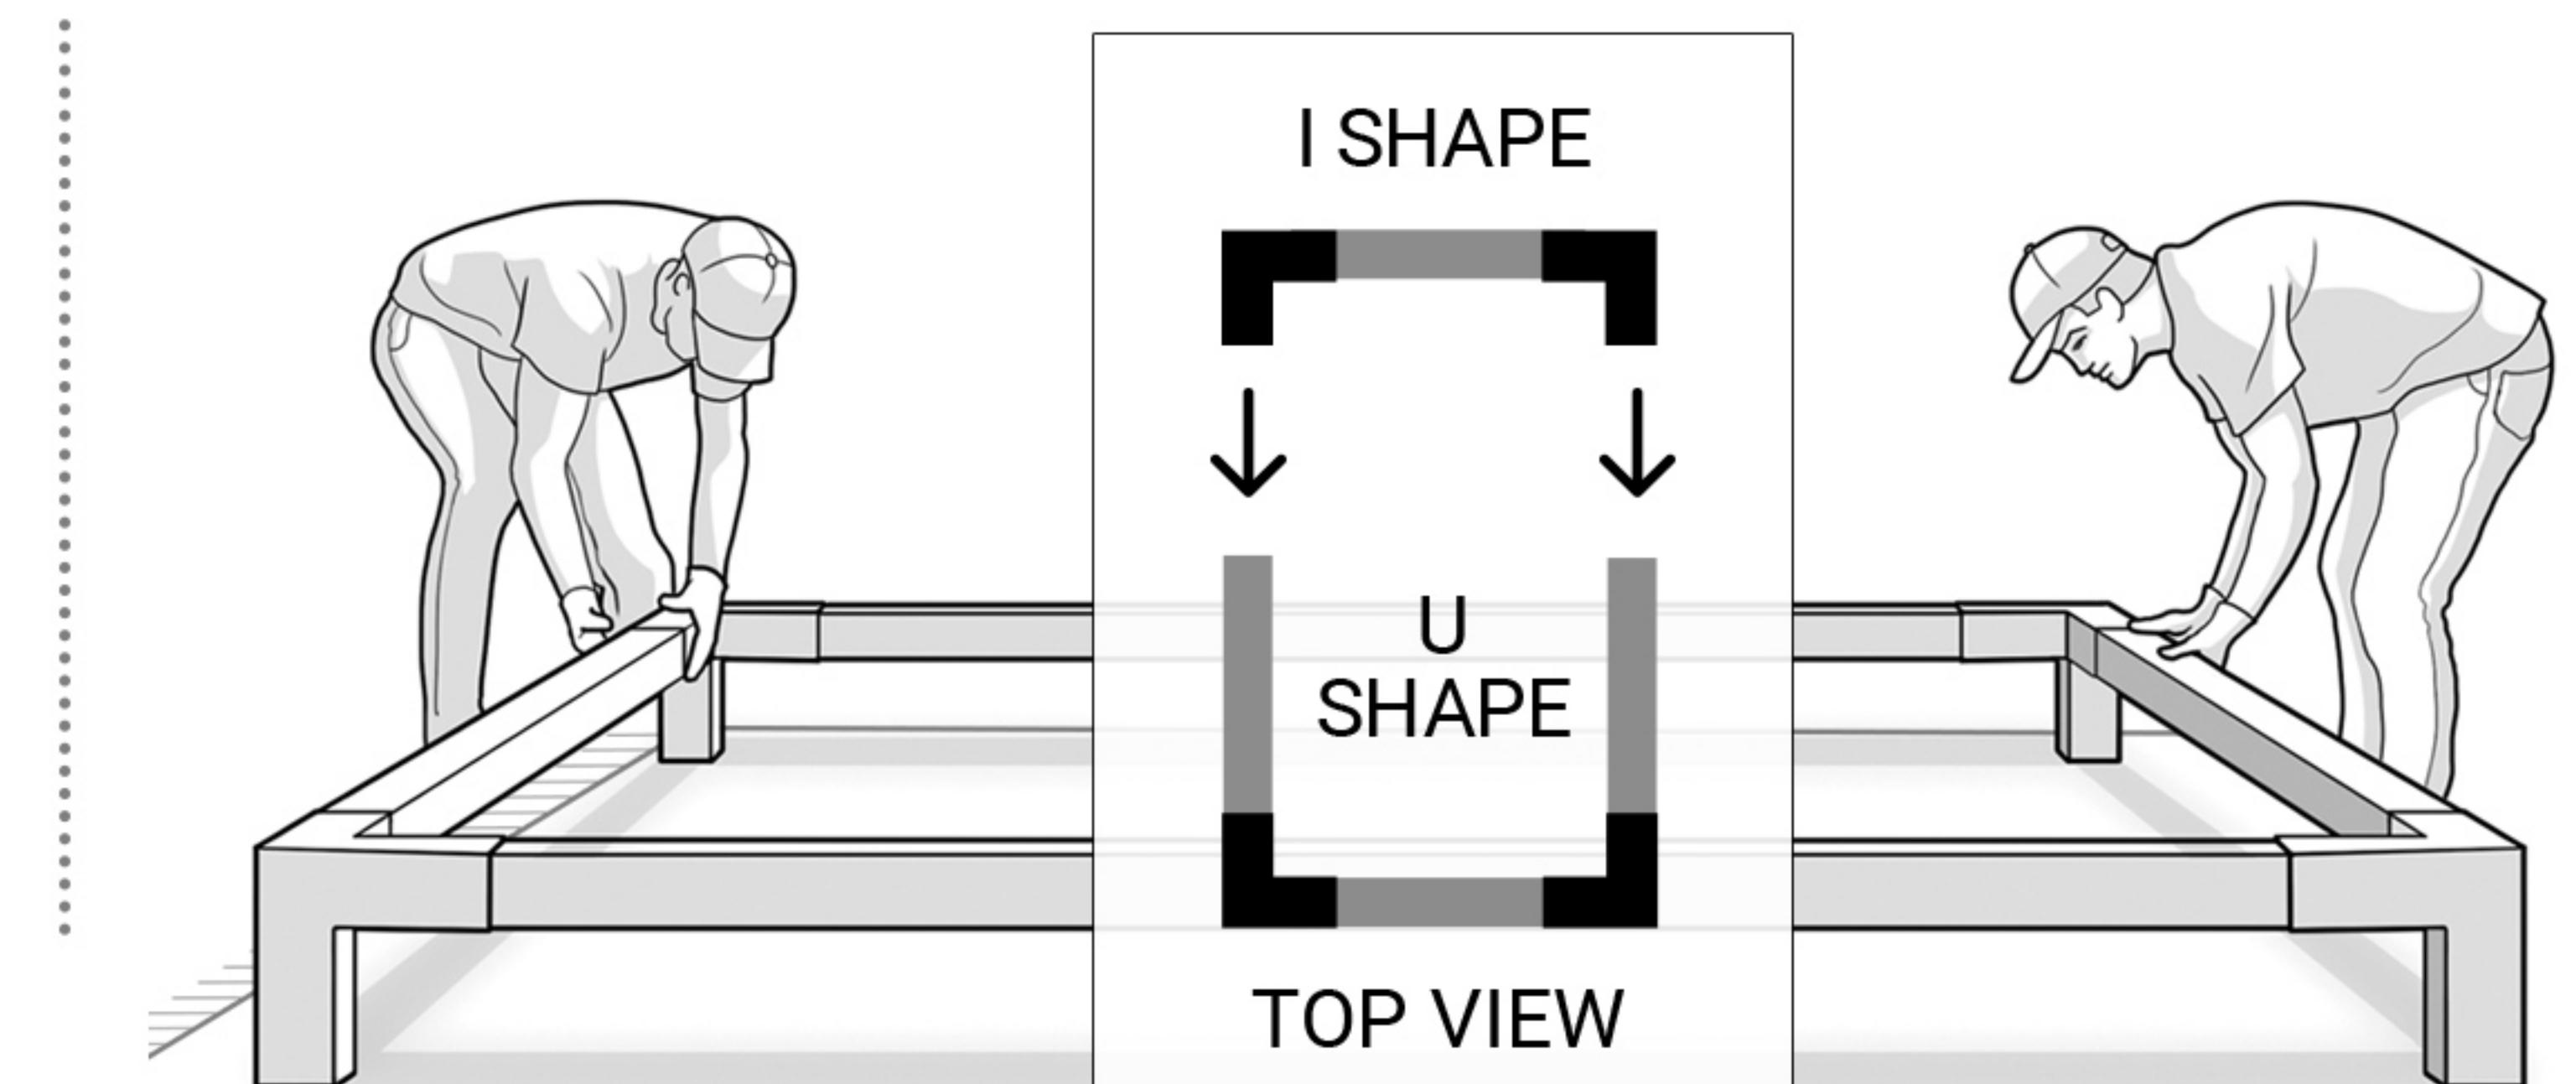

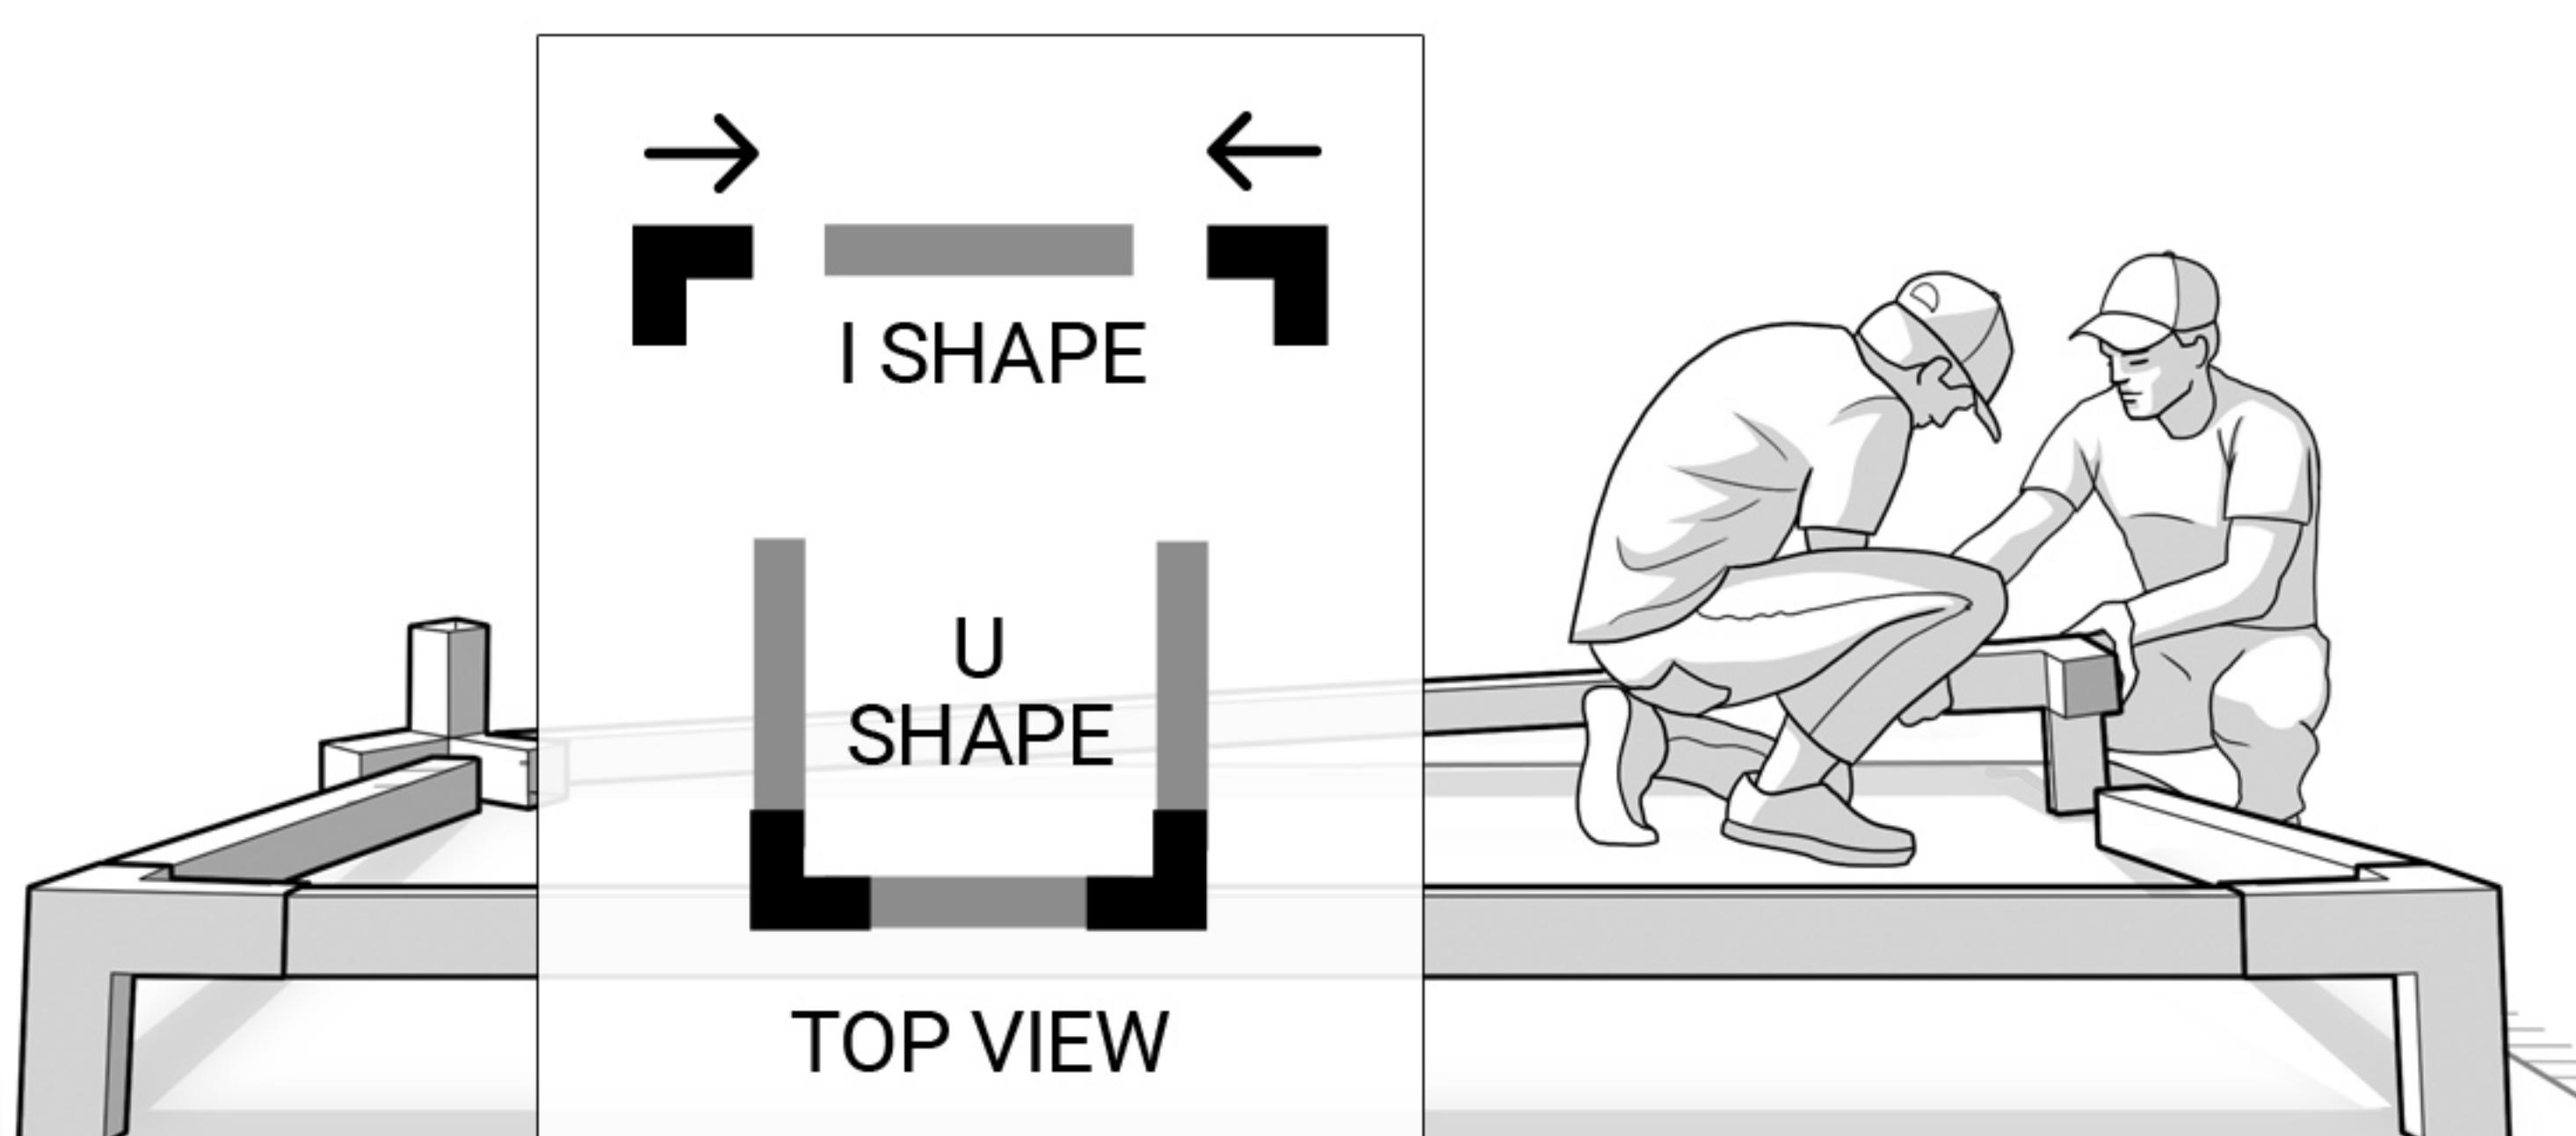

4 wood posts + 4 grid TRIOS

**STEP 2.2****BUILDING THE TOP**

Wood should rest against metal tabs

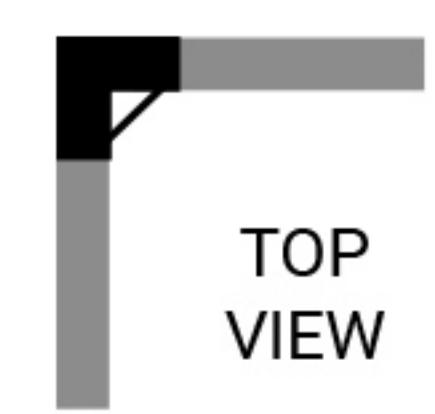

**STEP 2.3****BUILDING THE TOP**Insert screws (4 per side,
12 per GRID TRIO)**STEP 2.4****BUILDING THE TOP**Slide 1 wood post into remaining
GRID TRIOS making an I shape**STEP 2.5****BUILDING THE TOP**

Slide I shape to U shape and secure

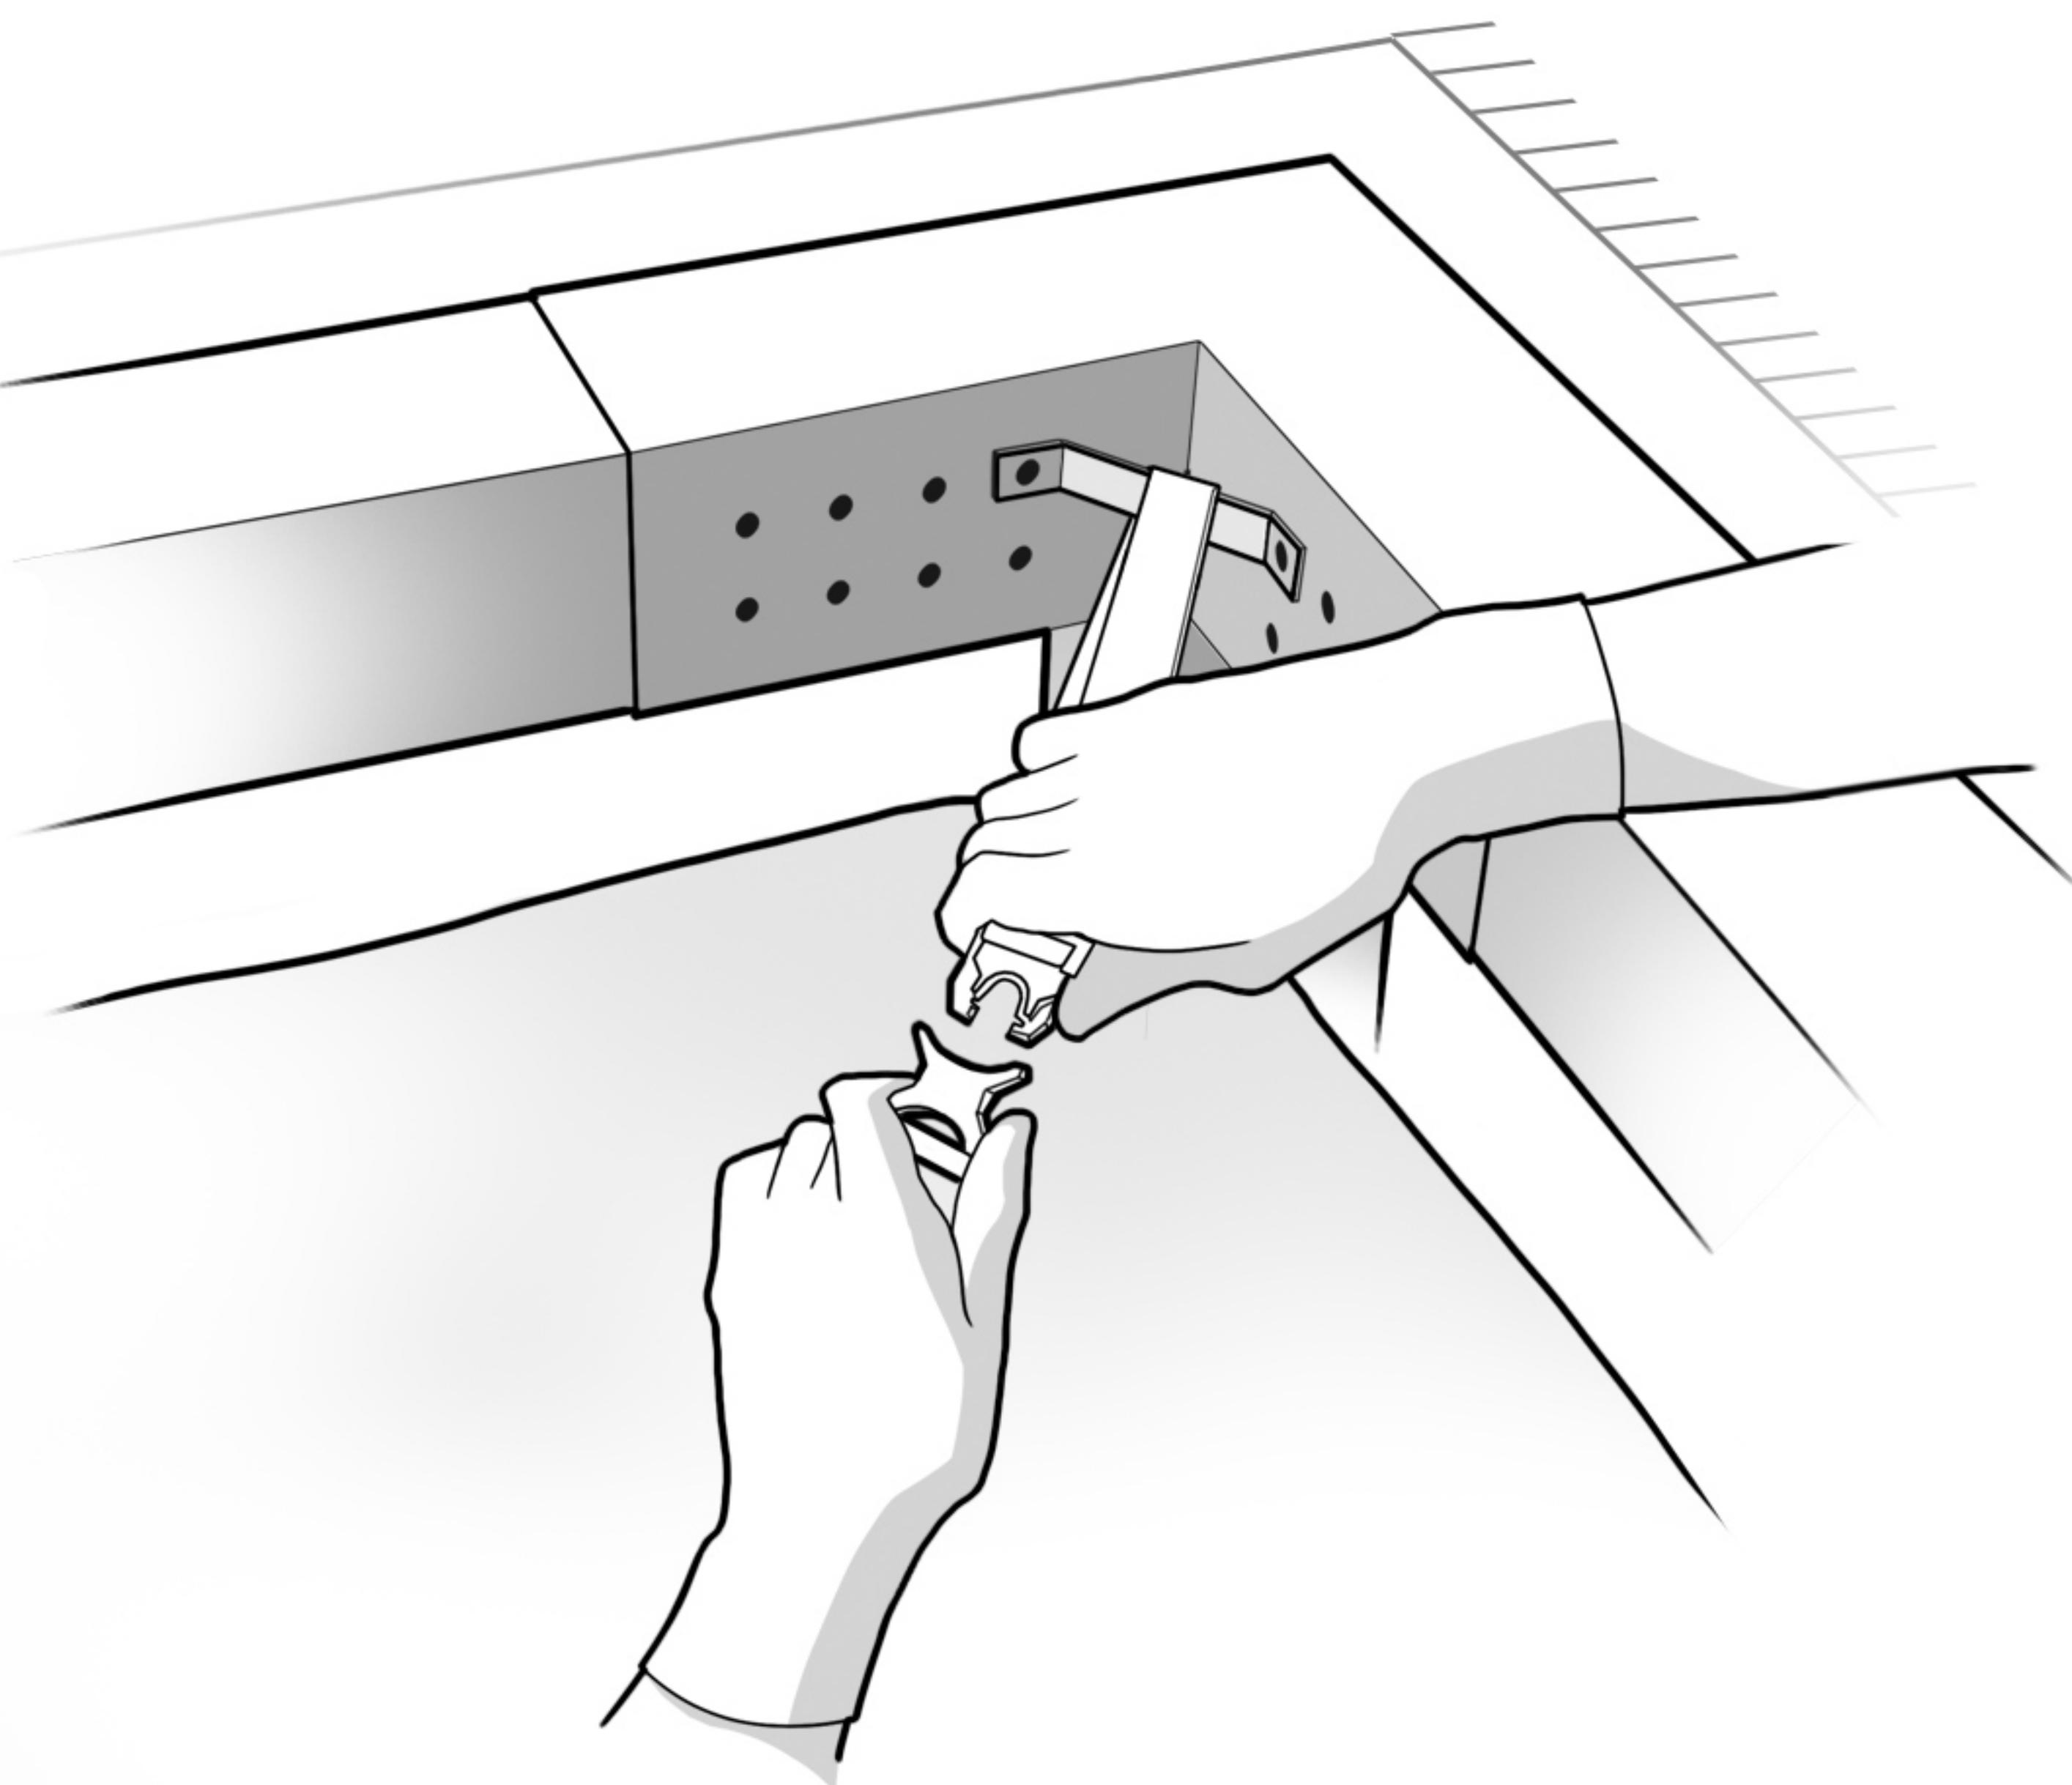

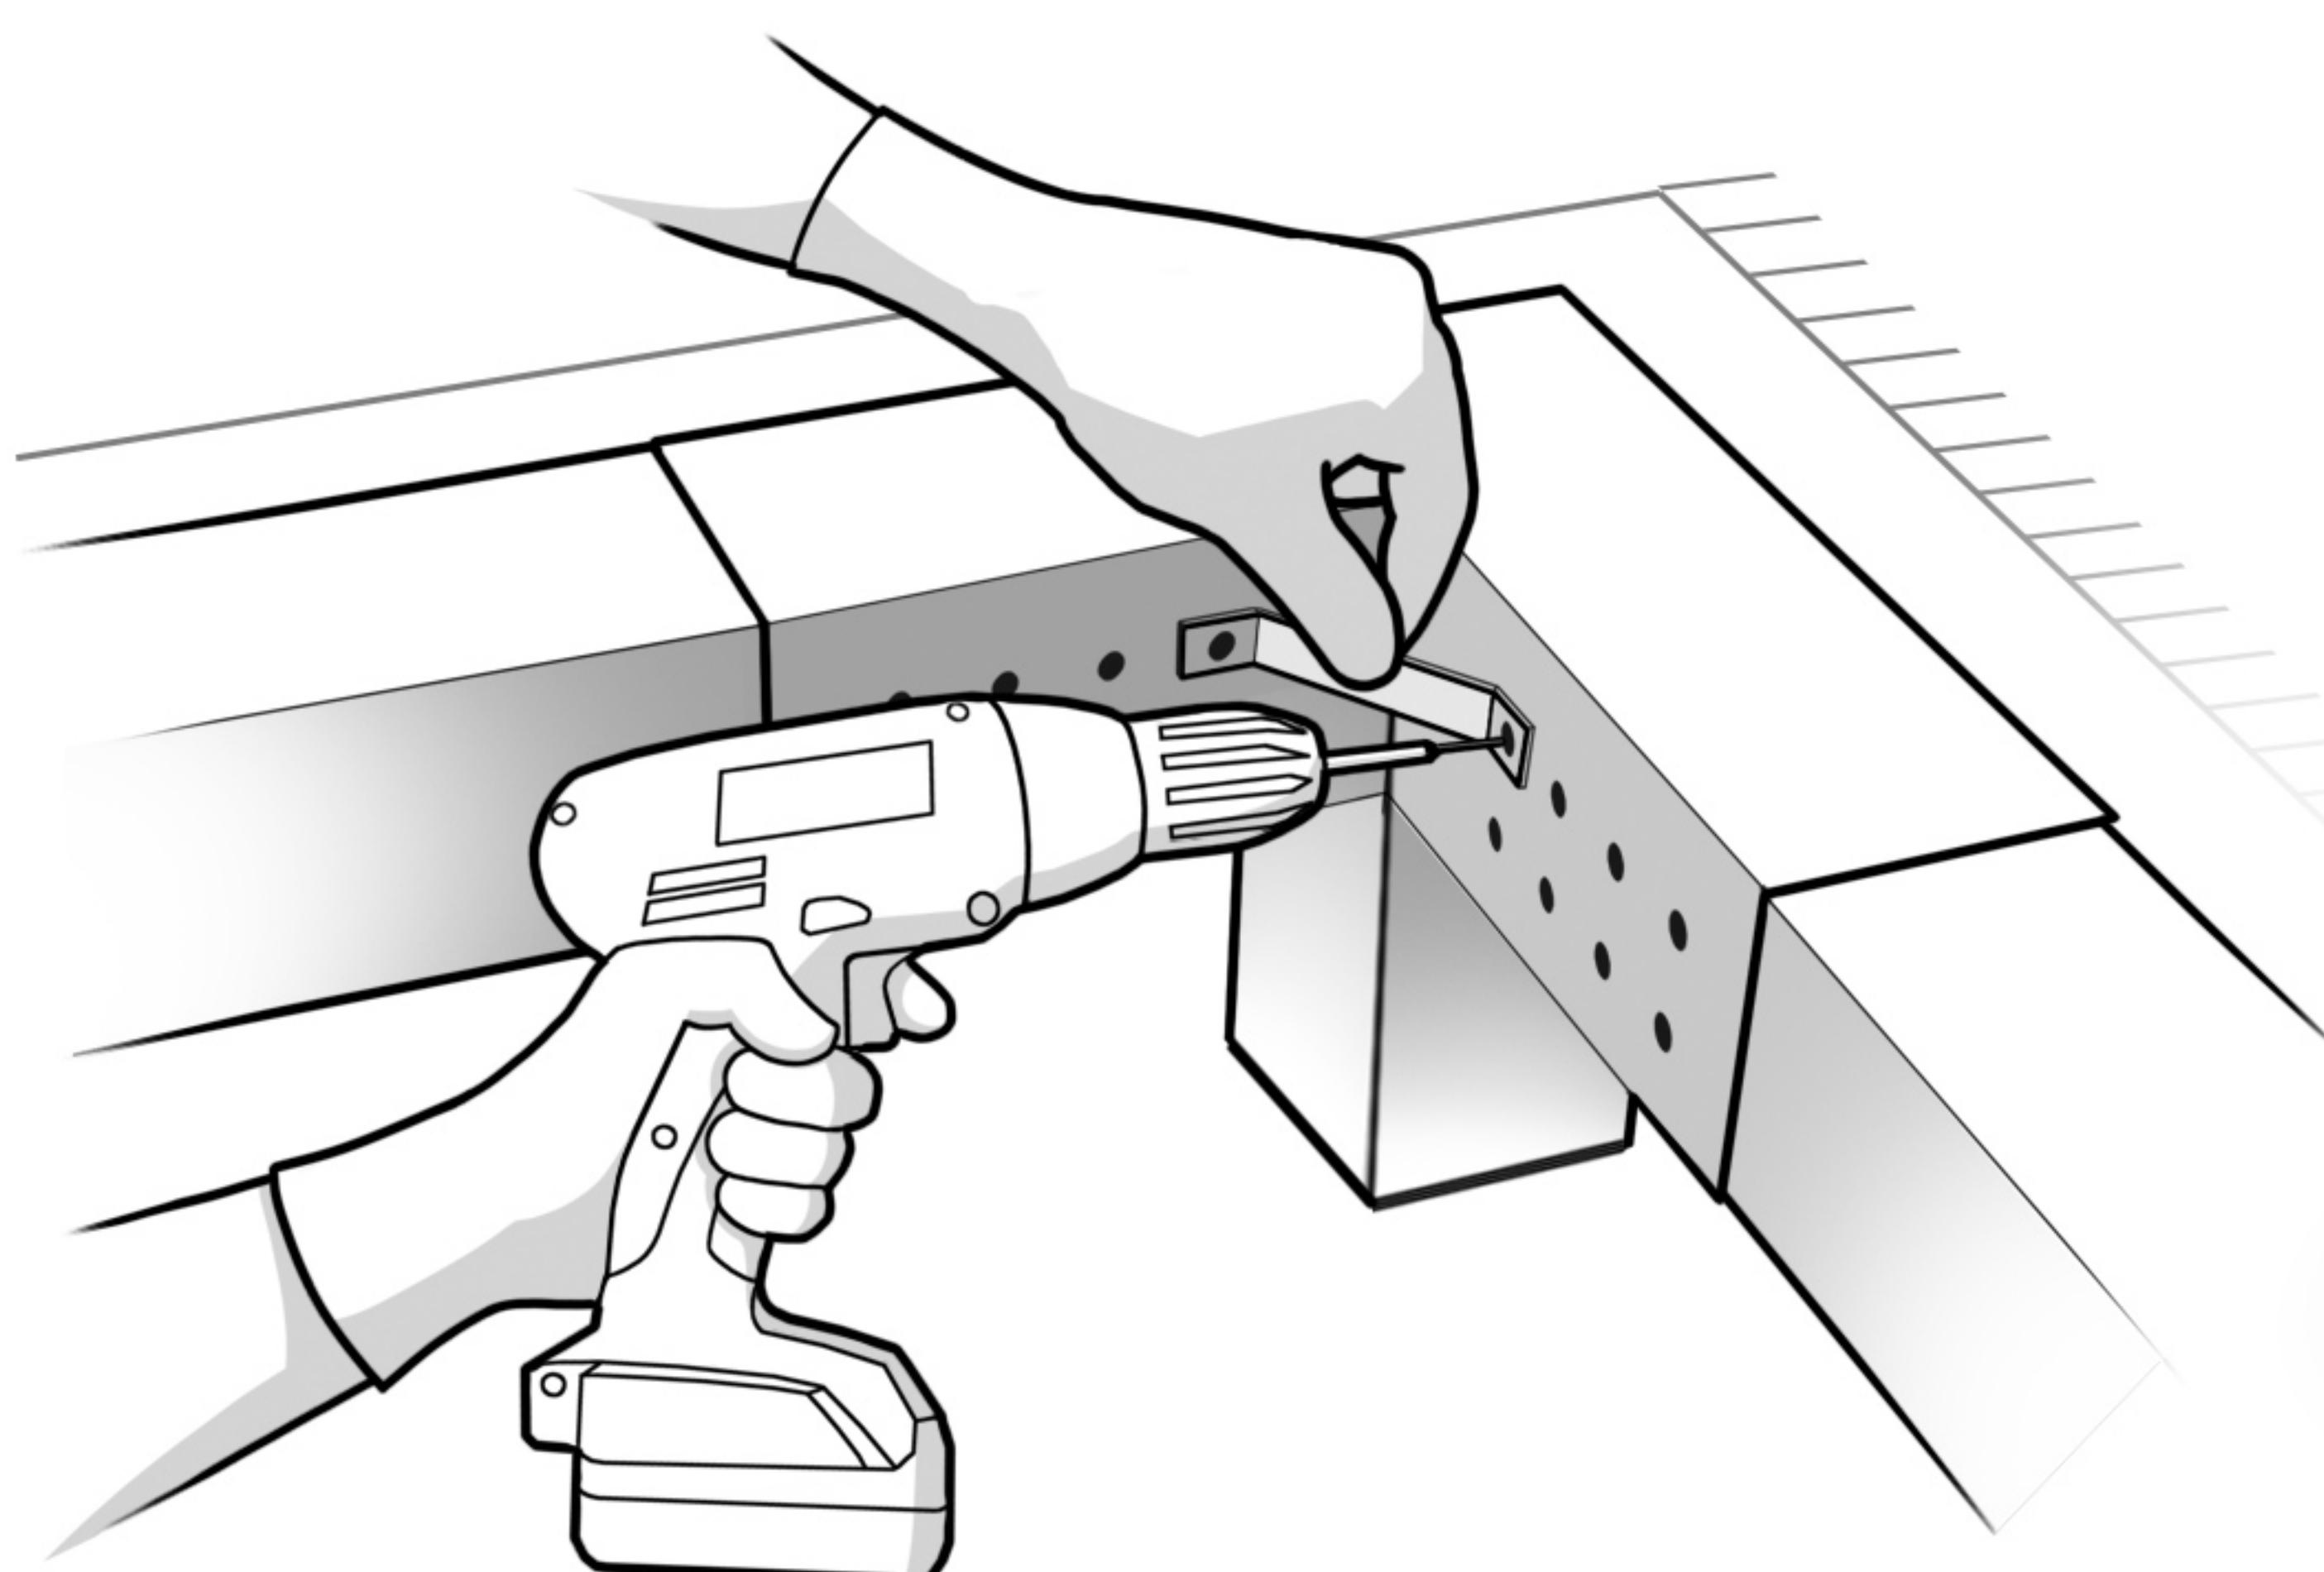

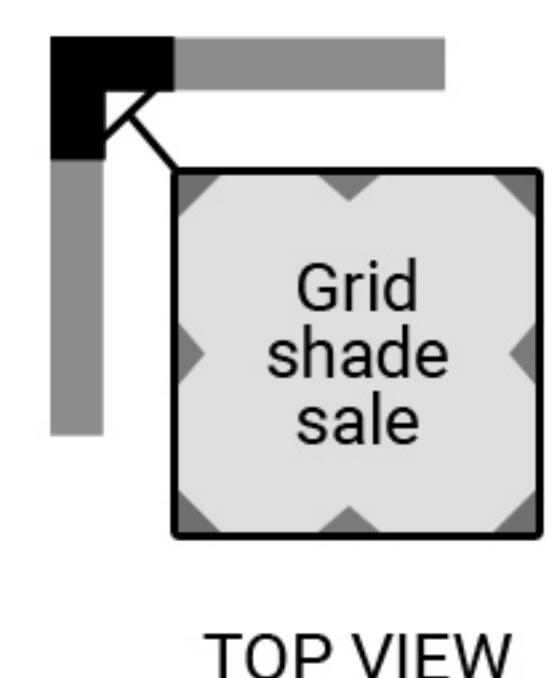

STEP 3.1**BUILDING THE TOP**

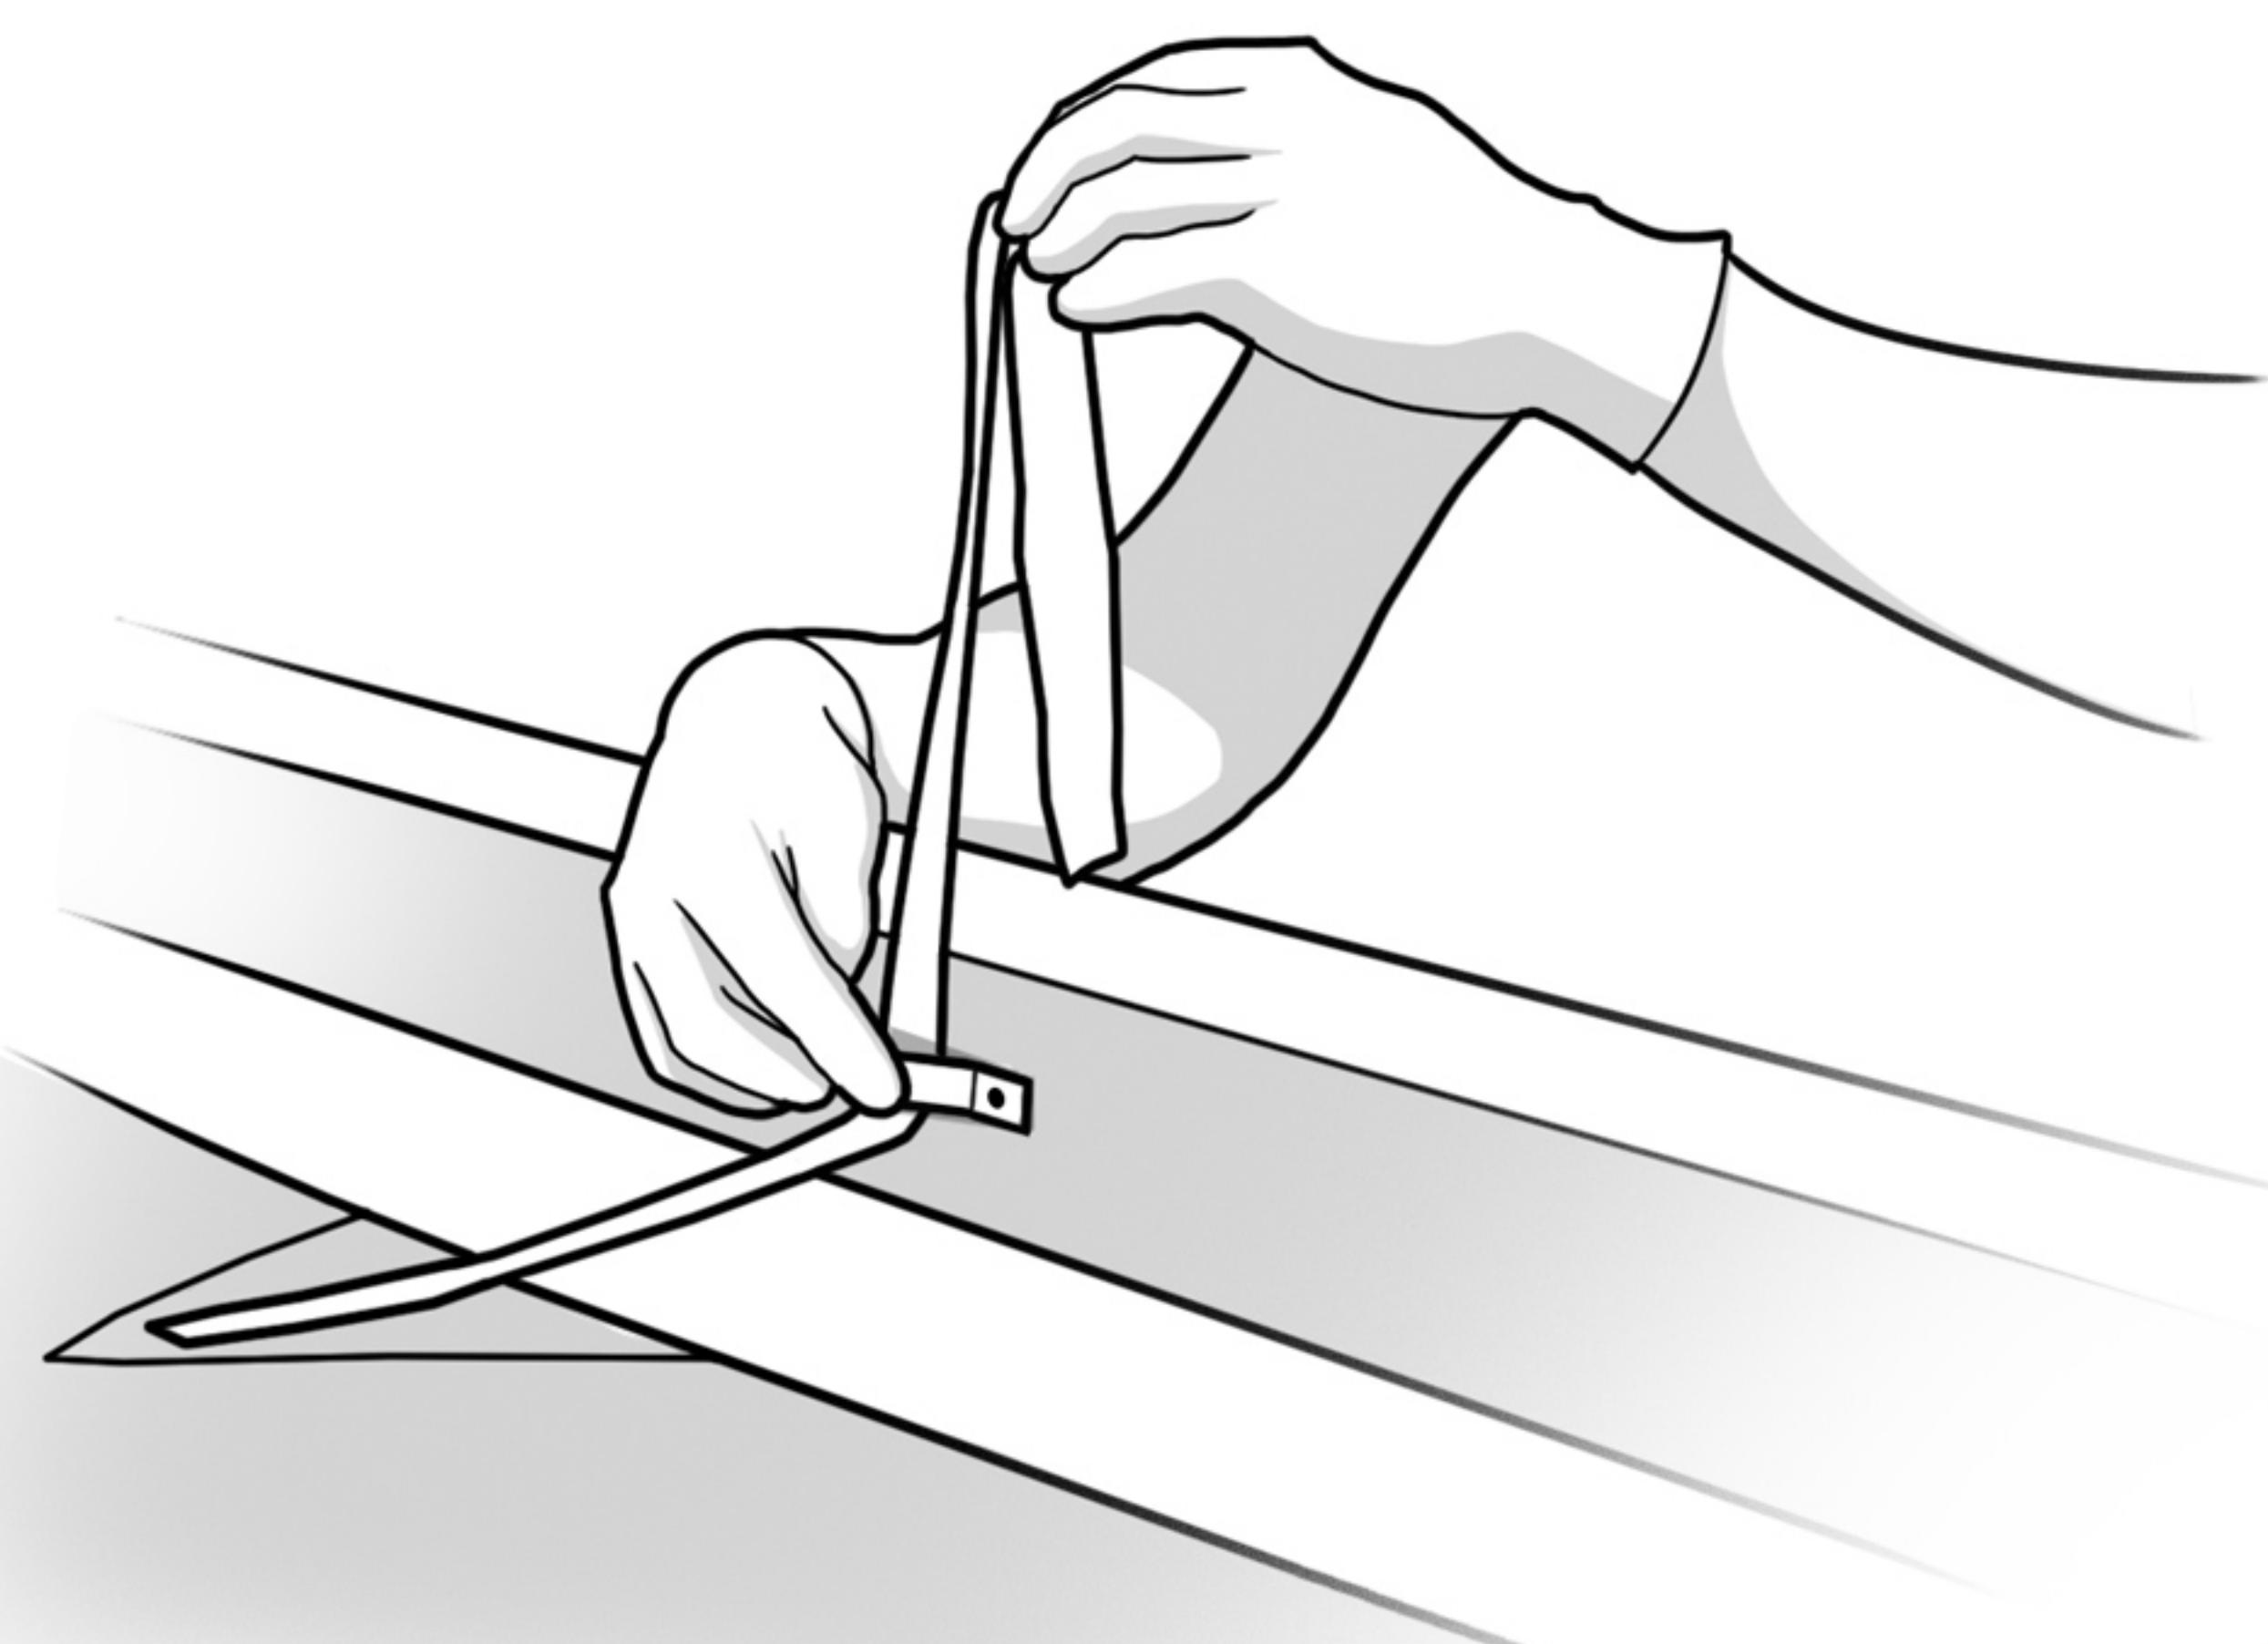

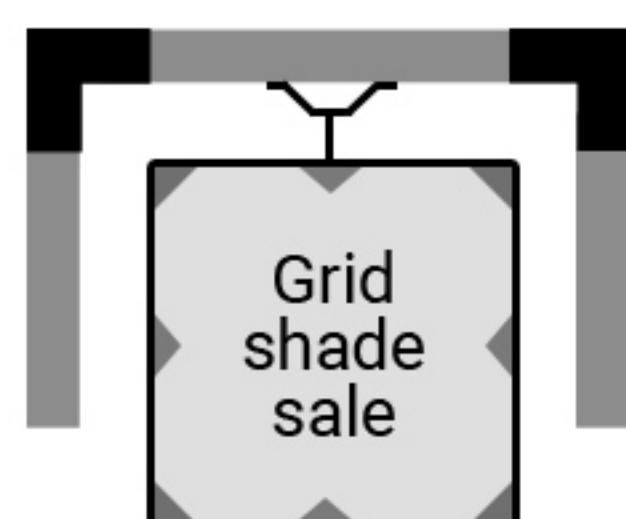

Attach all corner brackets

**STEP 3.2****ATTACHING TOP SHADE**

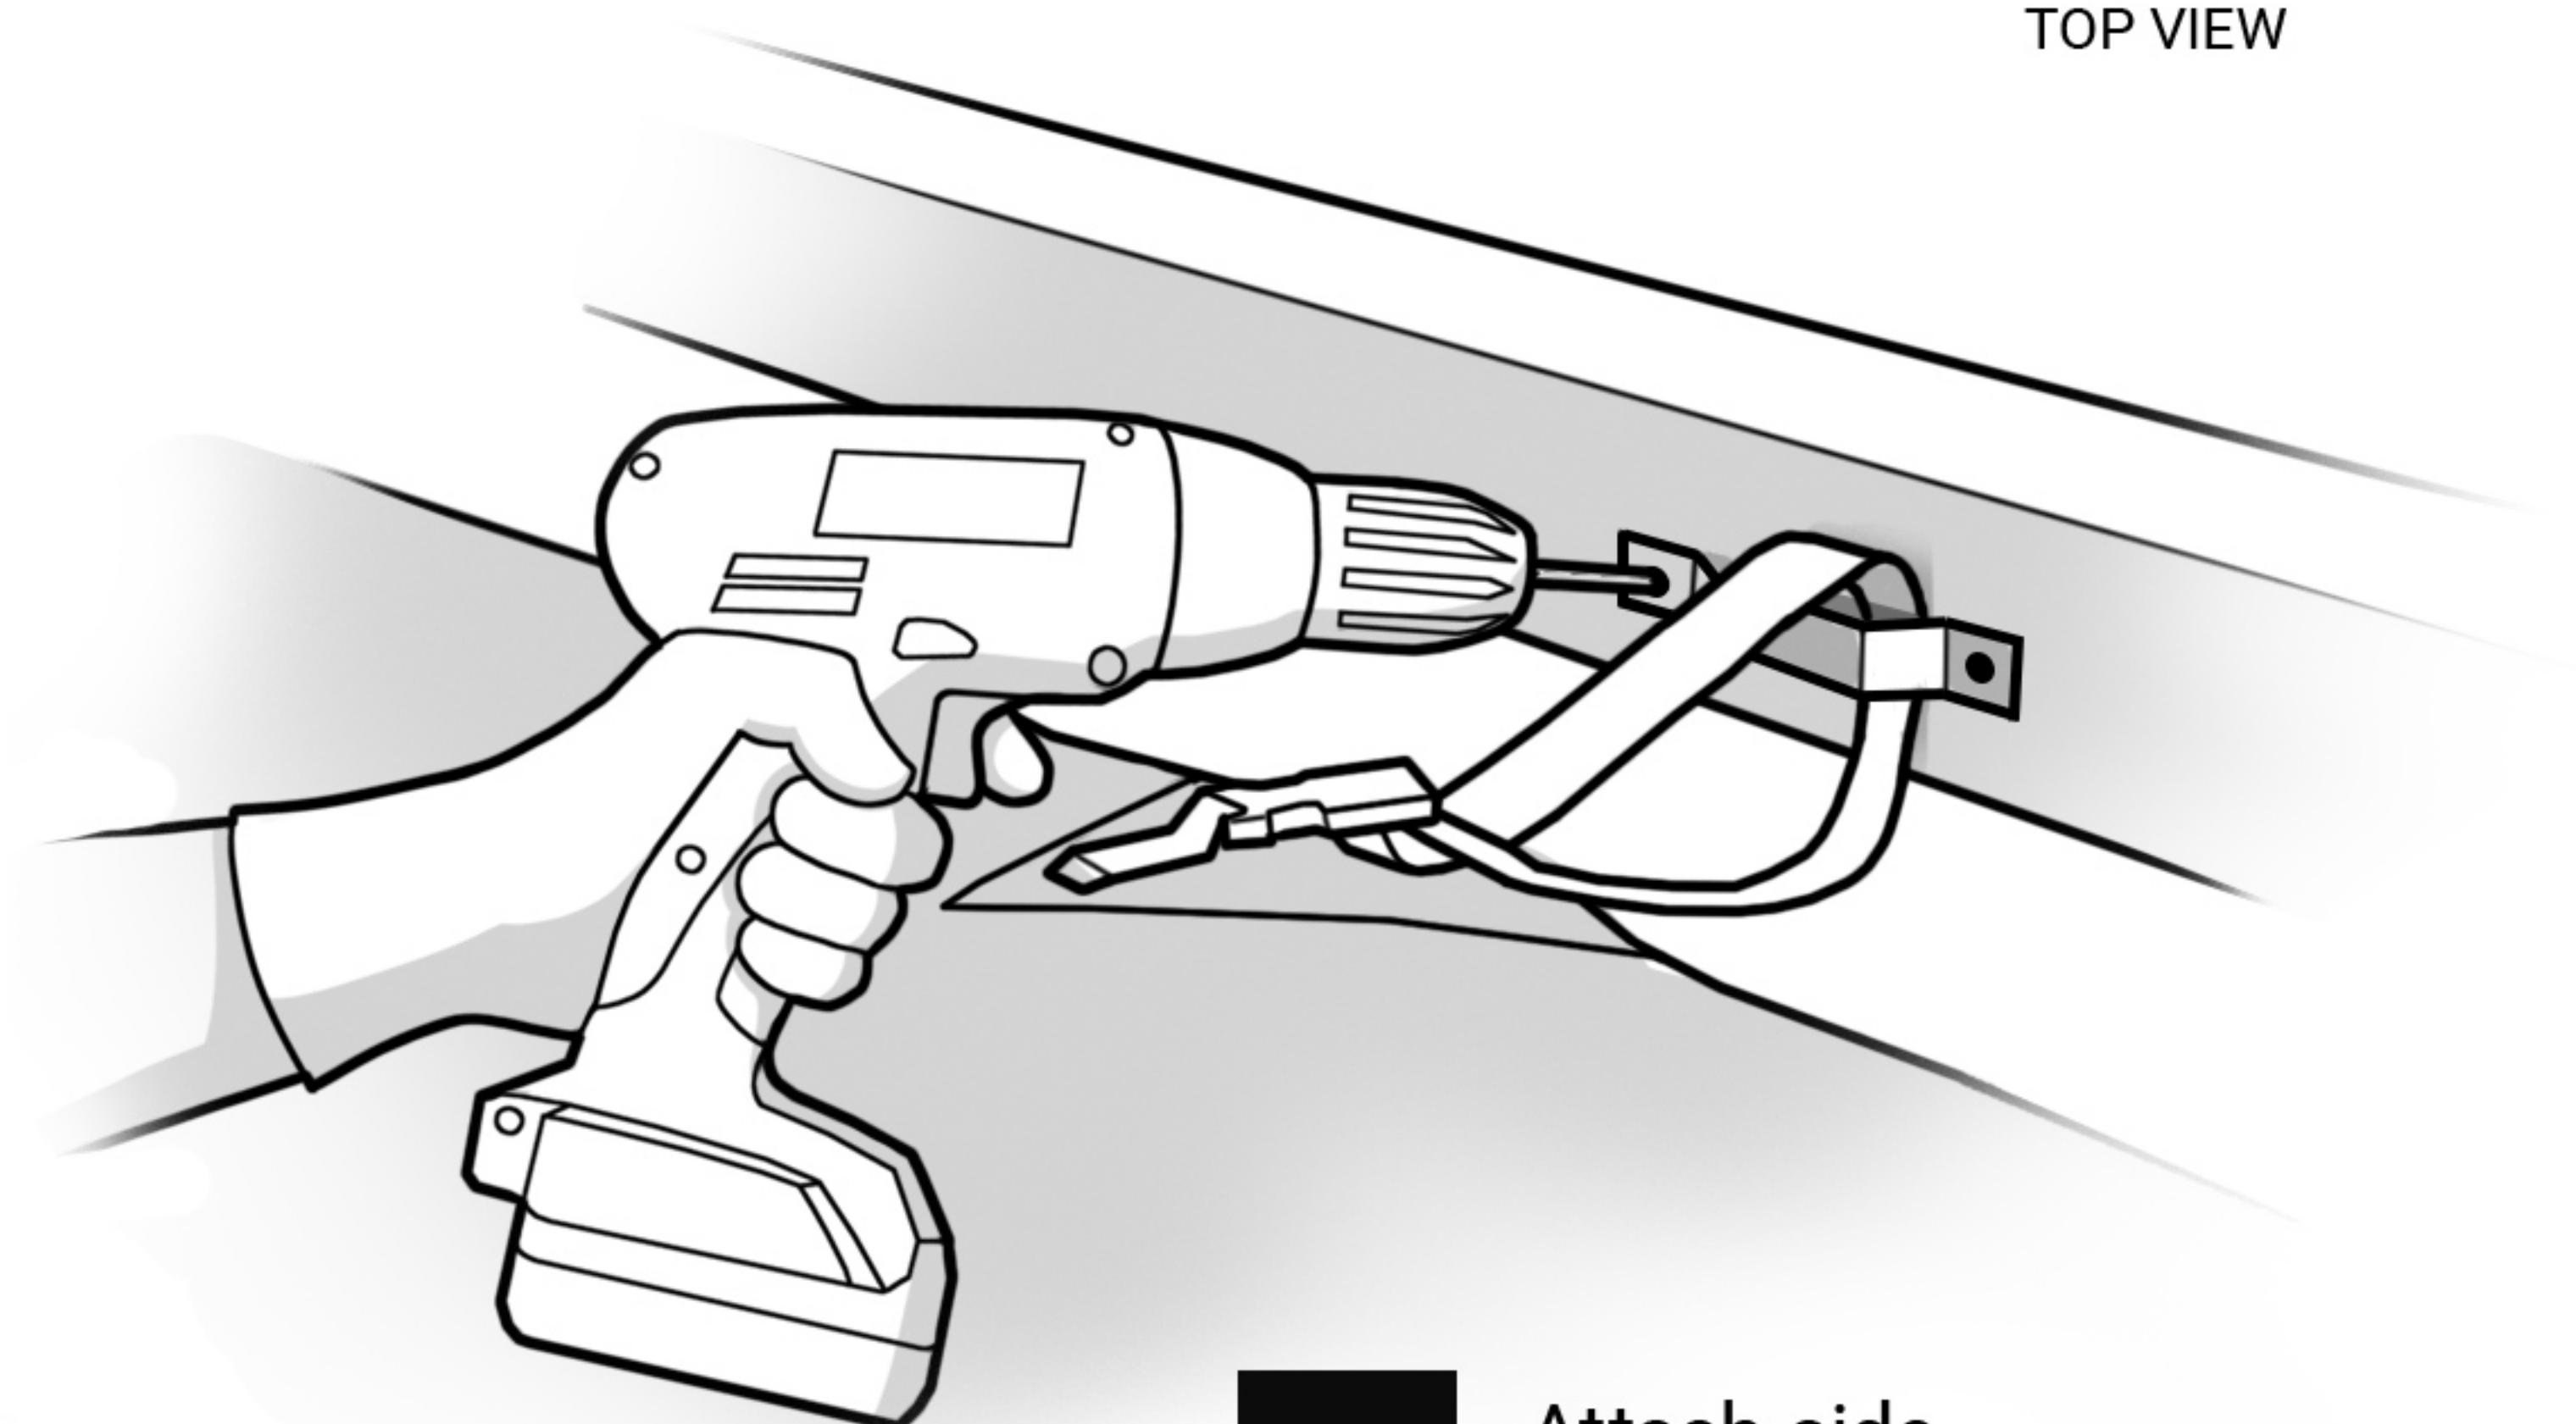

Attach buckles to corner brackets and pull tight

**STEP 3.3****ATTACHING TOP SHADE**

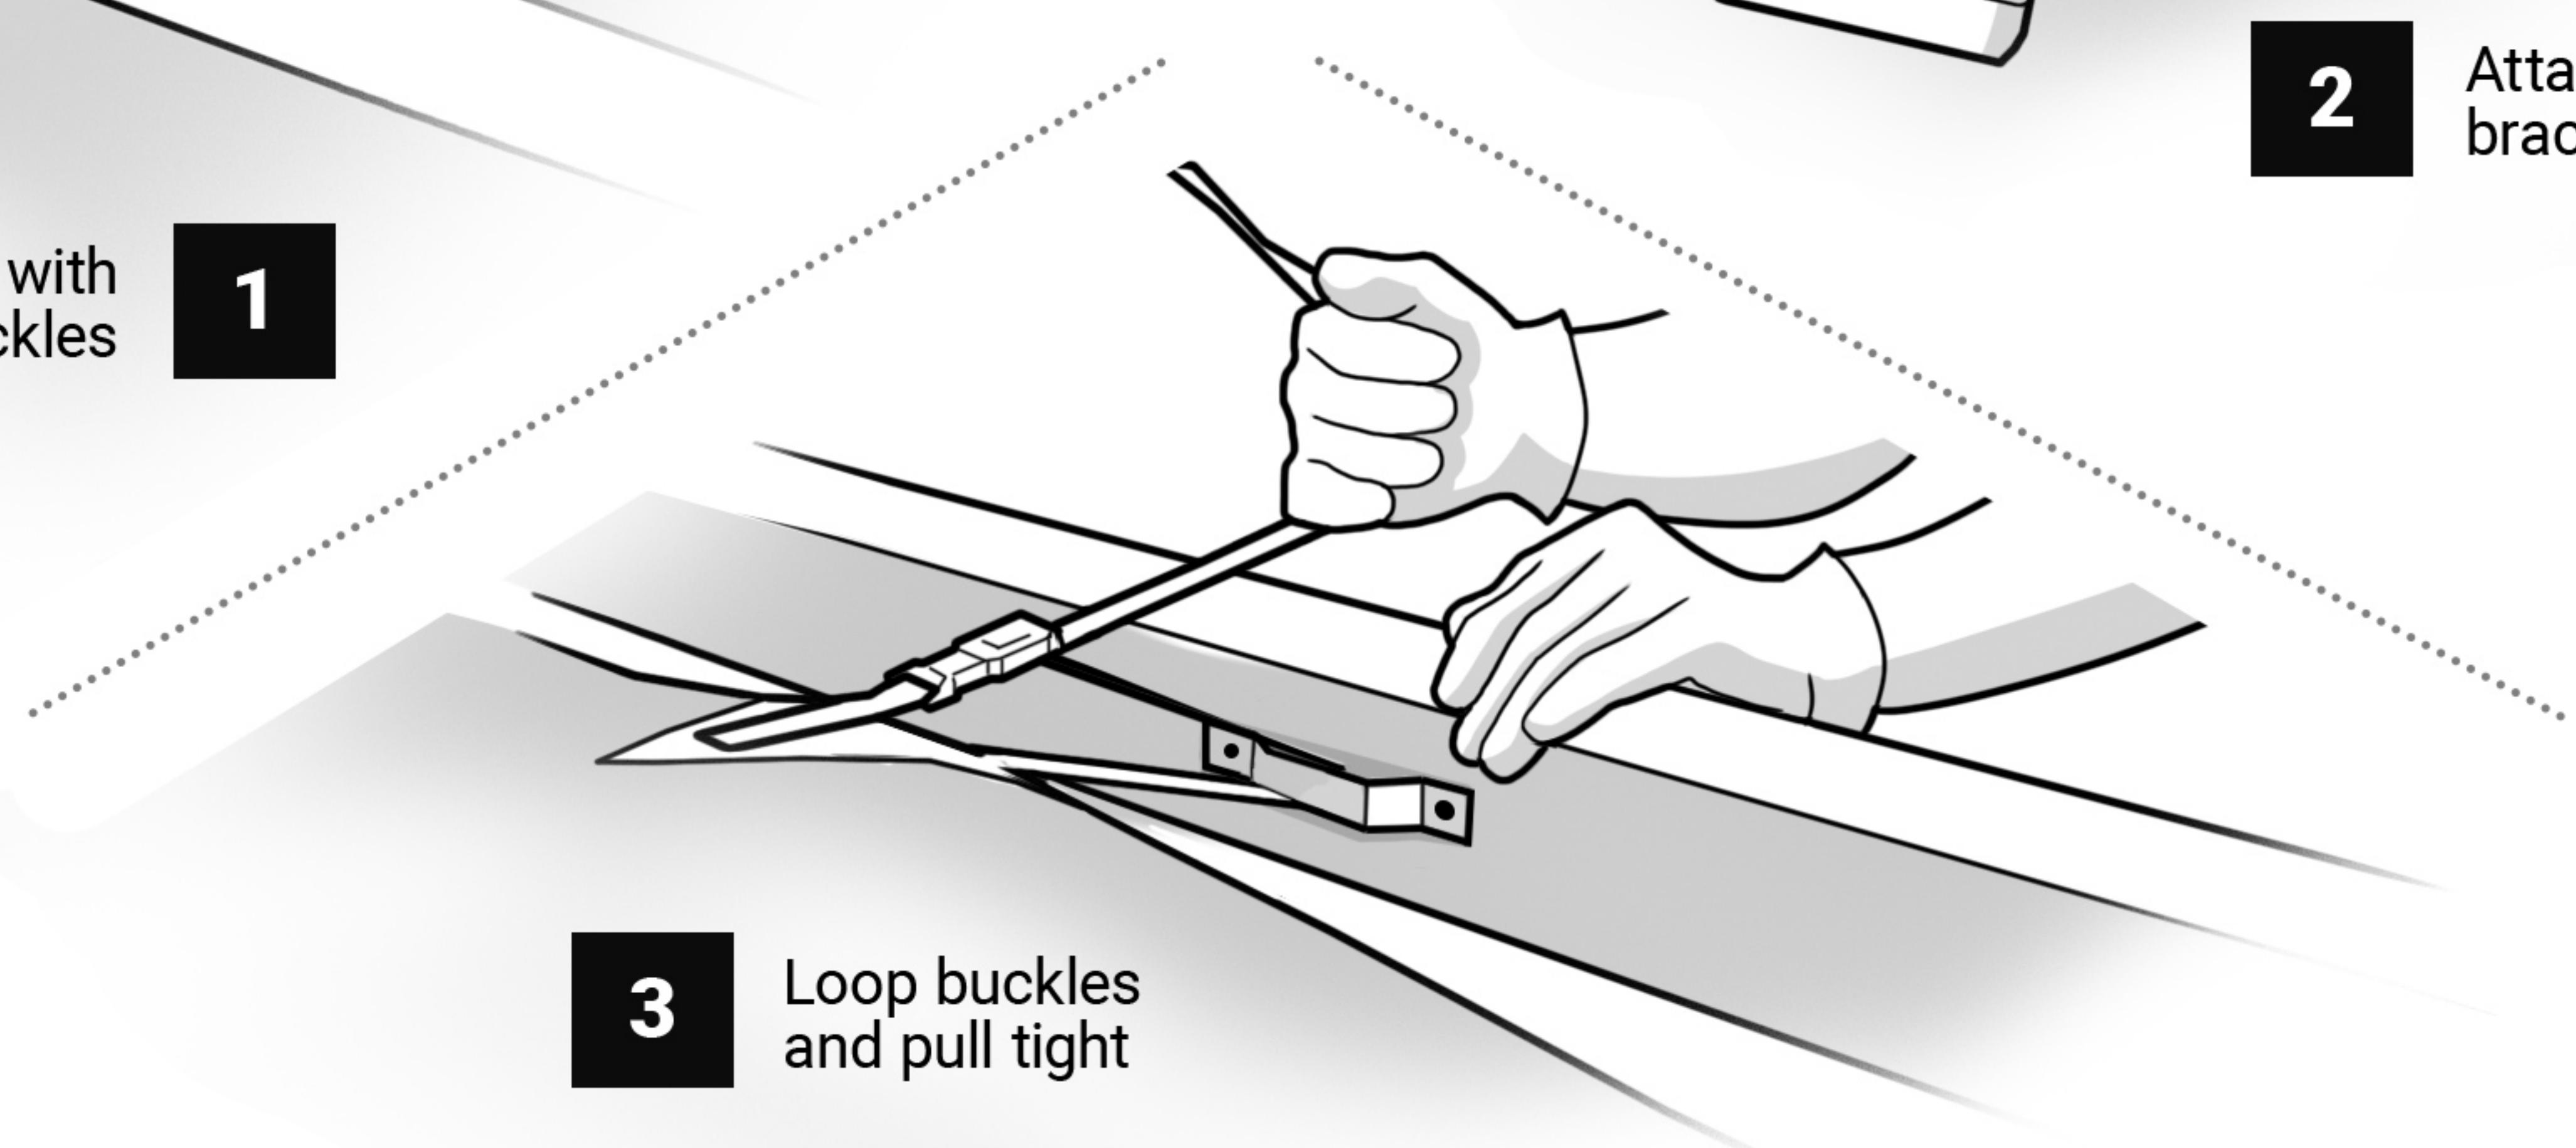

Attach all side brackets

Line up side brackets with
the shades side buckles

1**2**

Attach side
brackets

**3**

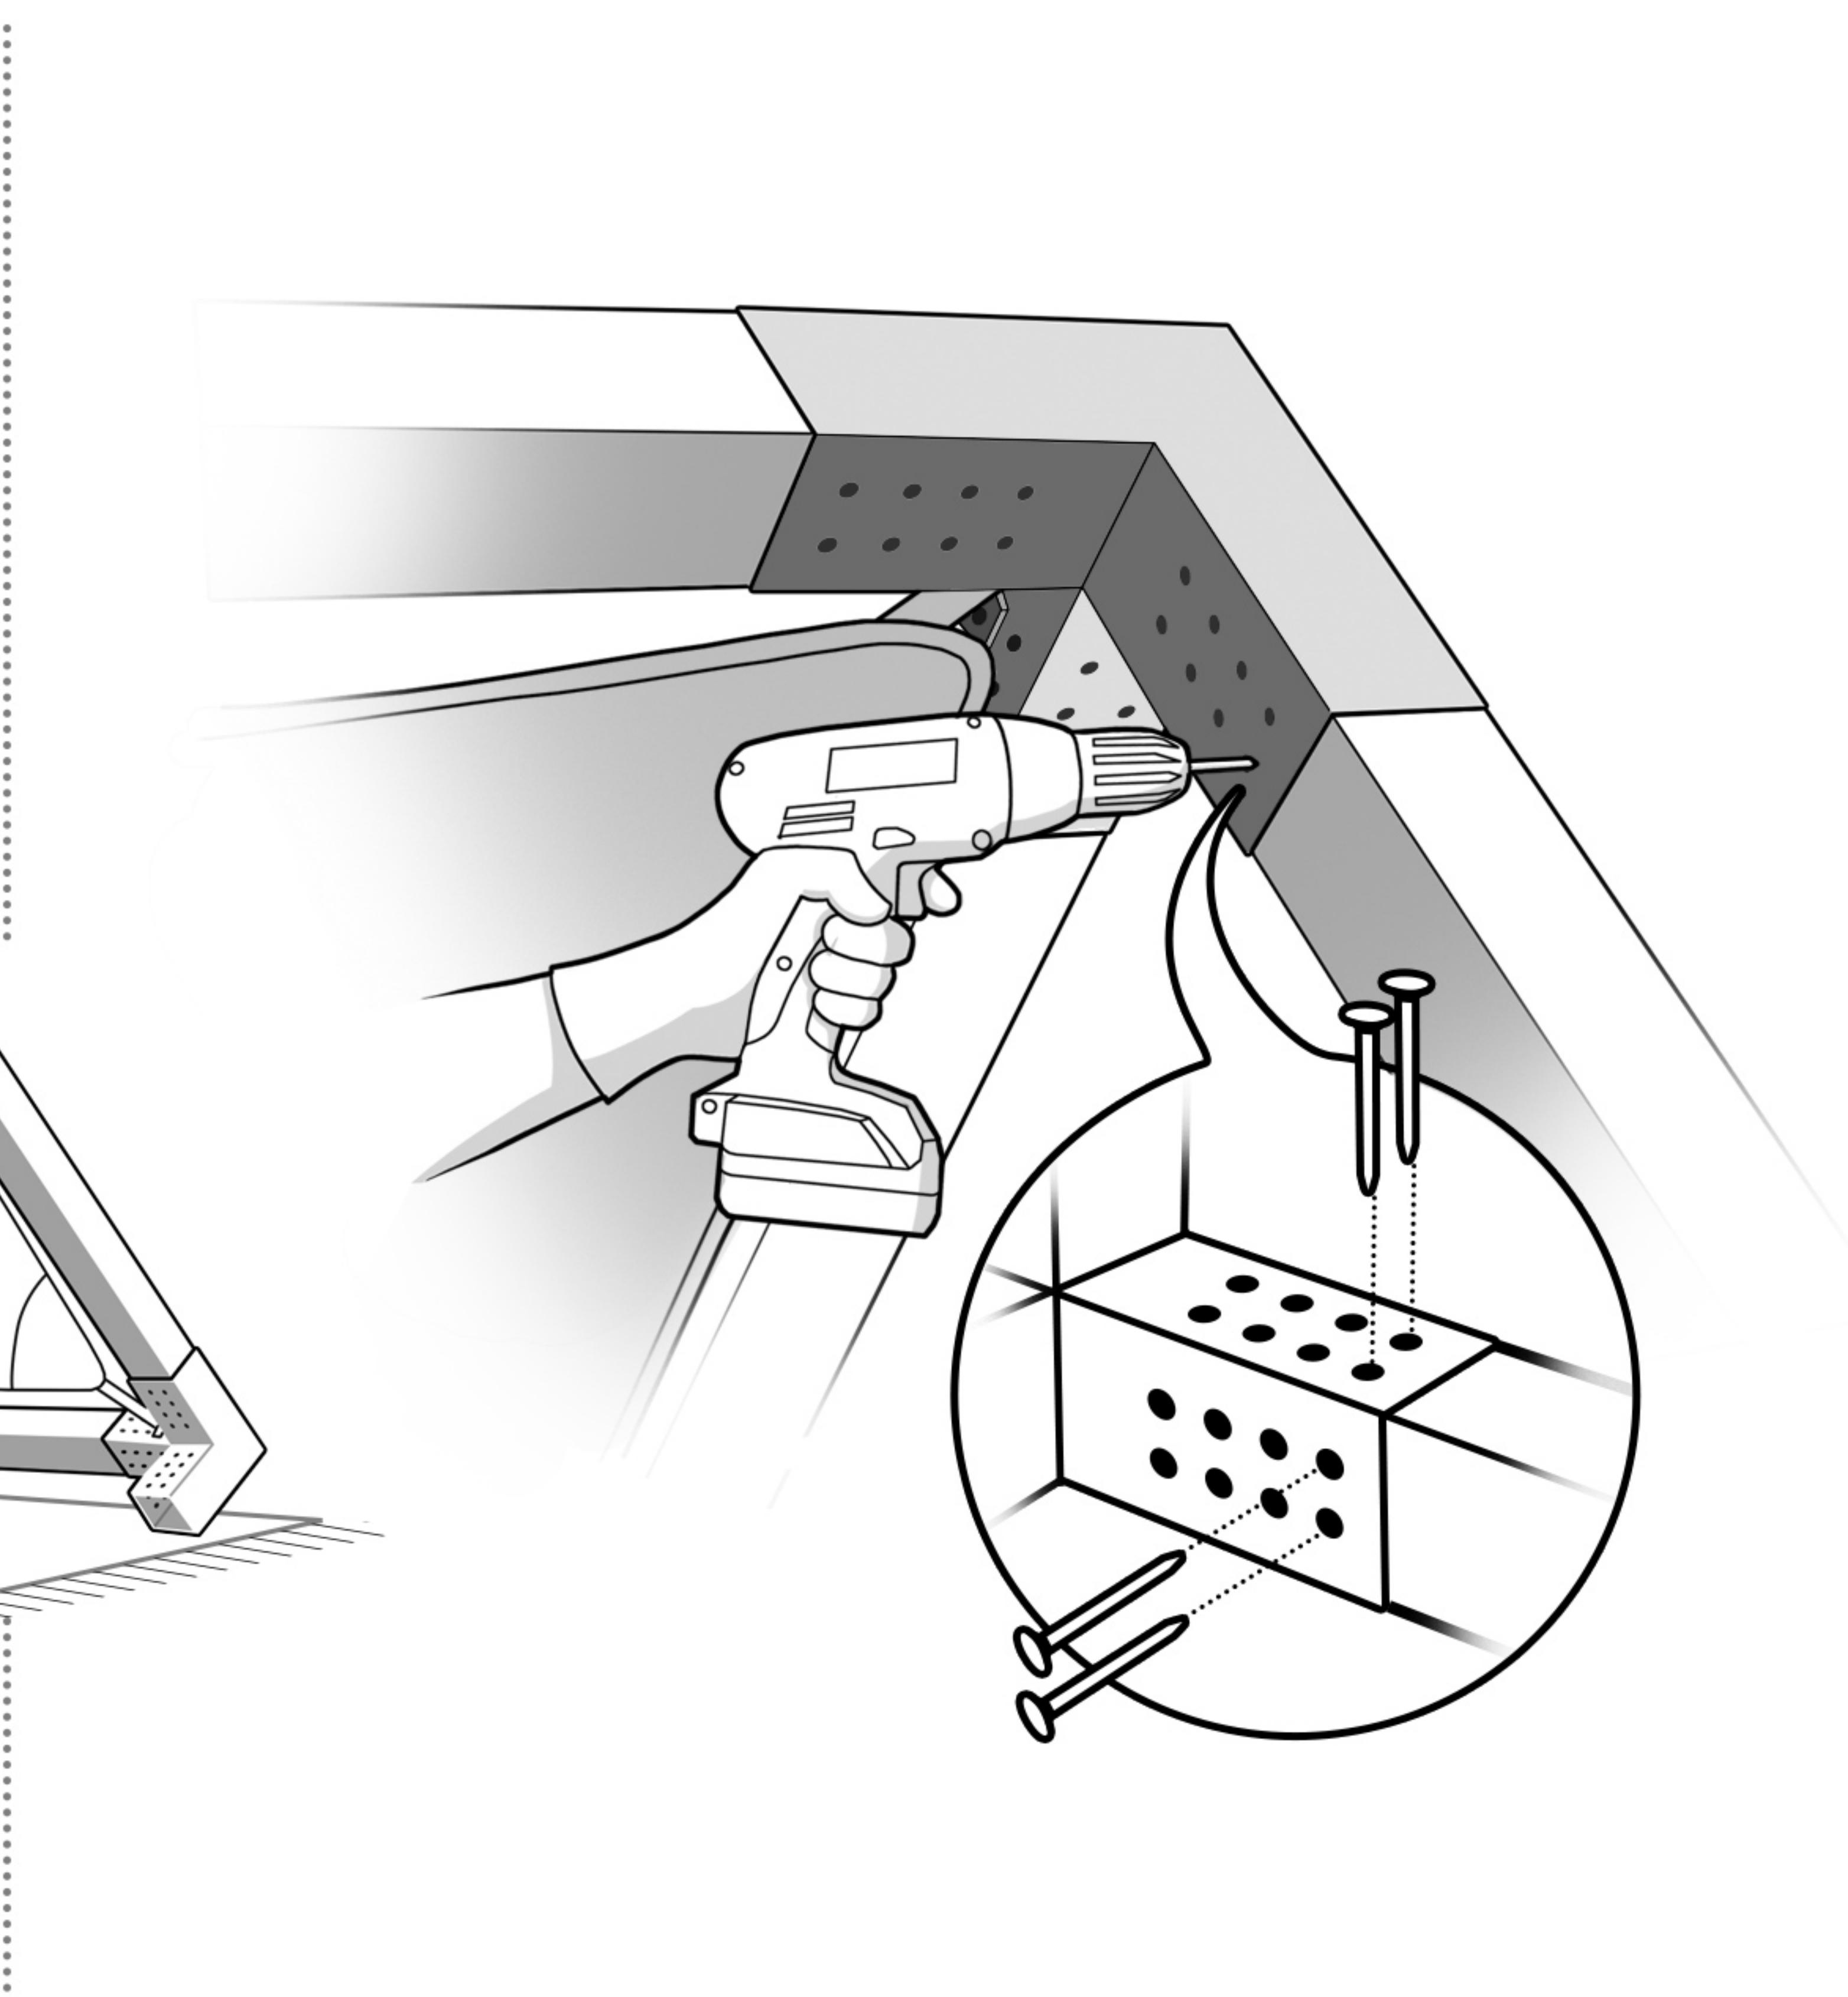

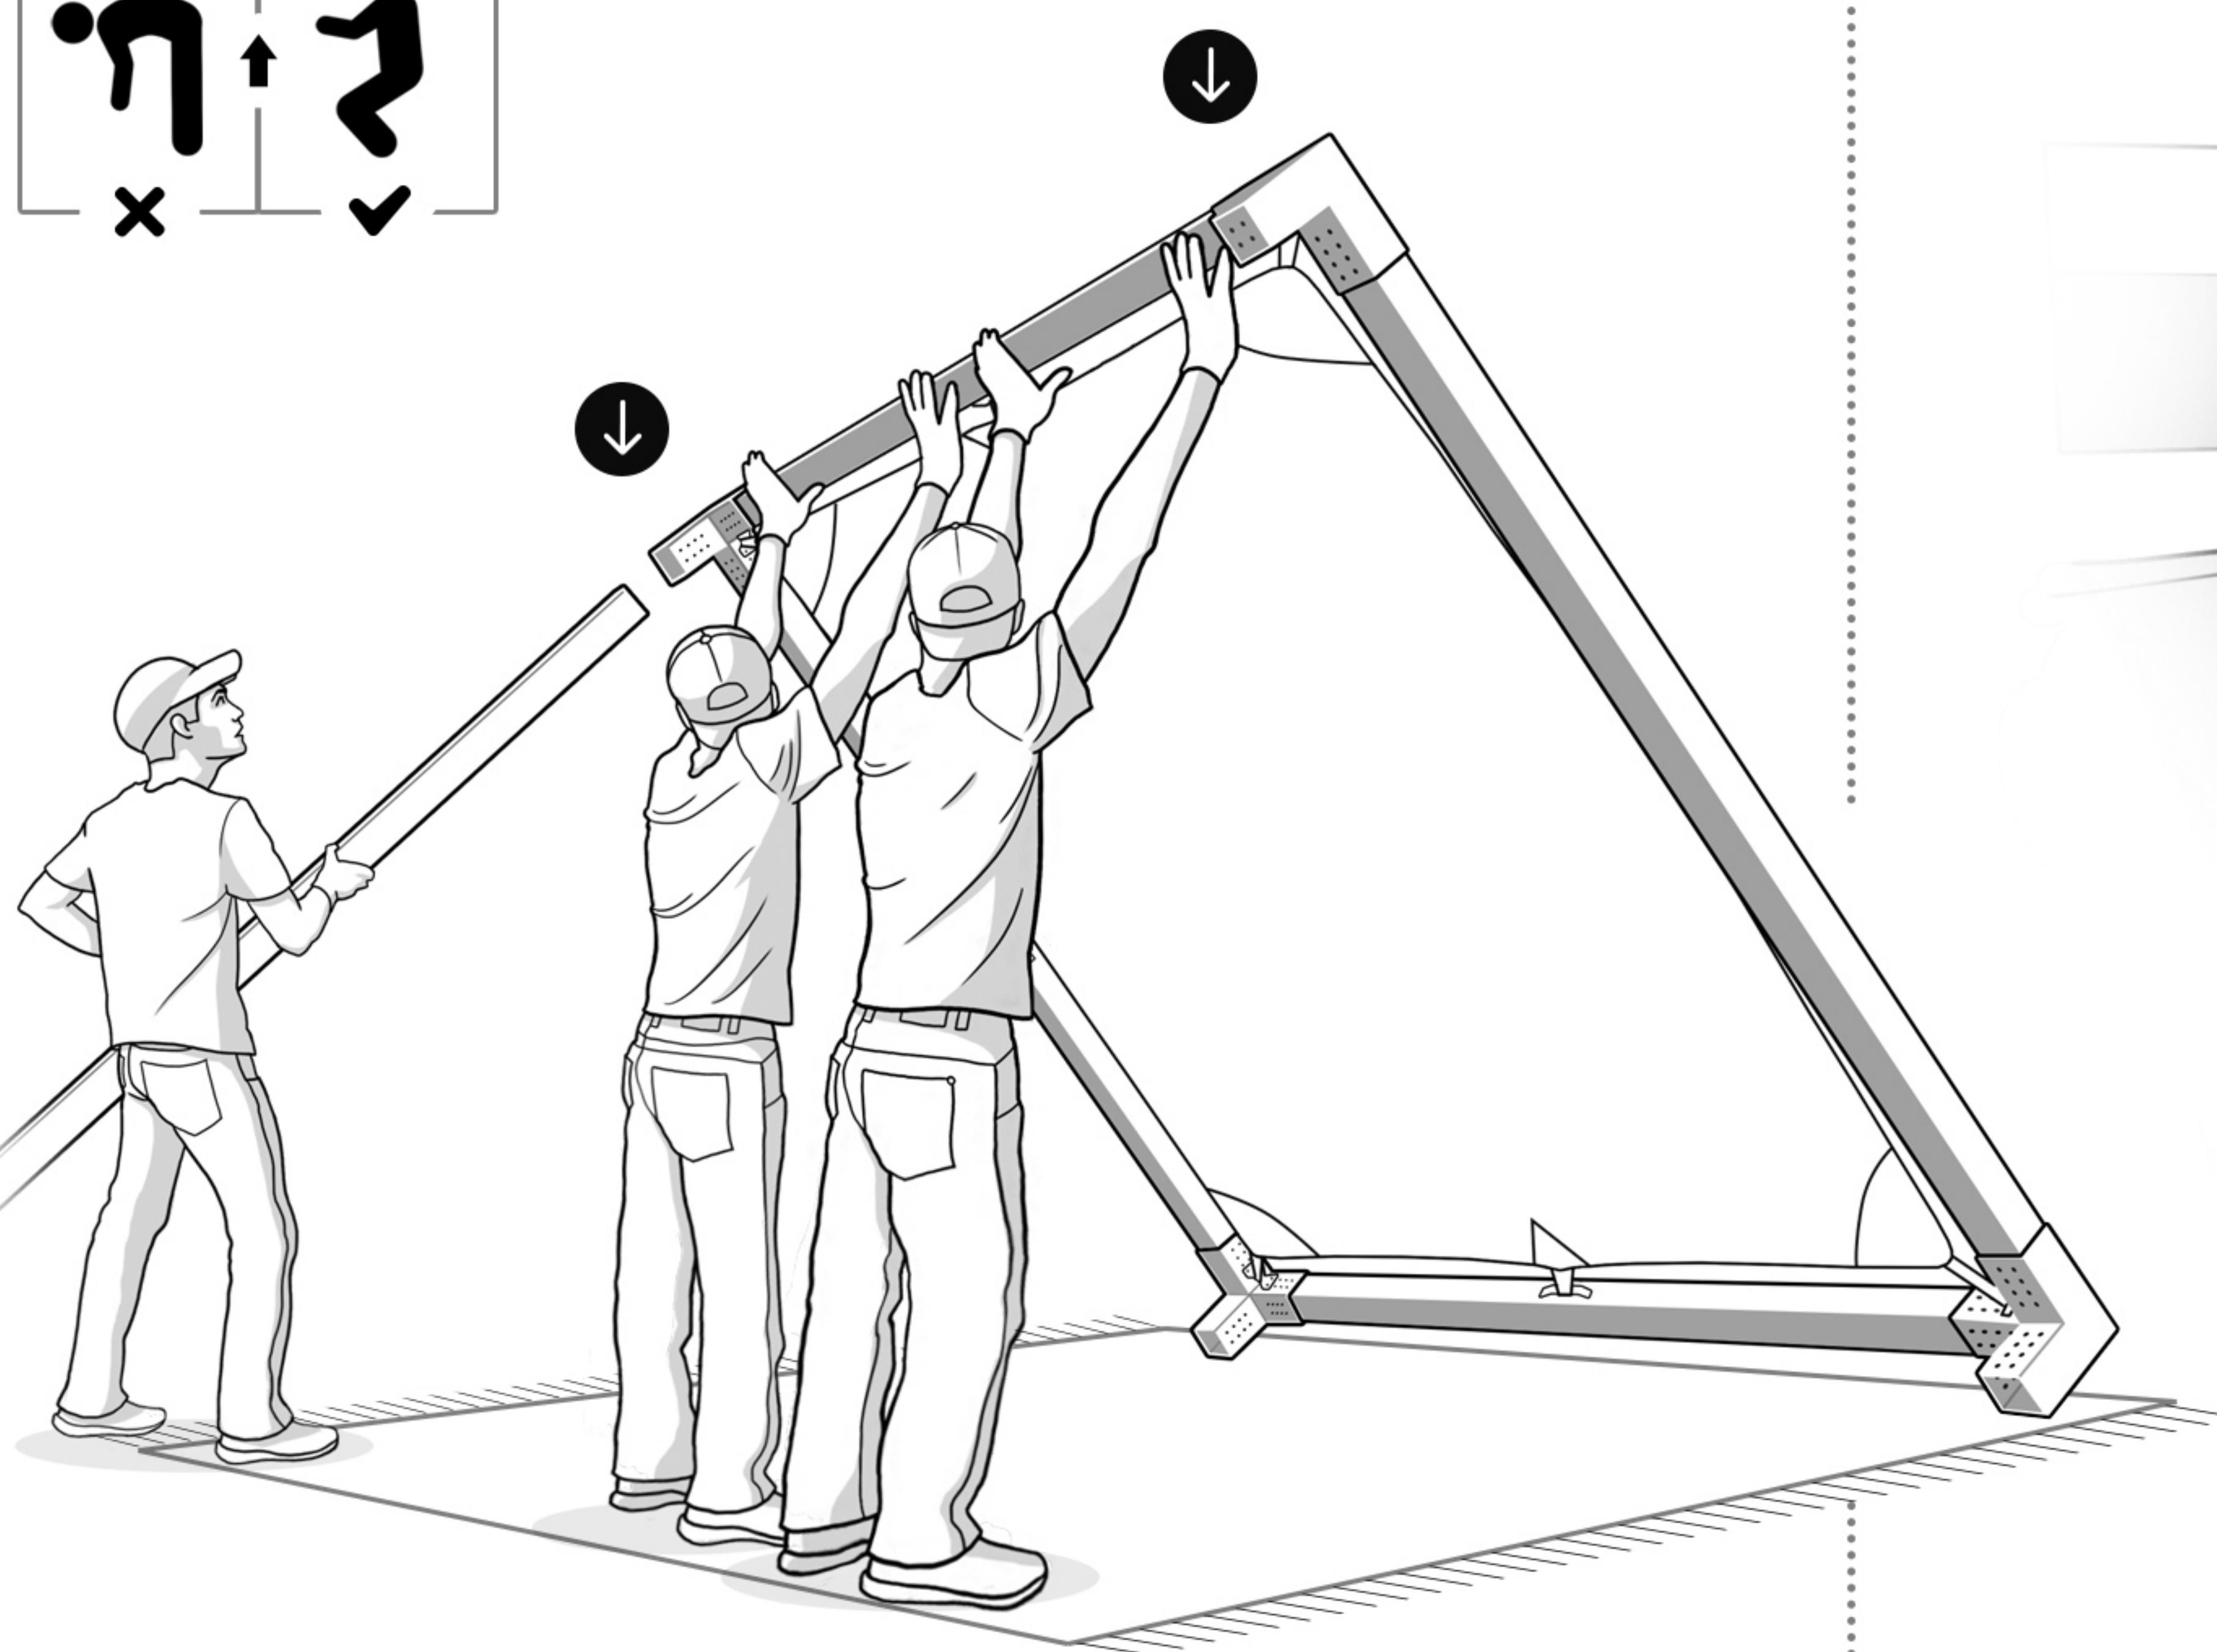

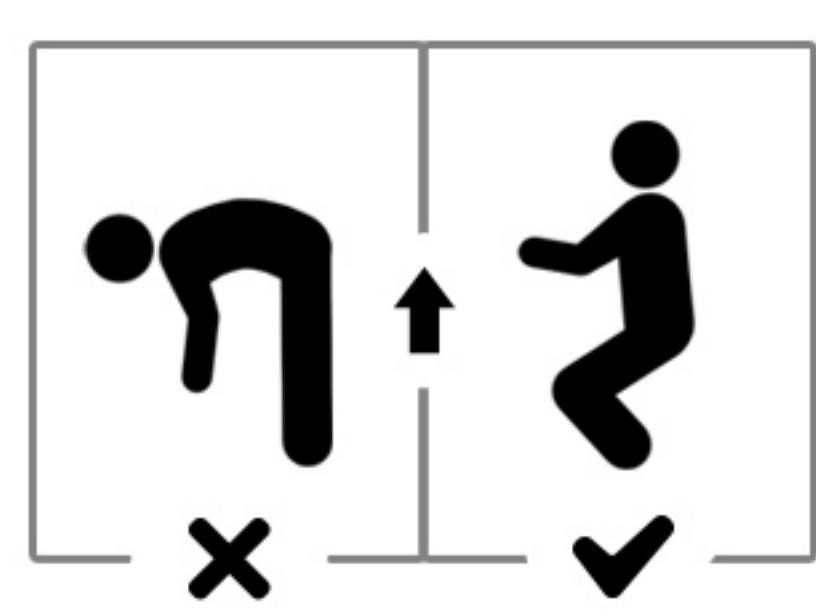

Loop buckles
and pull tight

STEP 4.1**LIFT FIRST SIDE**

Insert 2 wood post

STEP 4.2**LIFT FIRST SIDE**

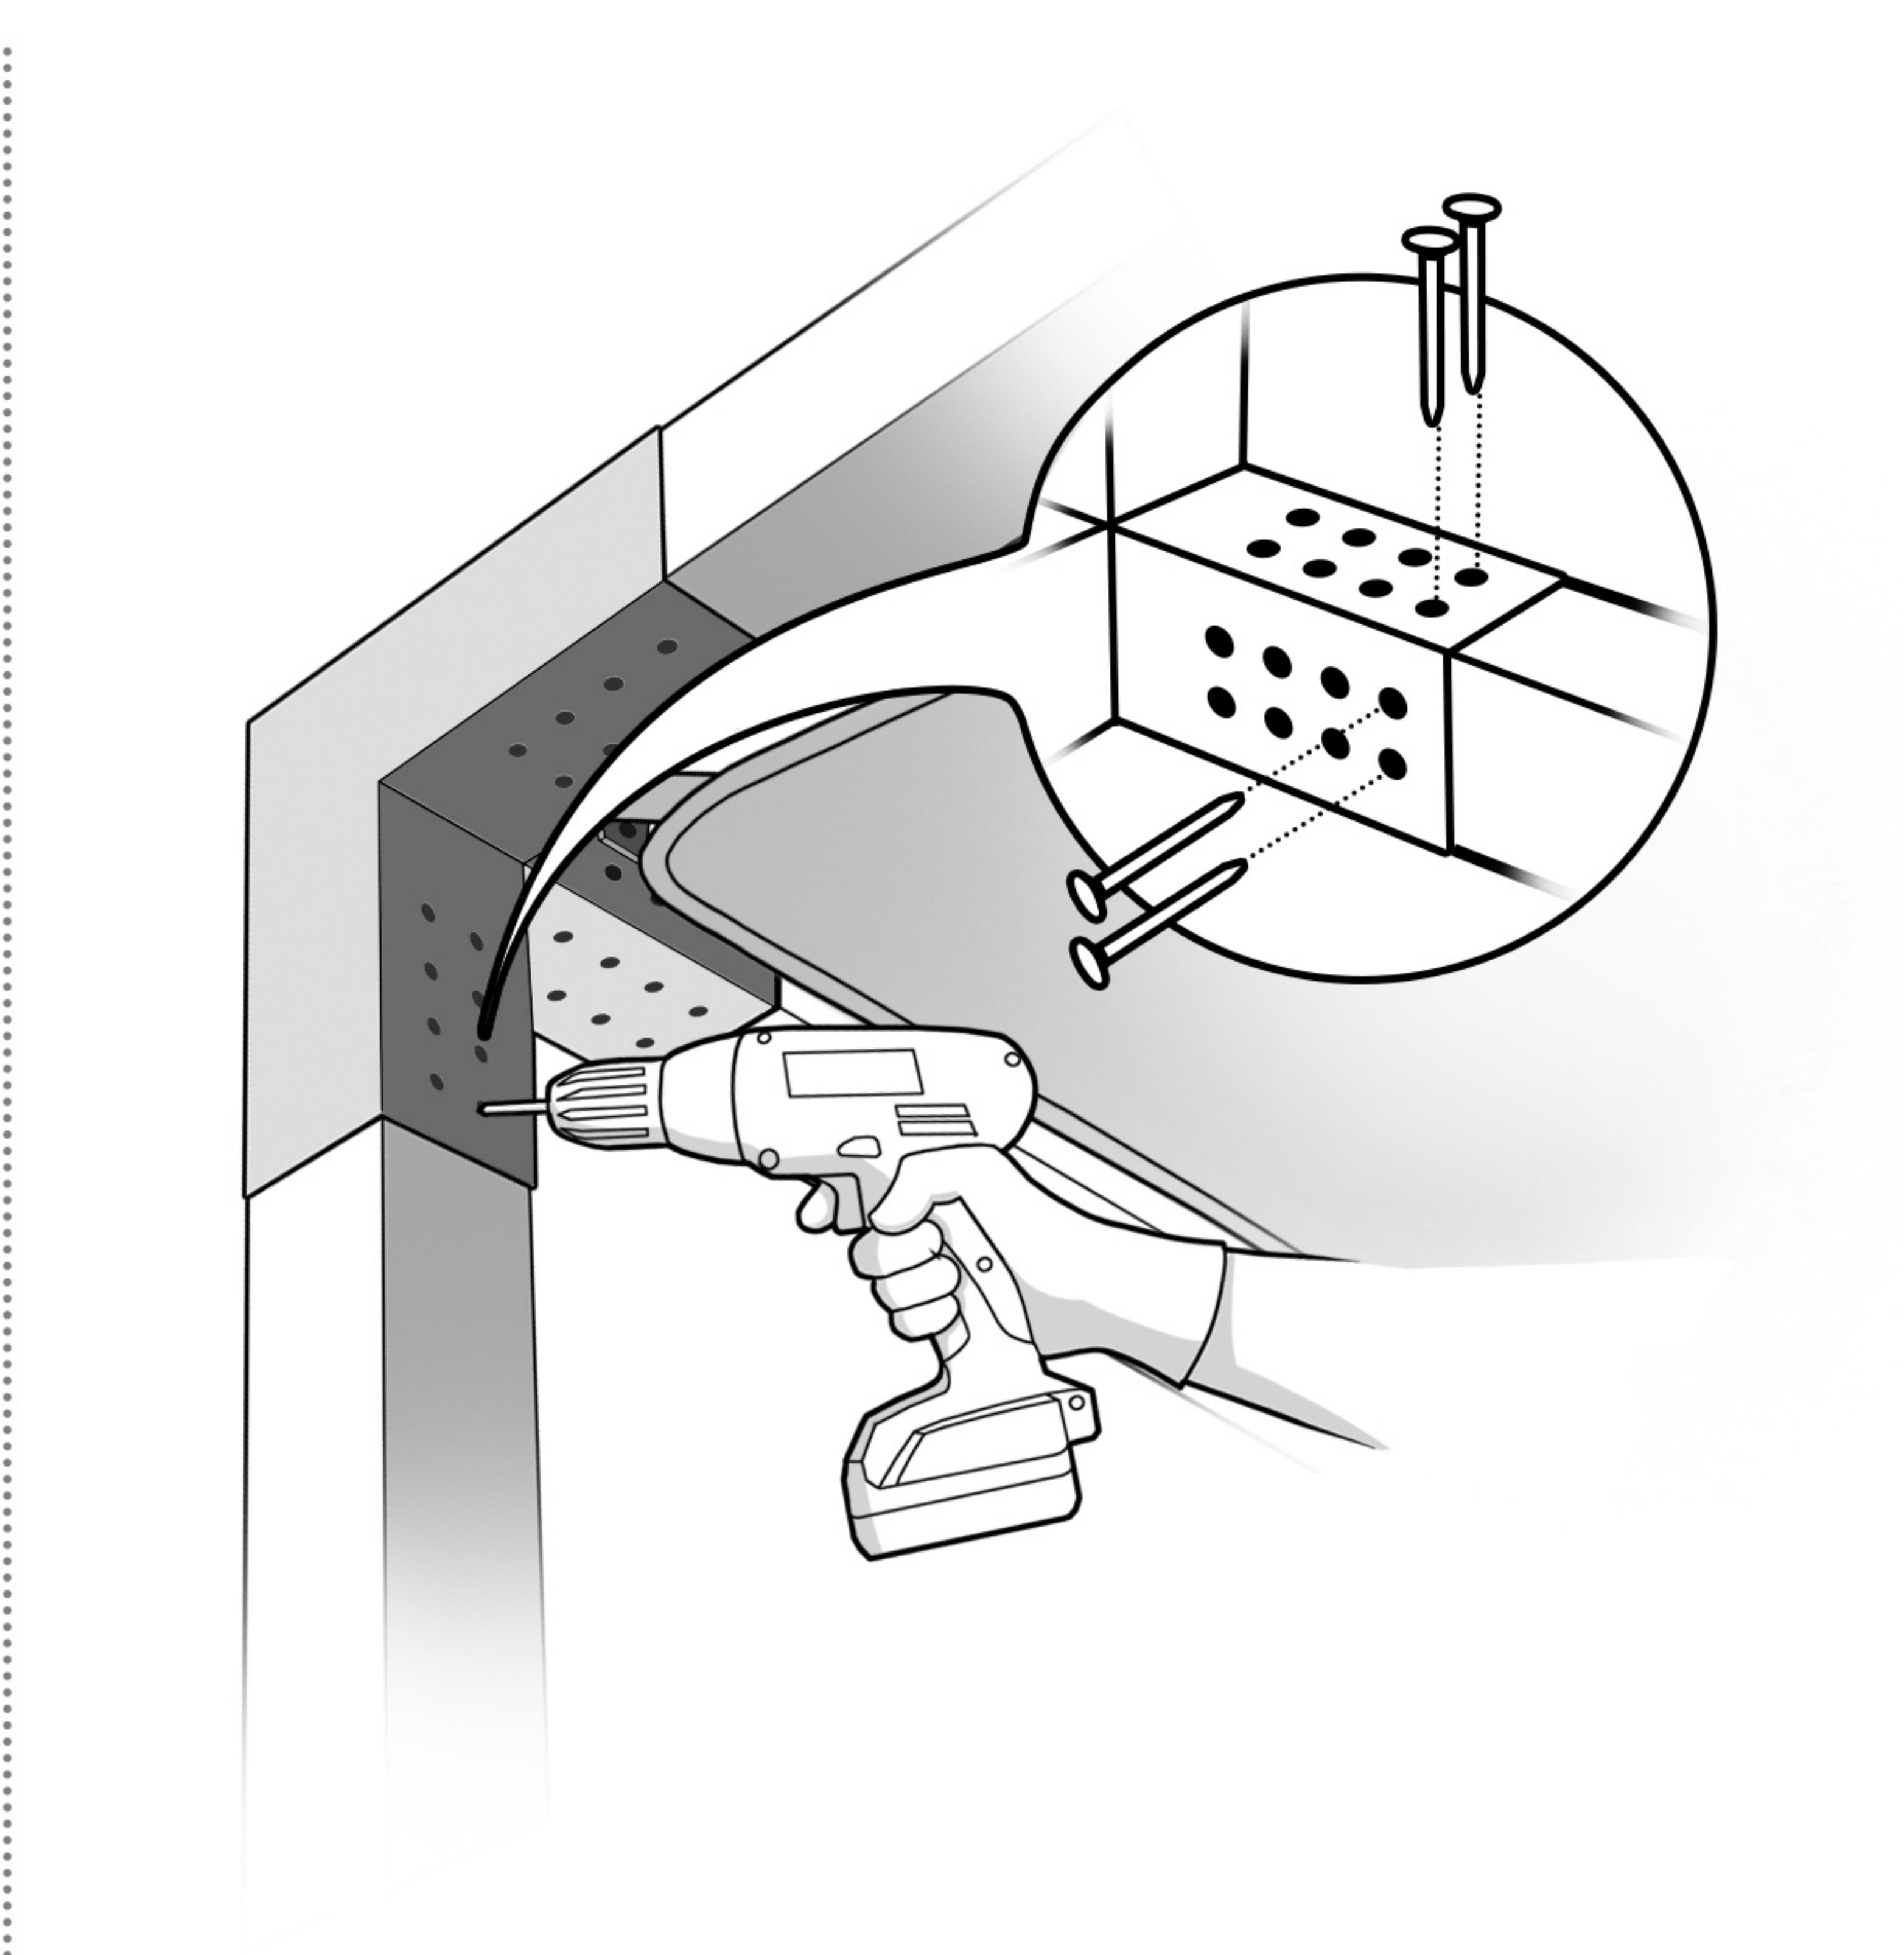

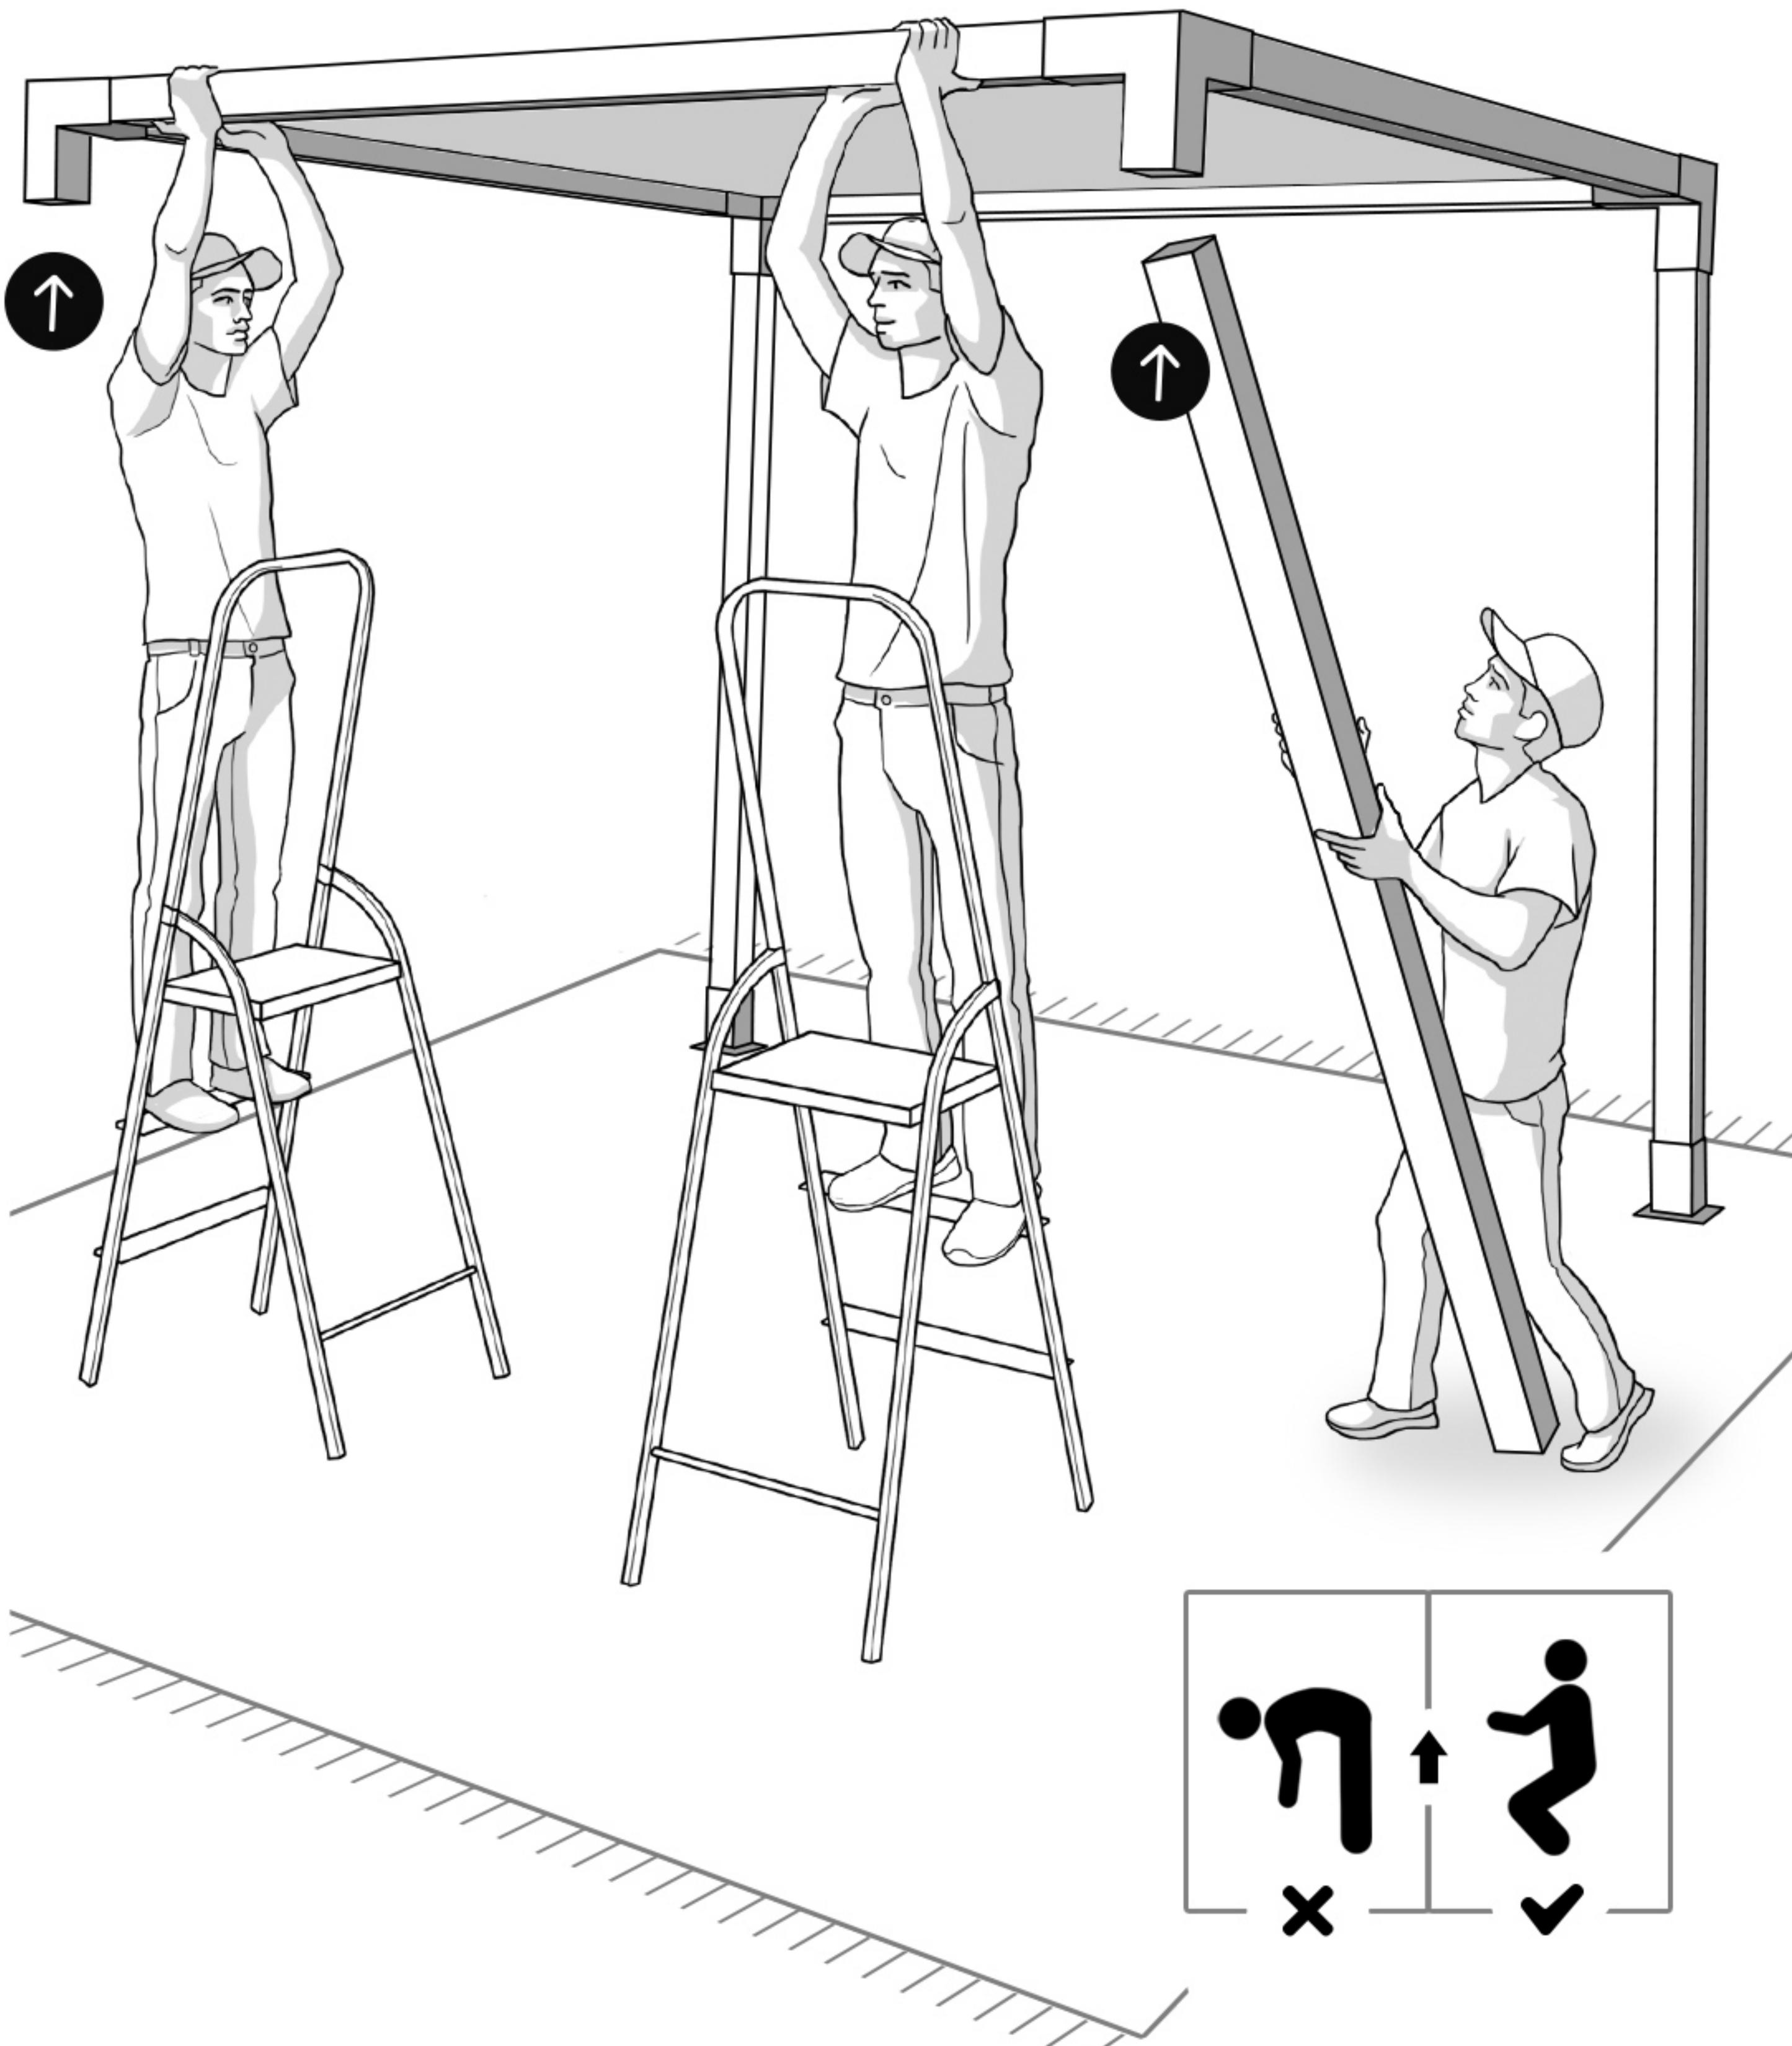

Secure (4 screws for each wood post)

**STEP 5.1****LIFT SECOND SIDE**

Insert 2 wood post

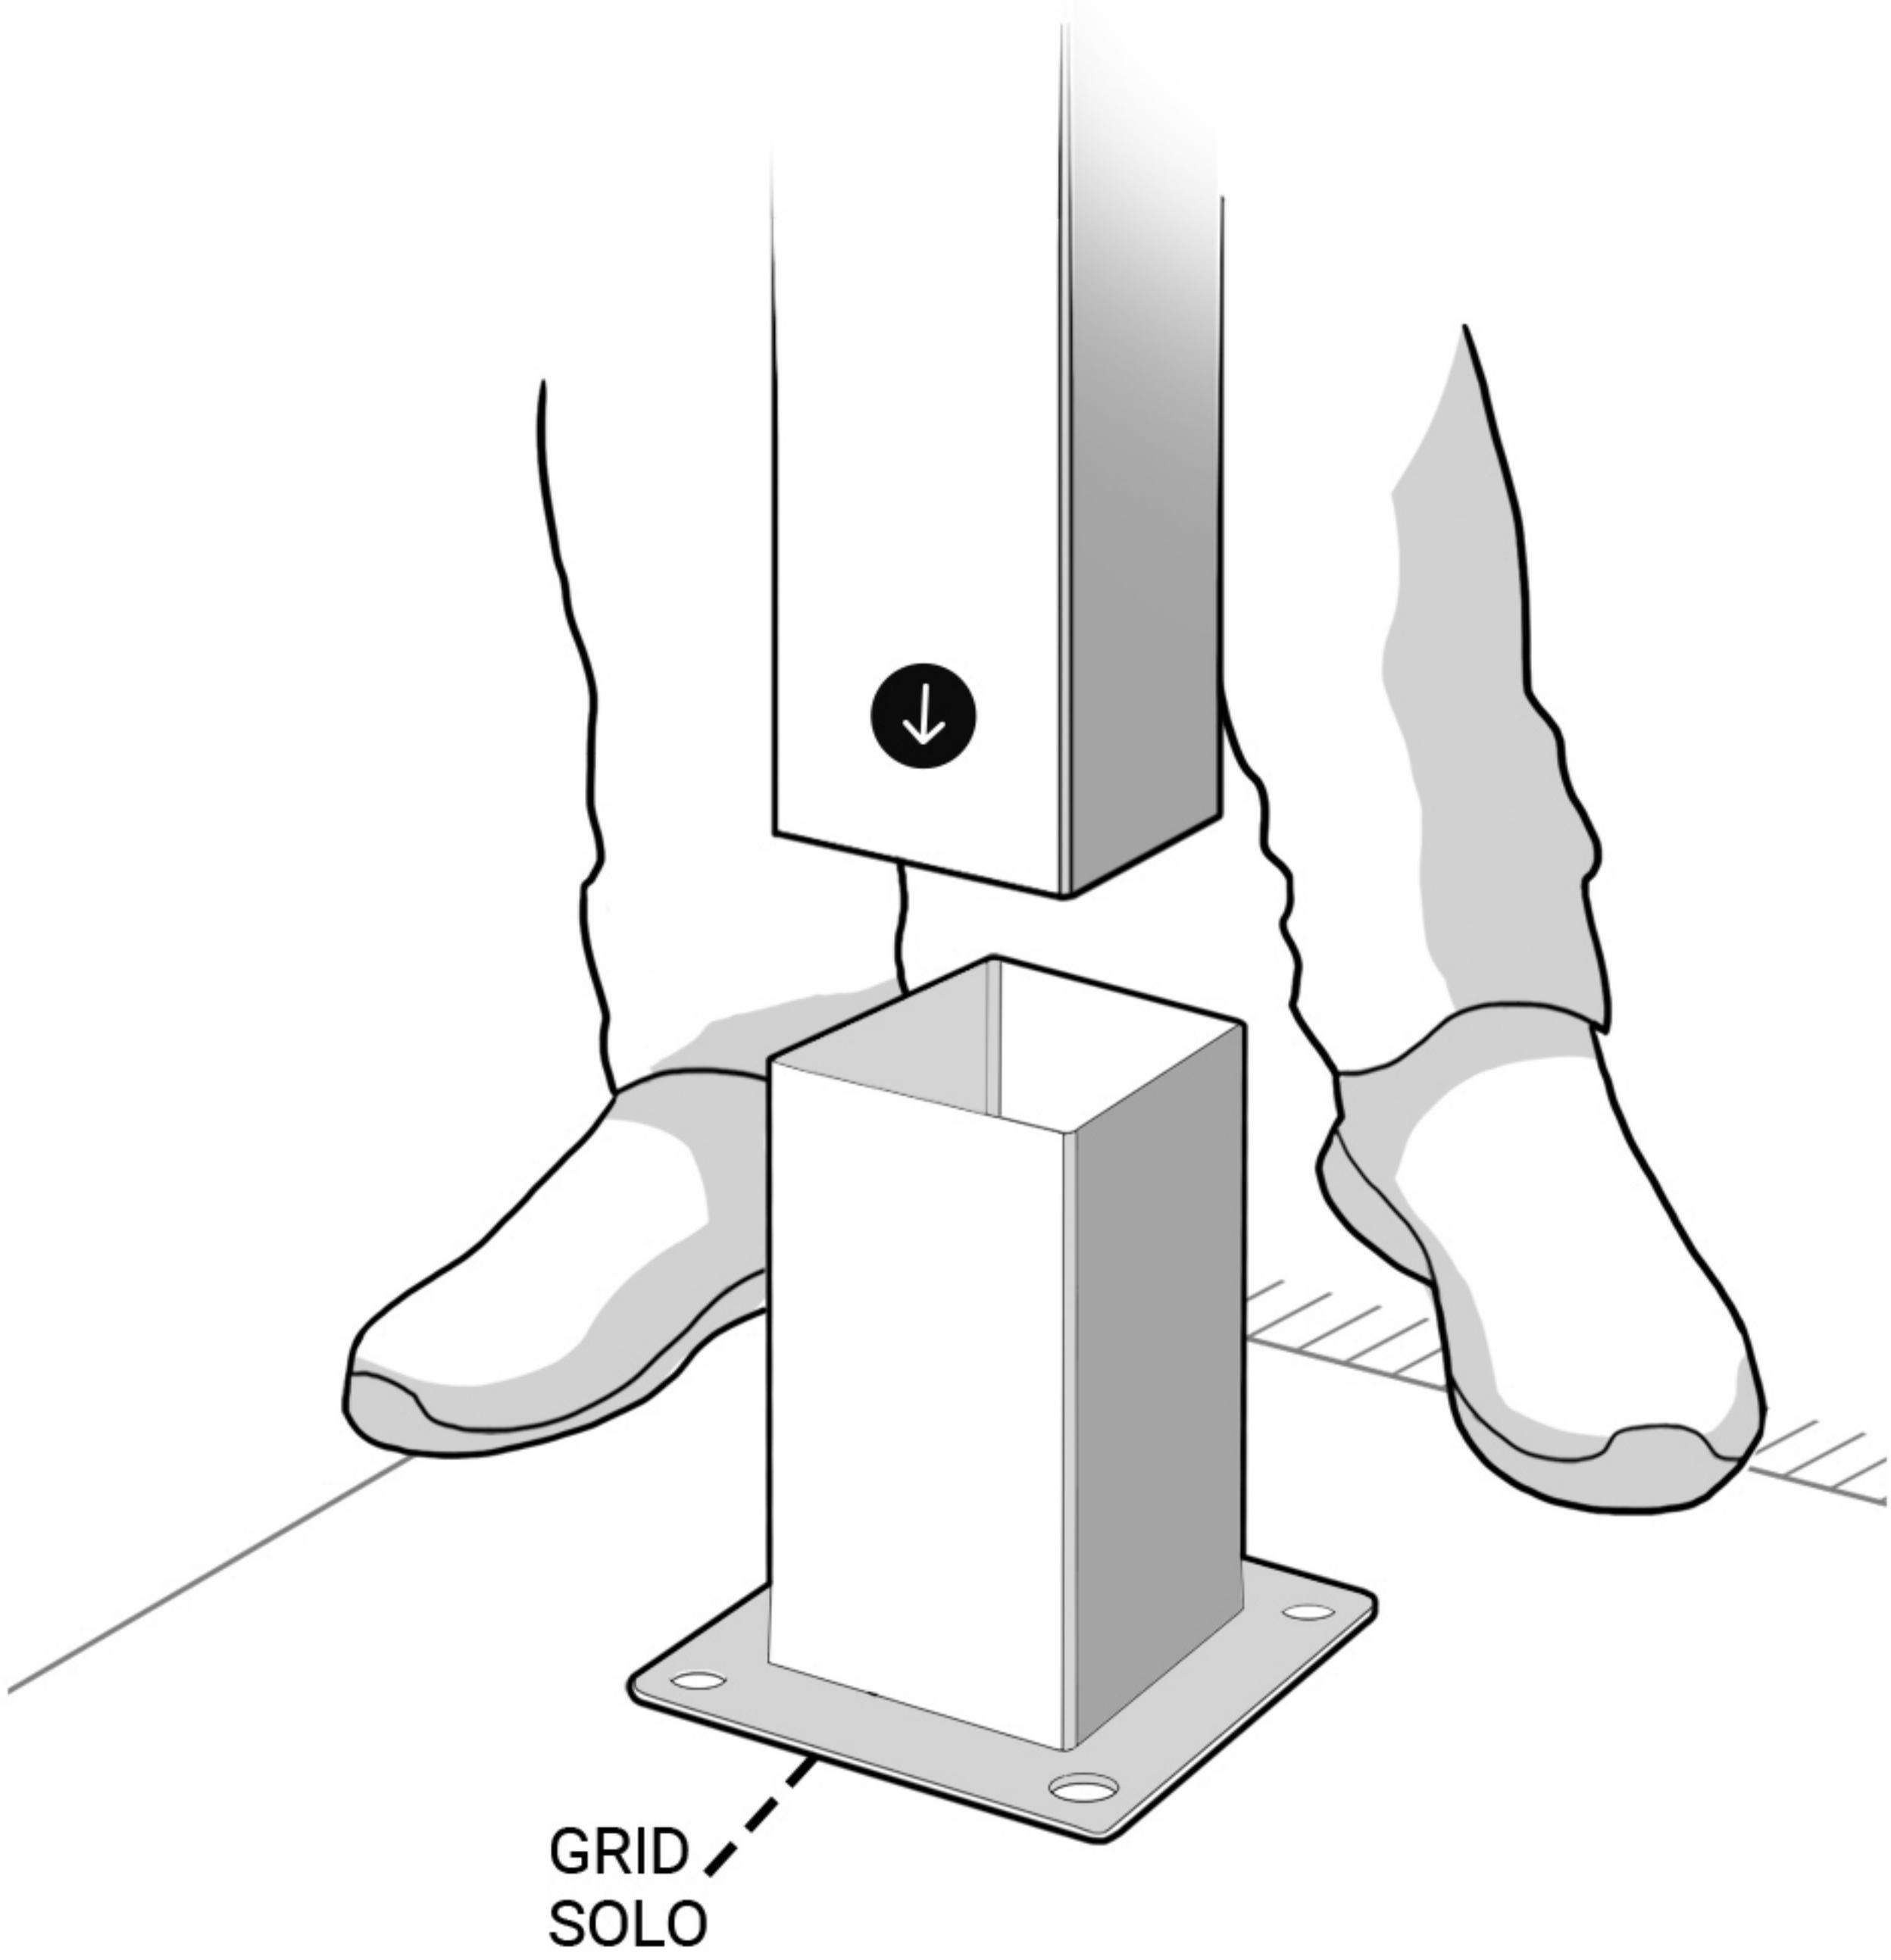

STEP 5.2**LIFT SECOND SIDE**

Secure (4 screws for each wood post)

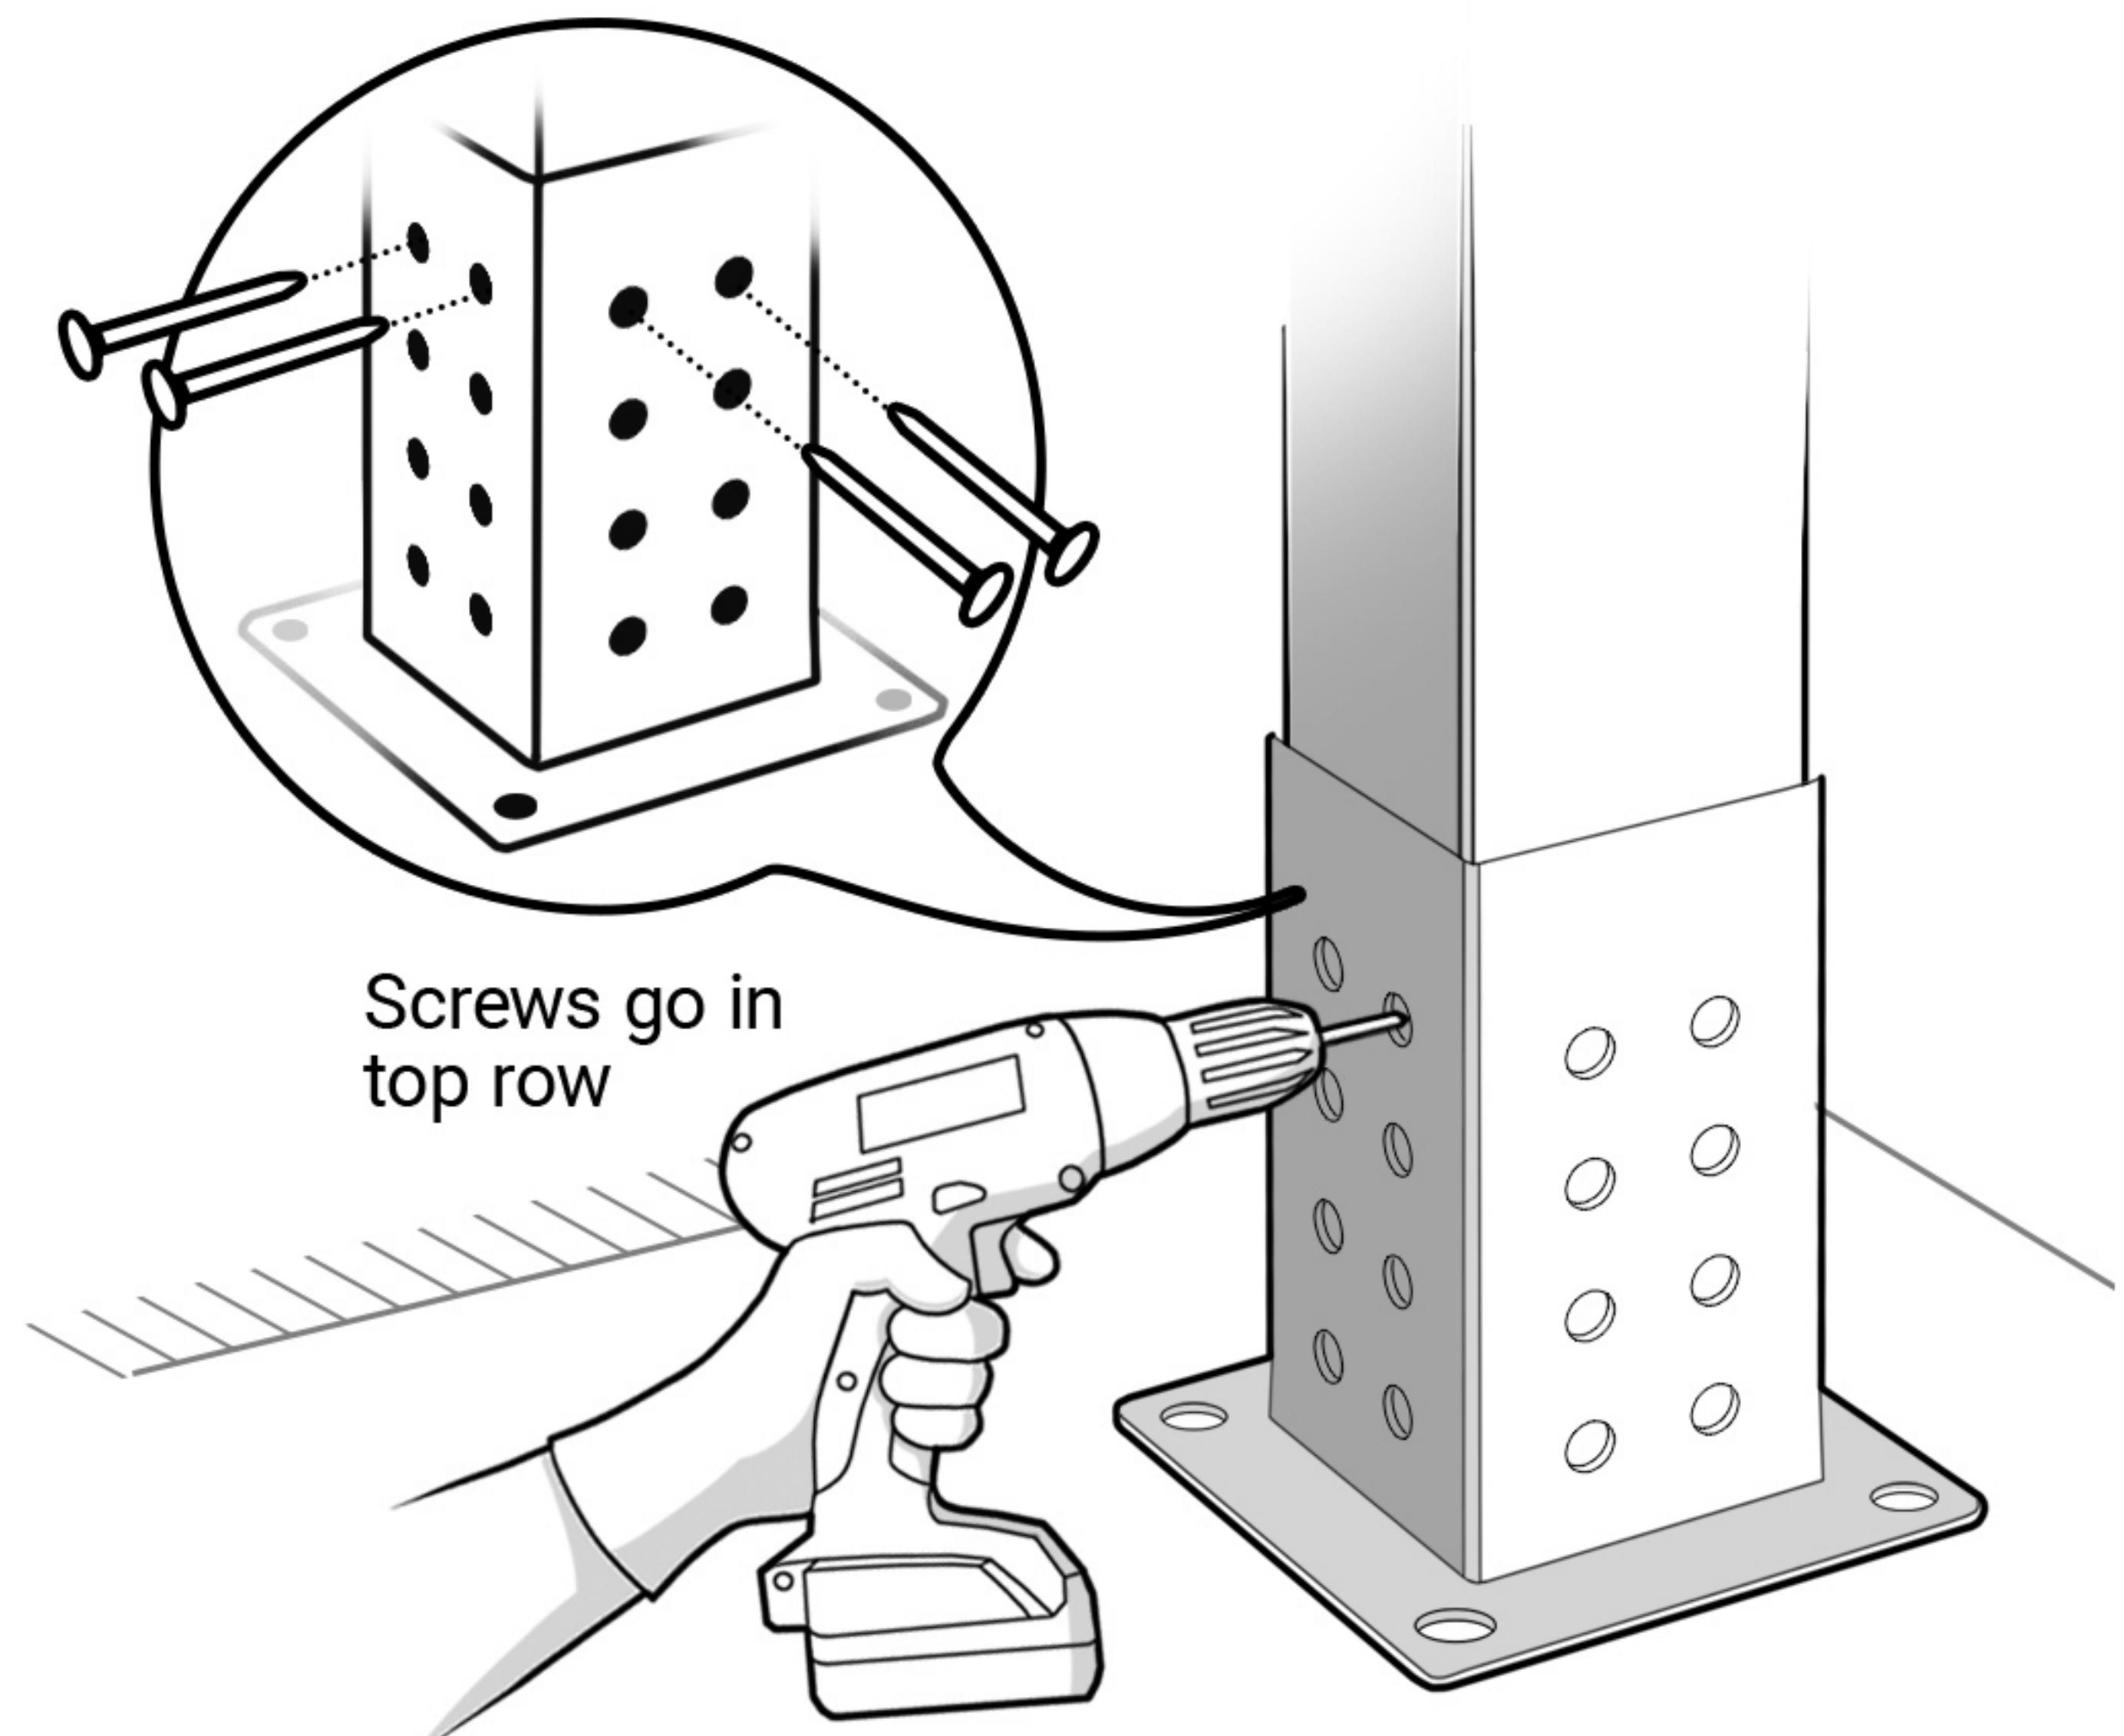

STEP 5.3**FINISHED
TOP PART****FOR HAMMOCK
SKIP TO STEP 8****STEP 6.1****BUILDING THE BASE**

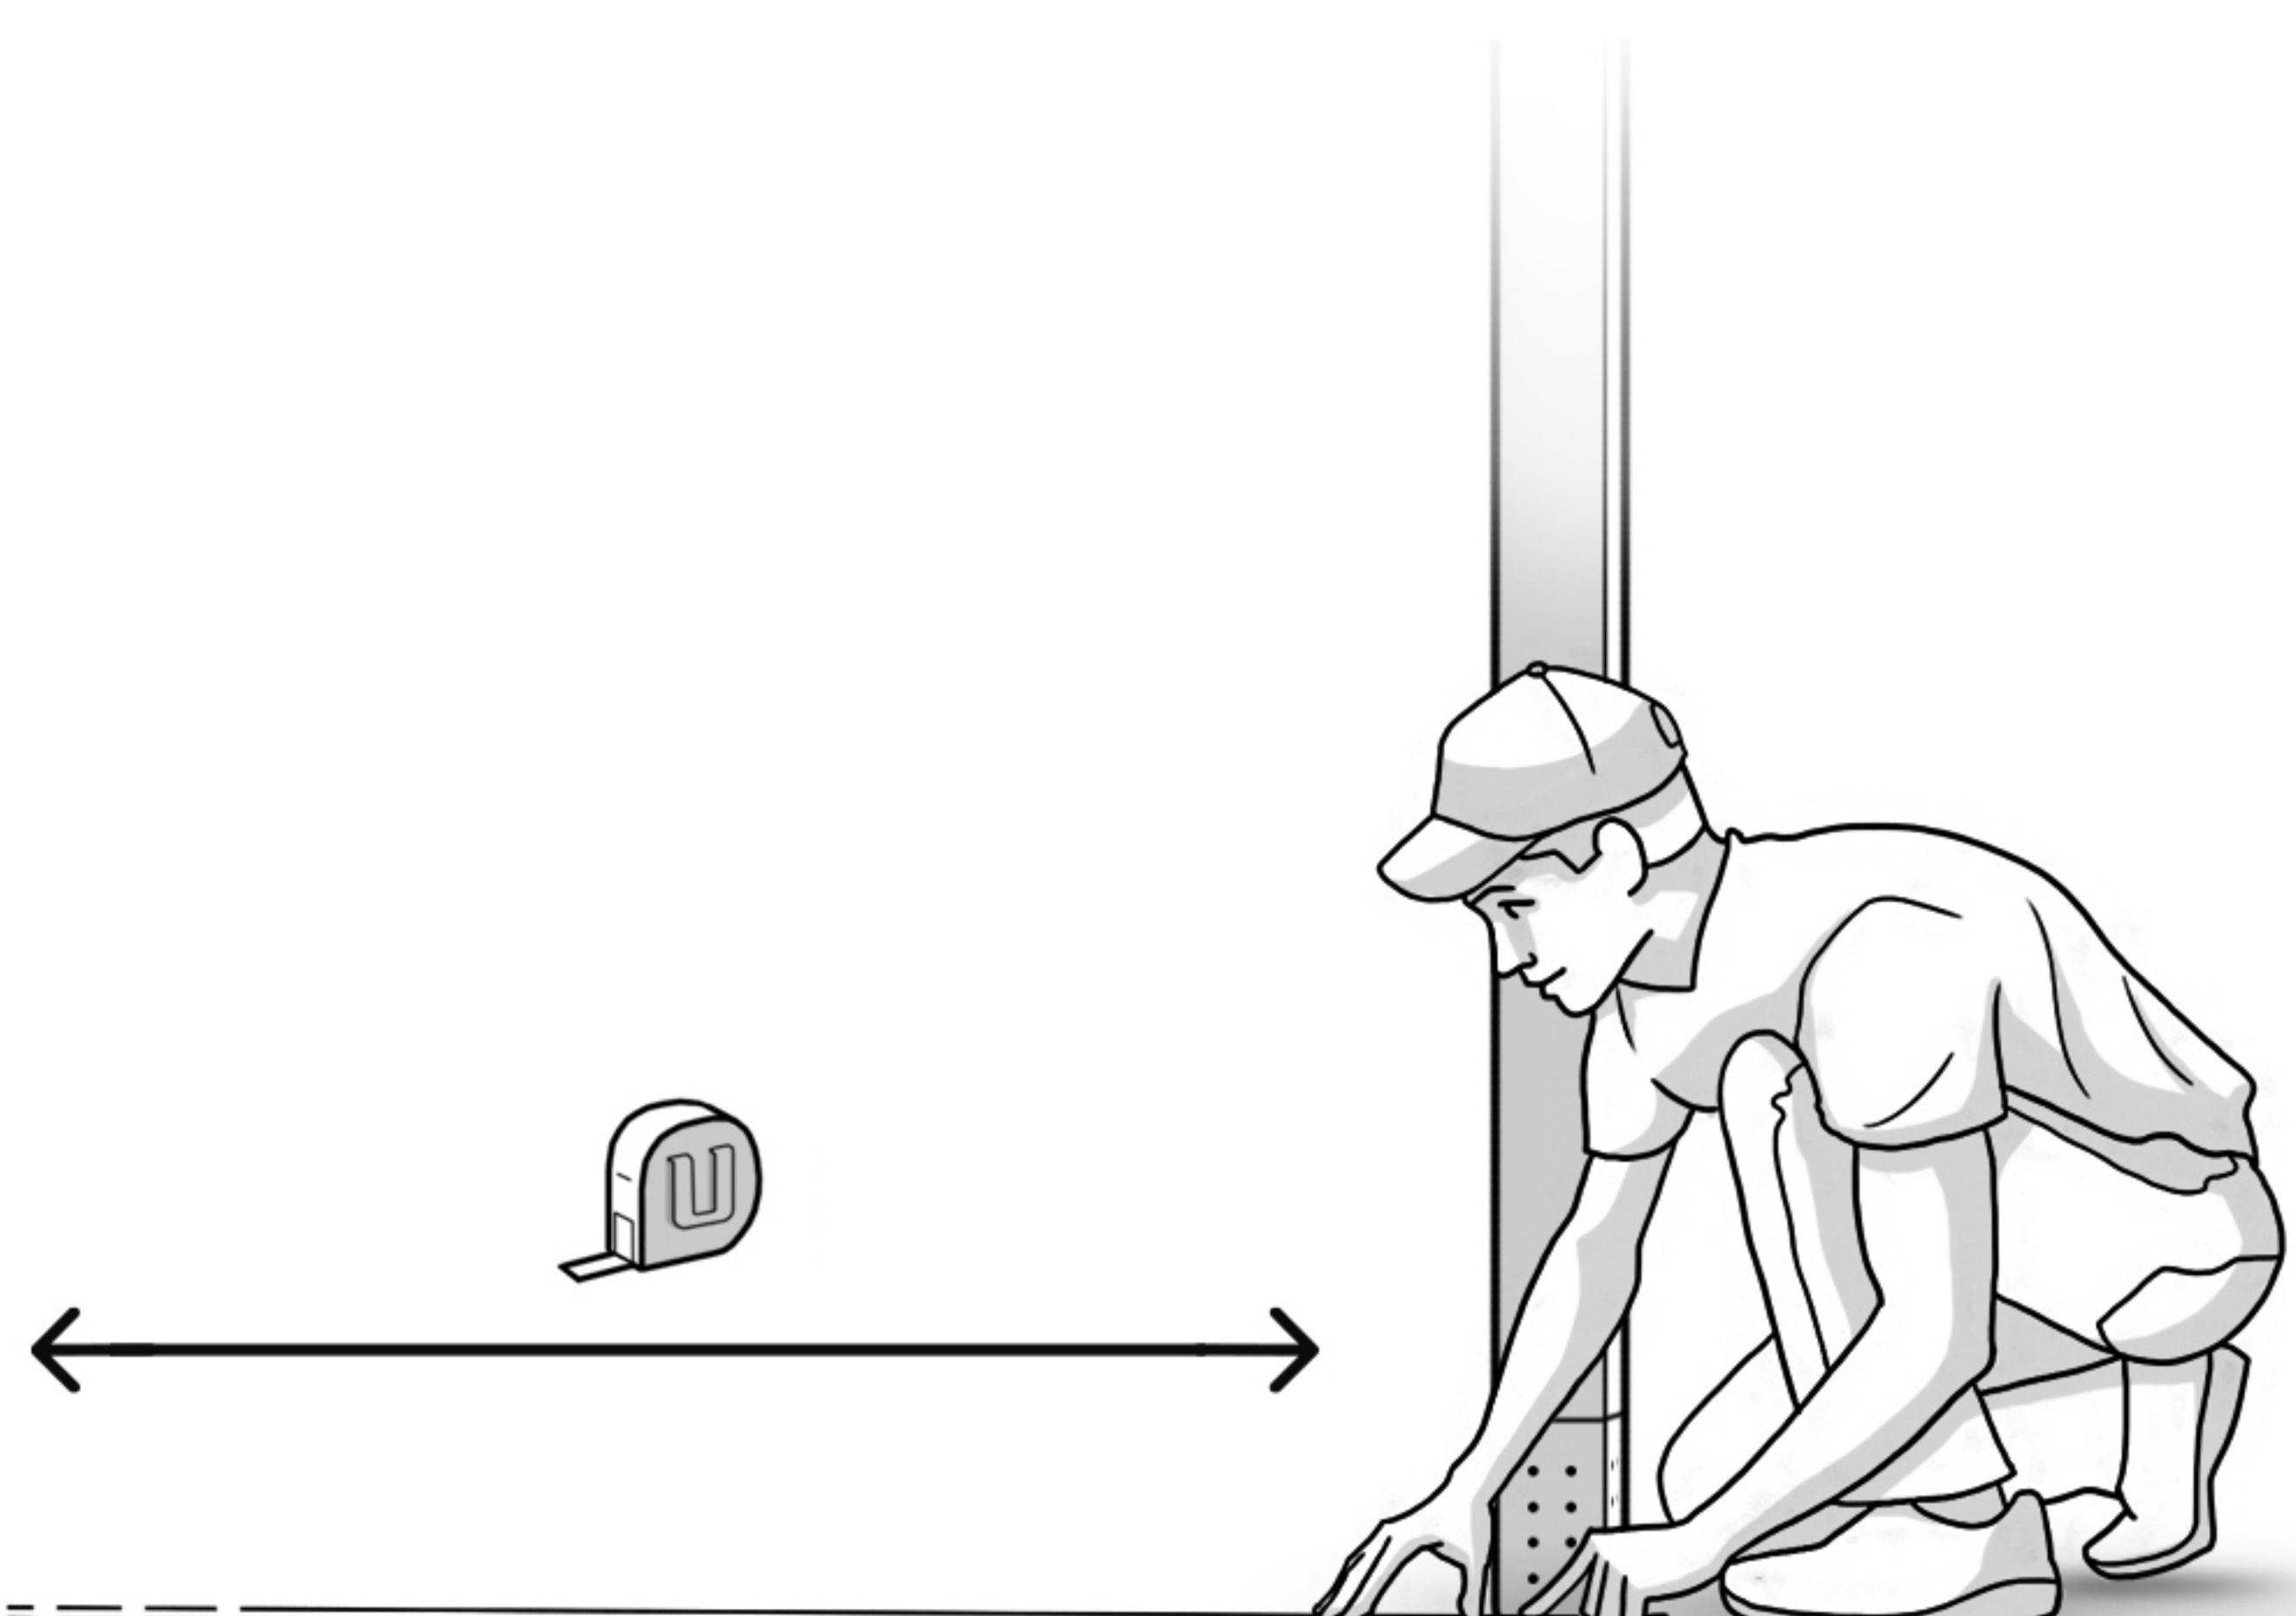

Slide each post into GRID SOLOS one at a time

**STEP 6.2****BUILDING THE BASE**

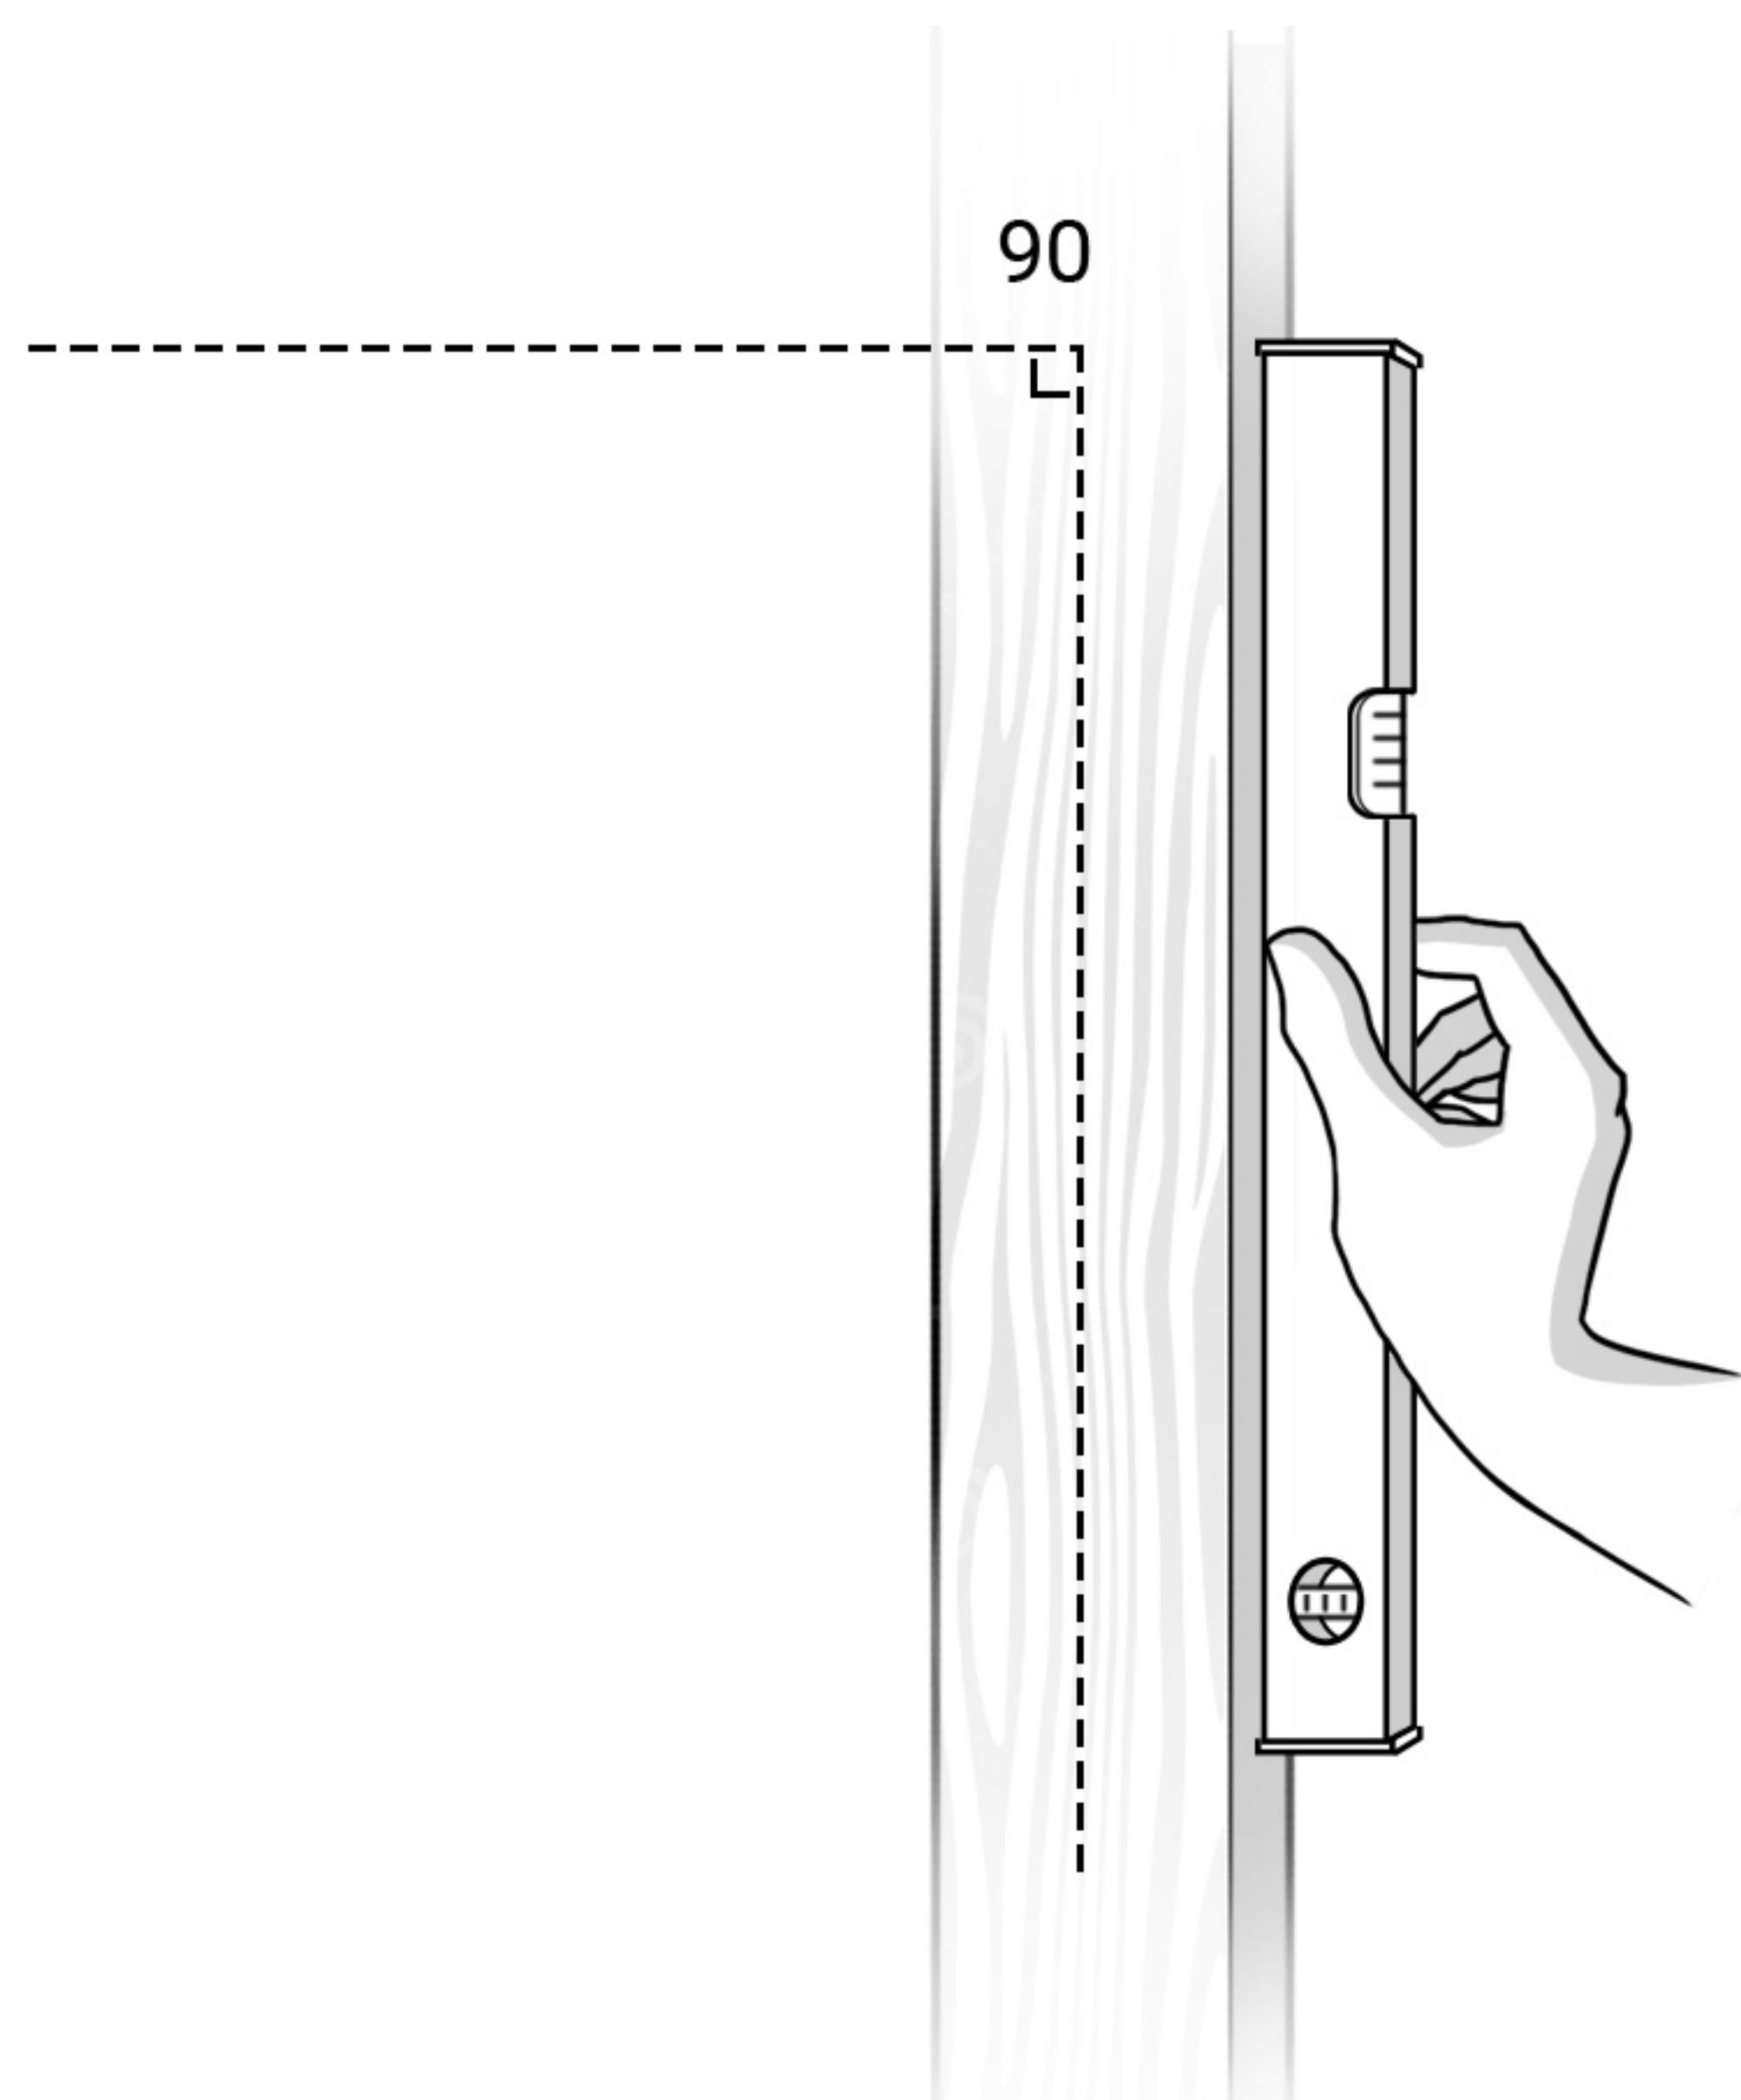

Secure (4 screws for each wood post)

**STEP 6.3****BUILDING THE BASE**

Align the posts

**STEP 6.4****BUILDING THE BASE**

Level all posts

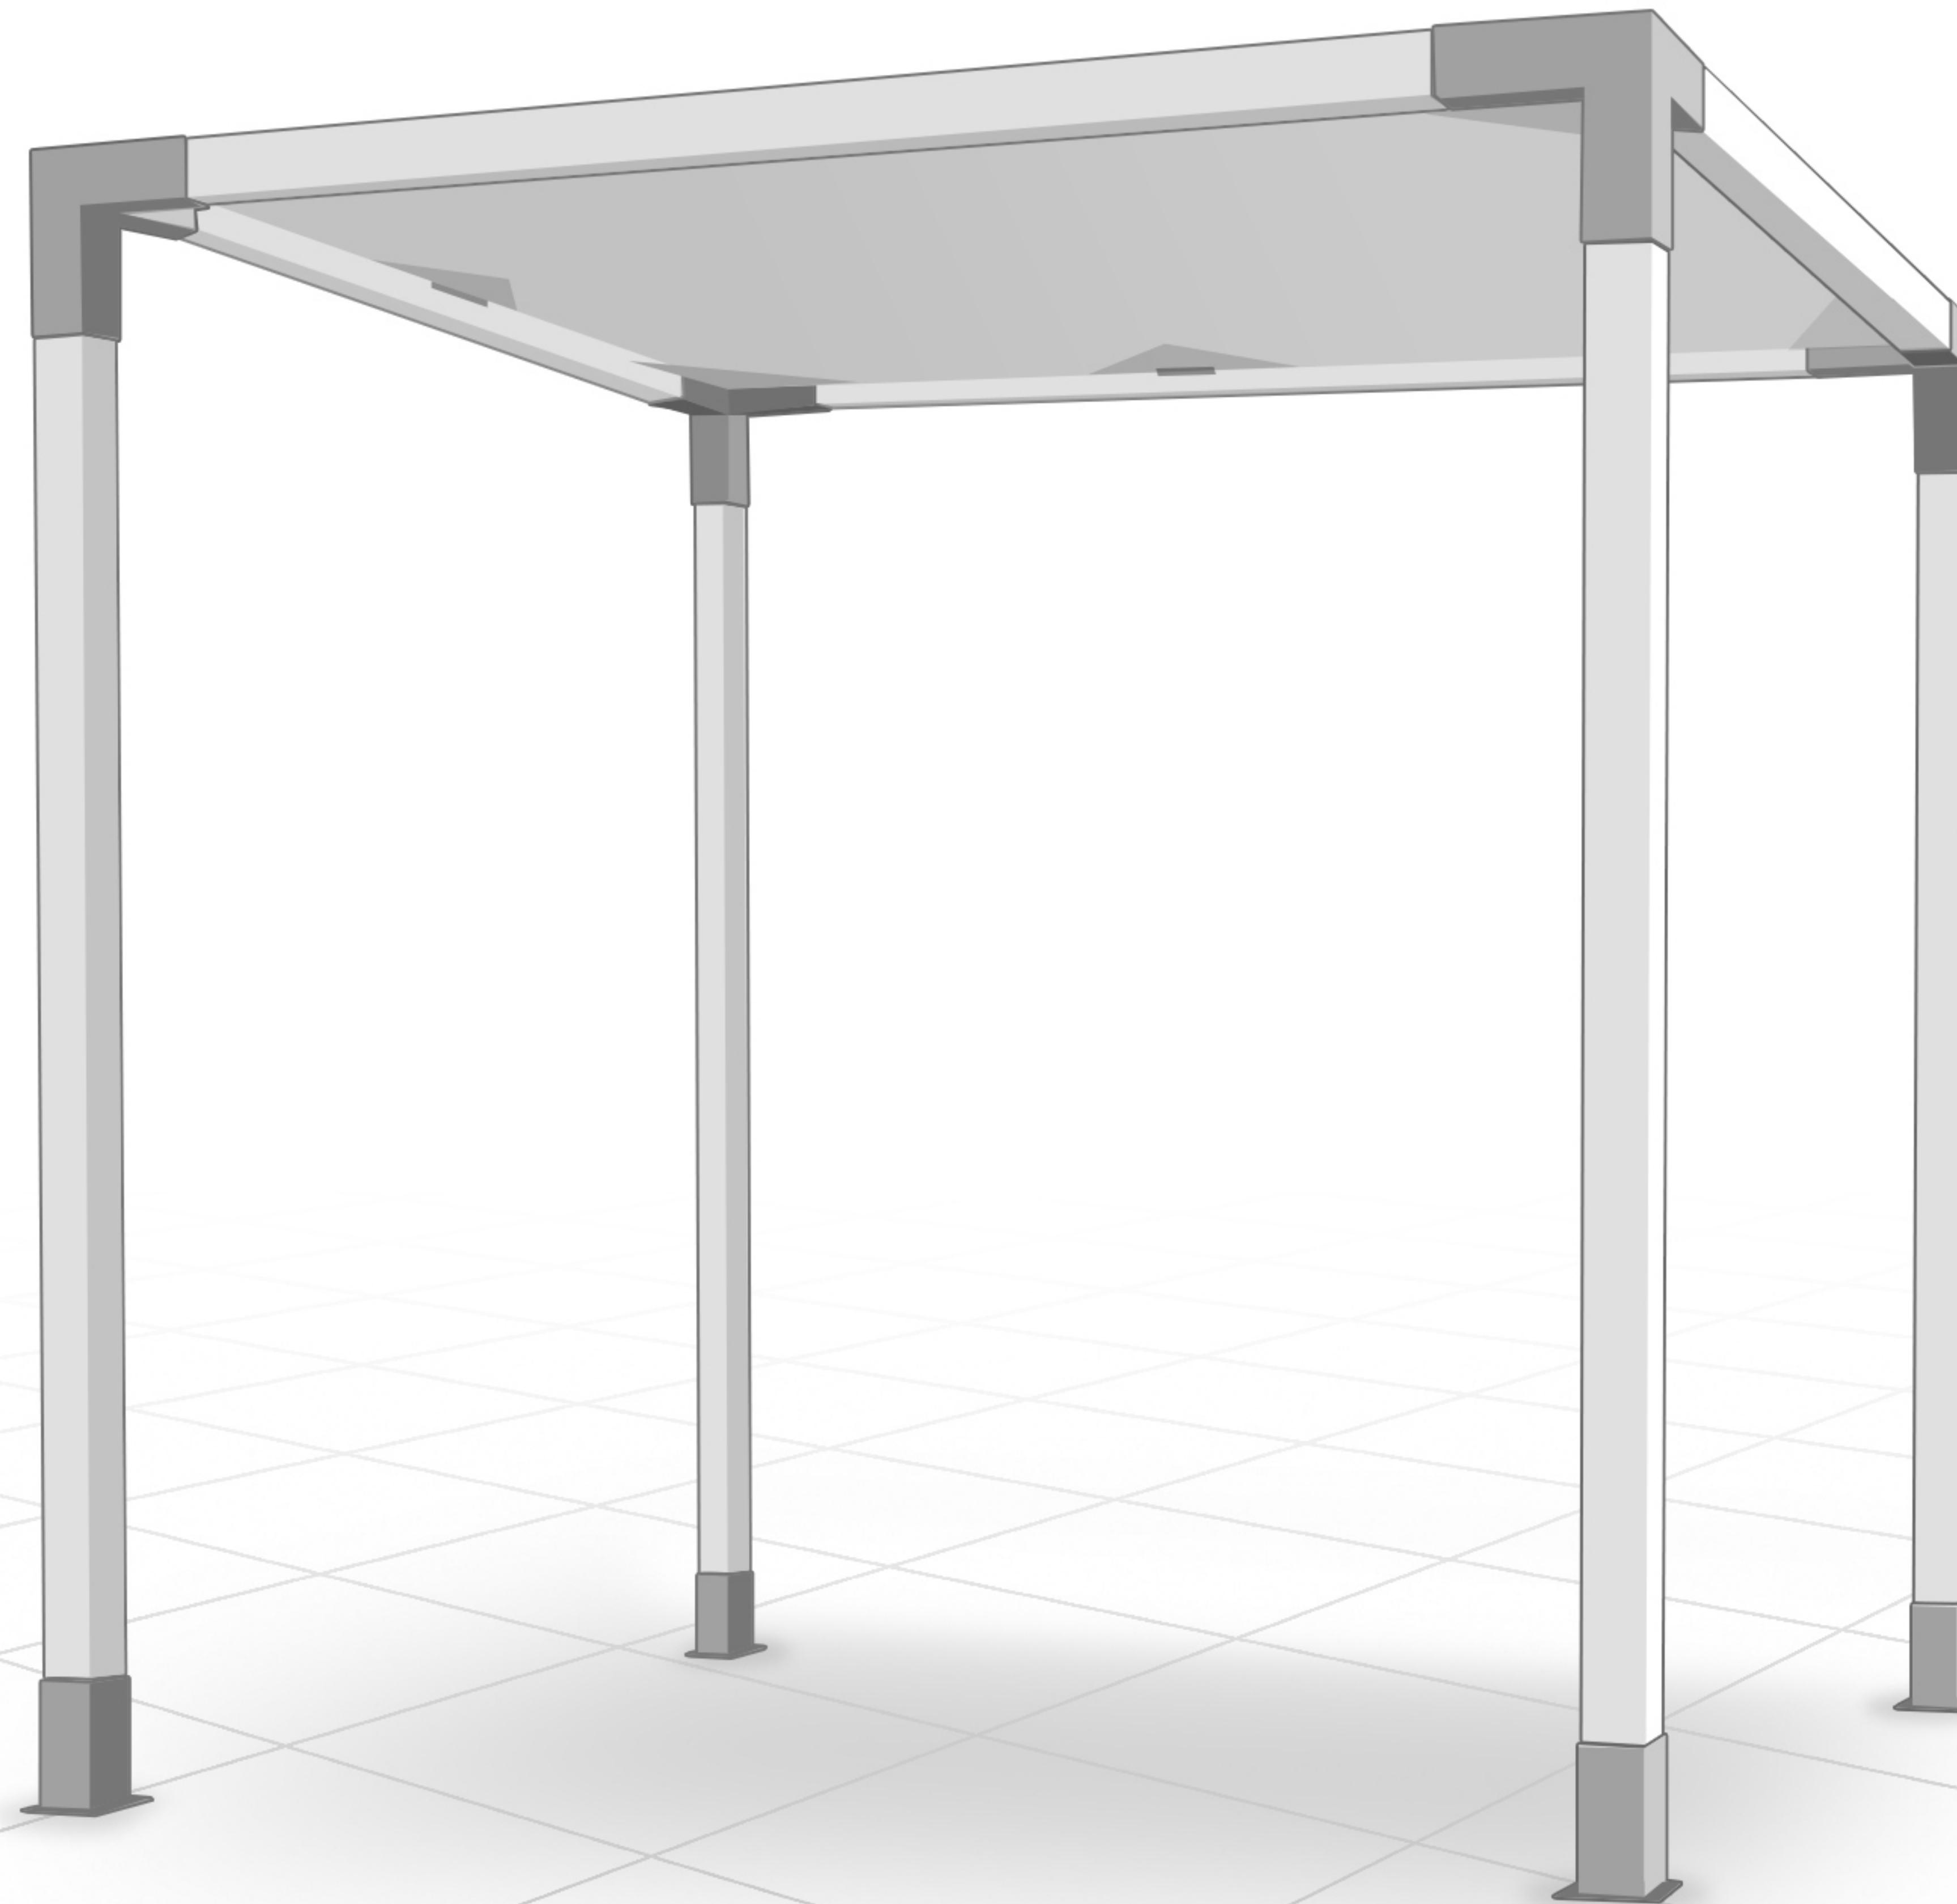

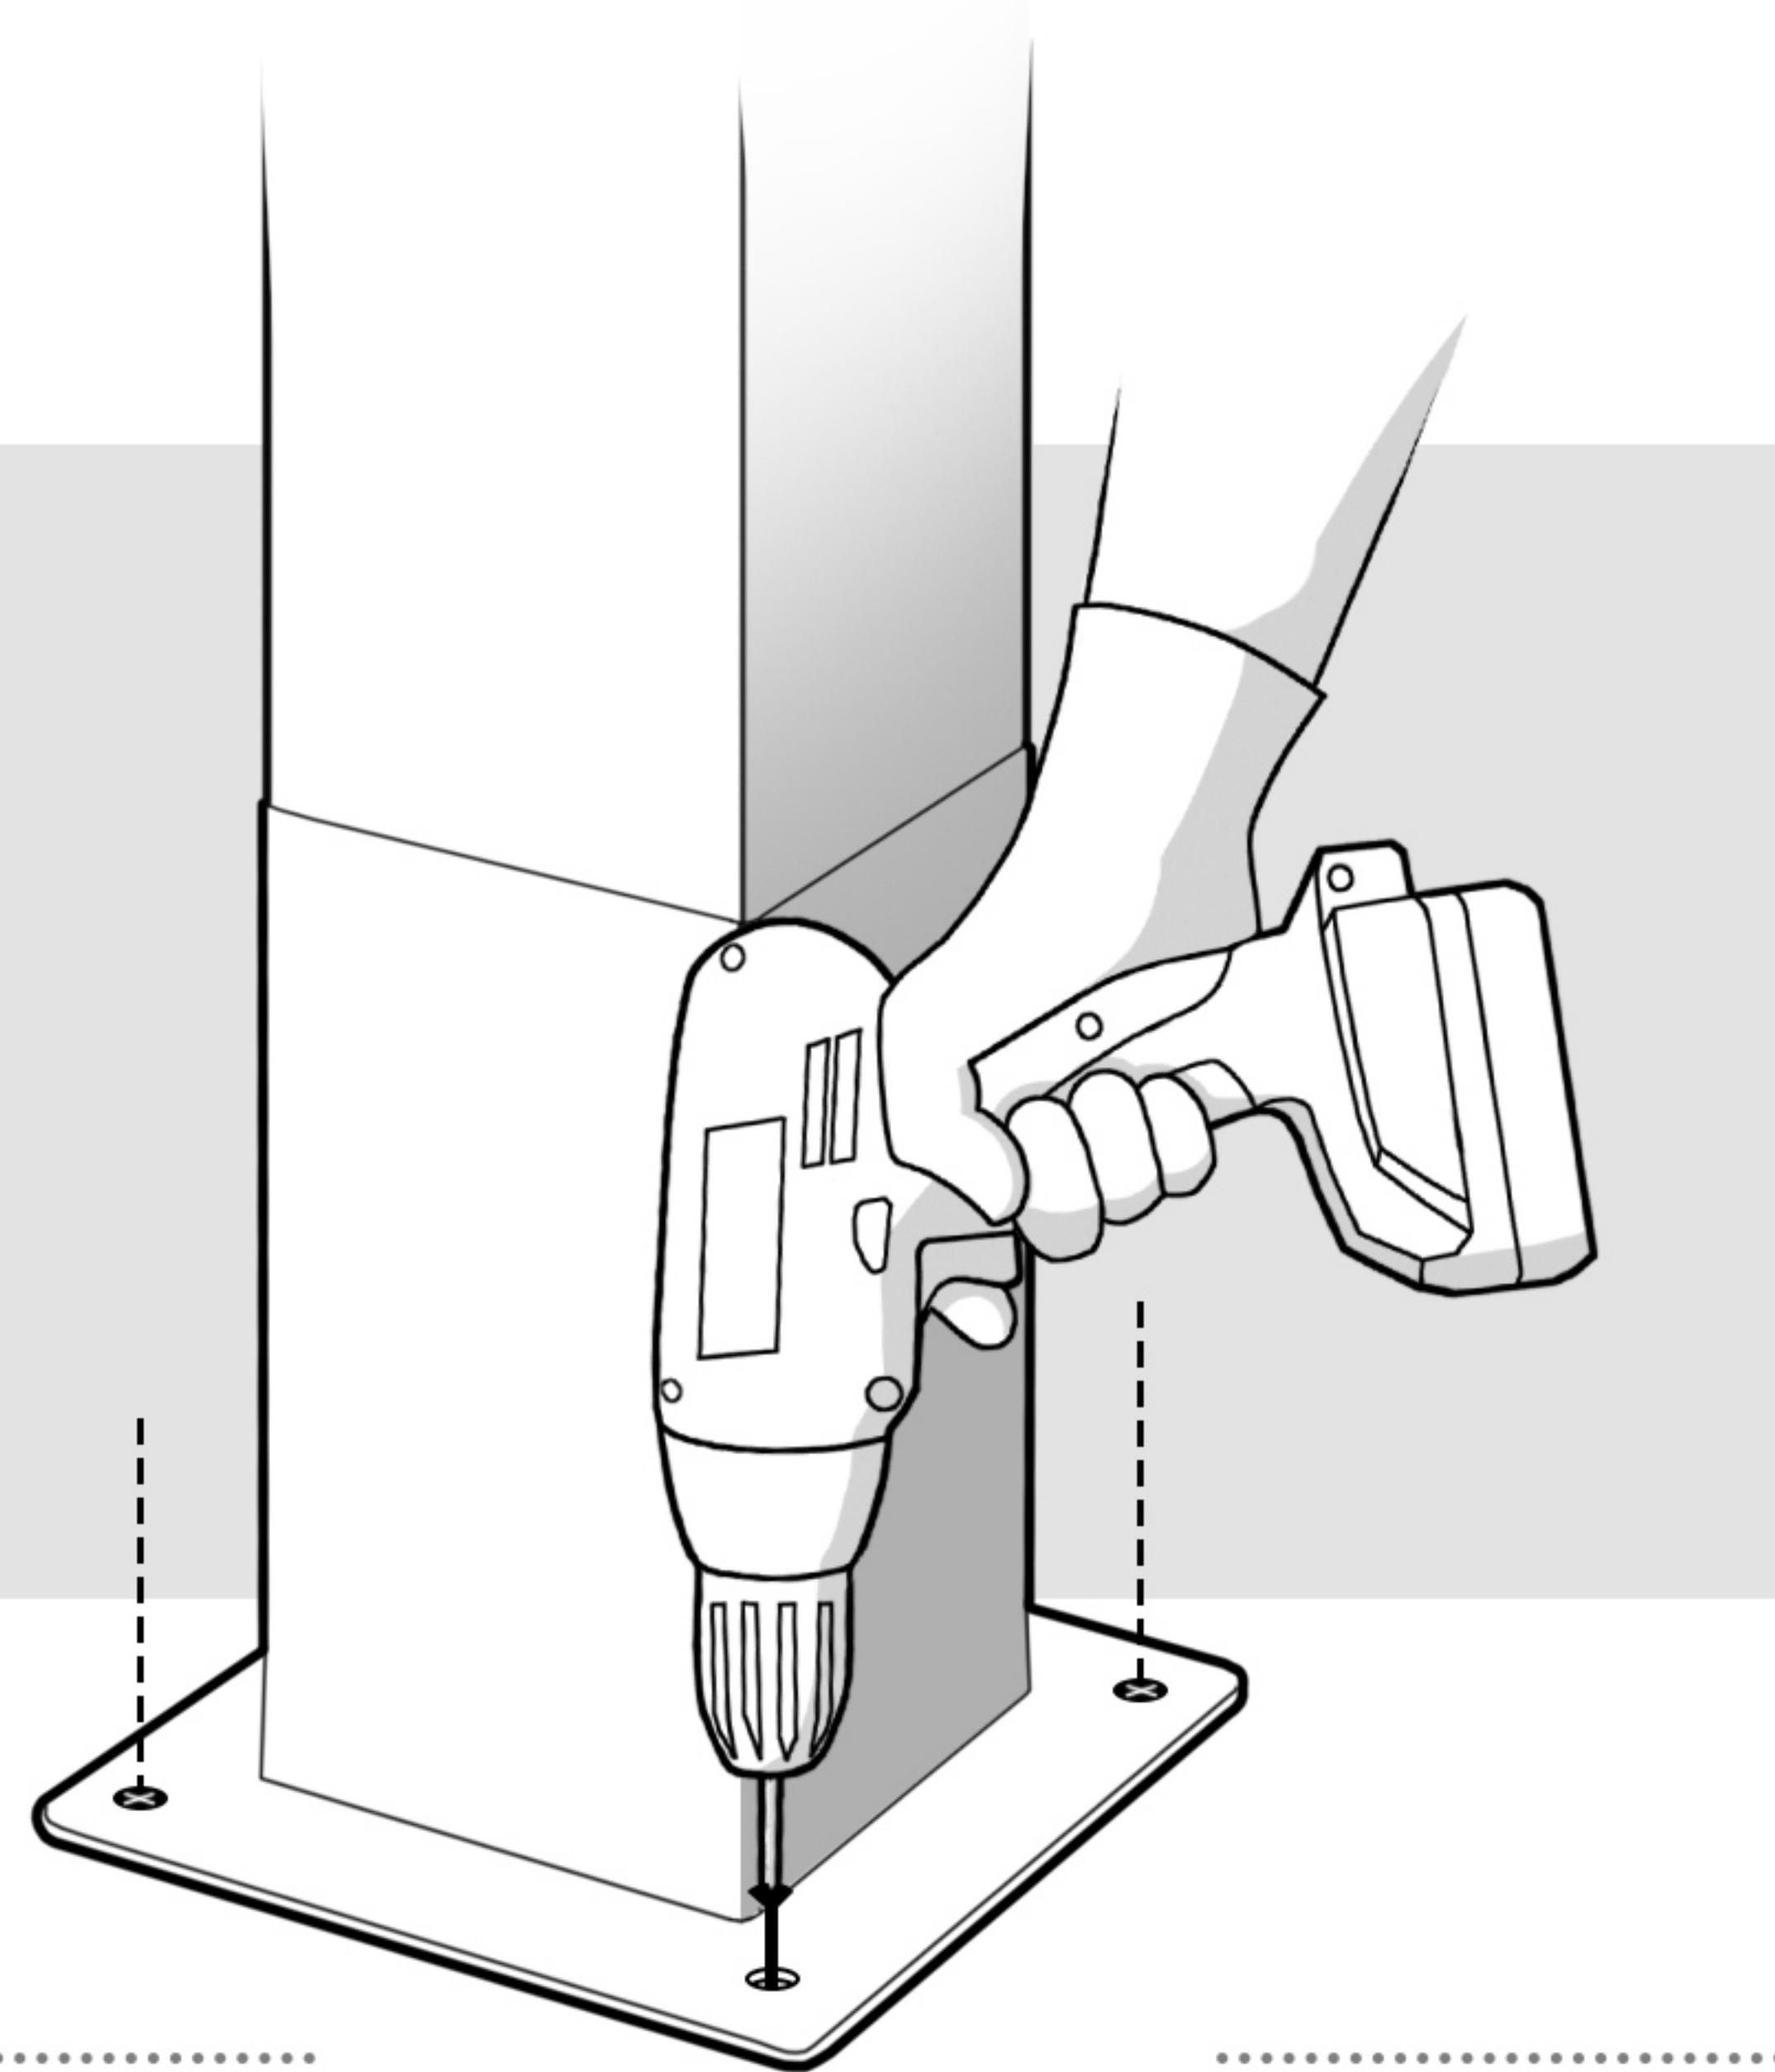

STEP 7**ANCHORING**

Anchoring hardware not included

**IMPORTANT**

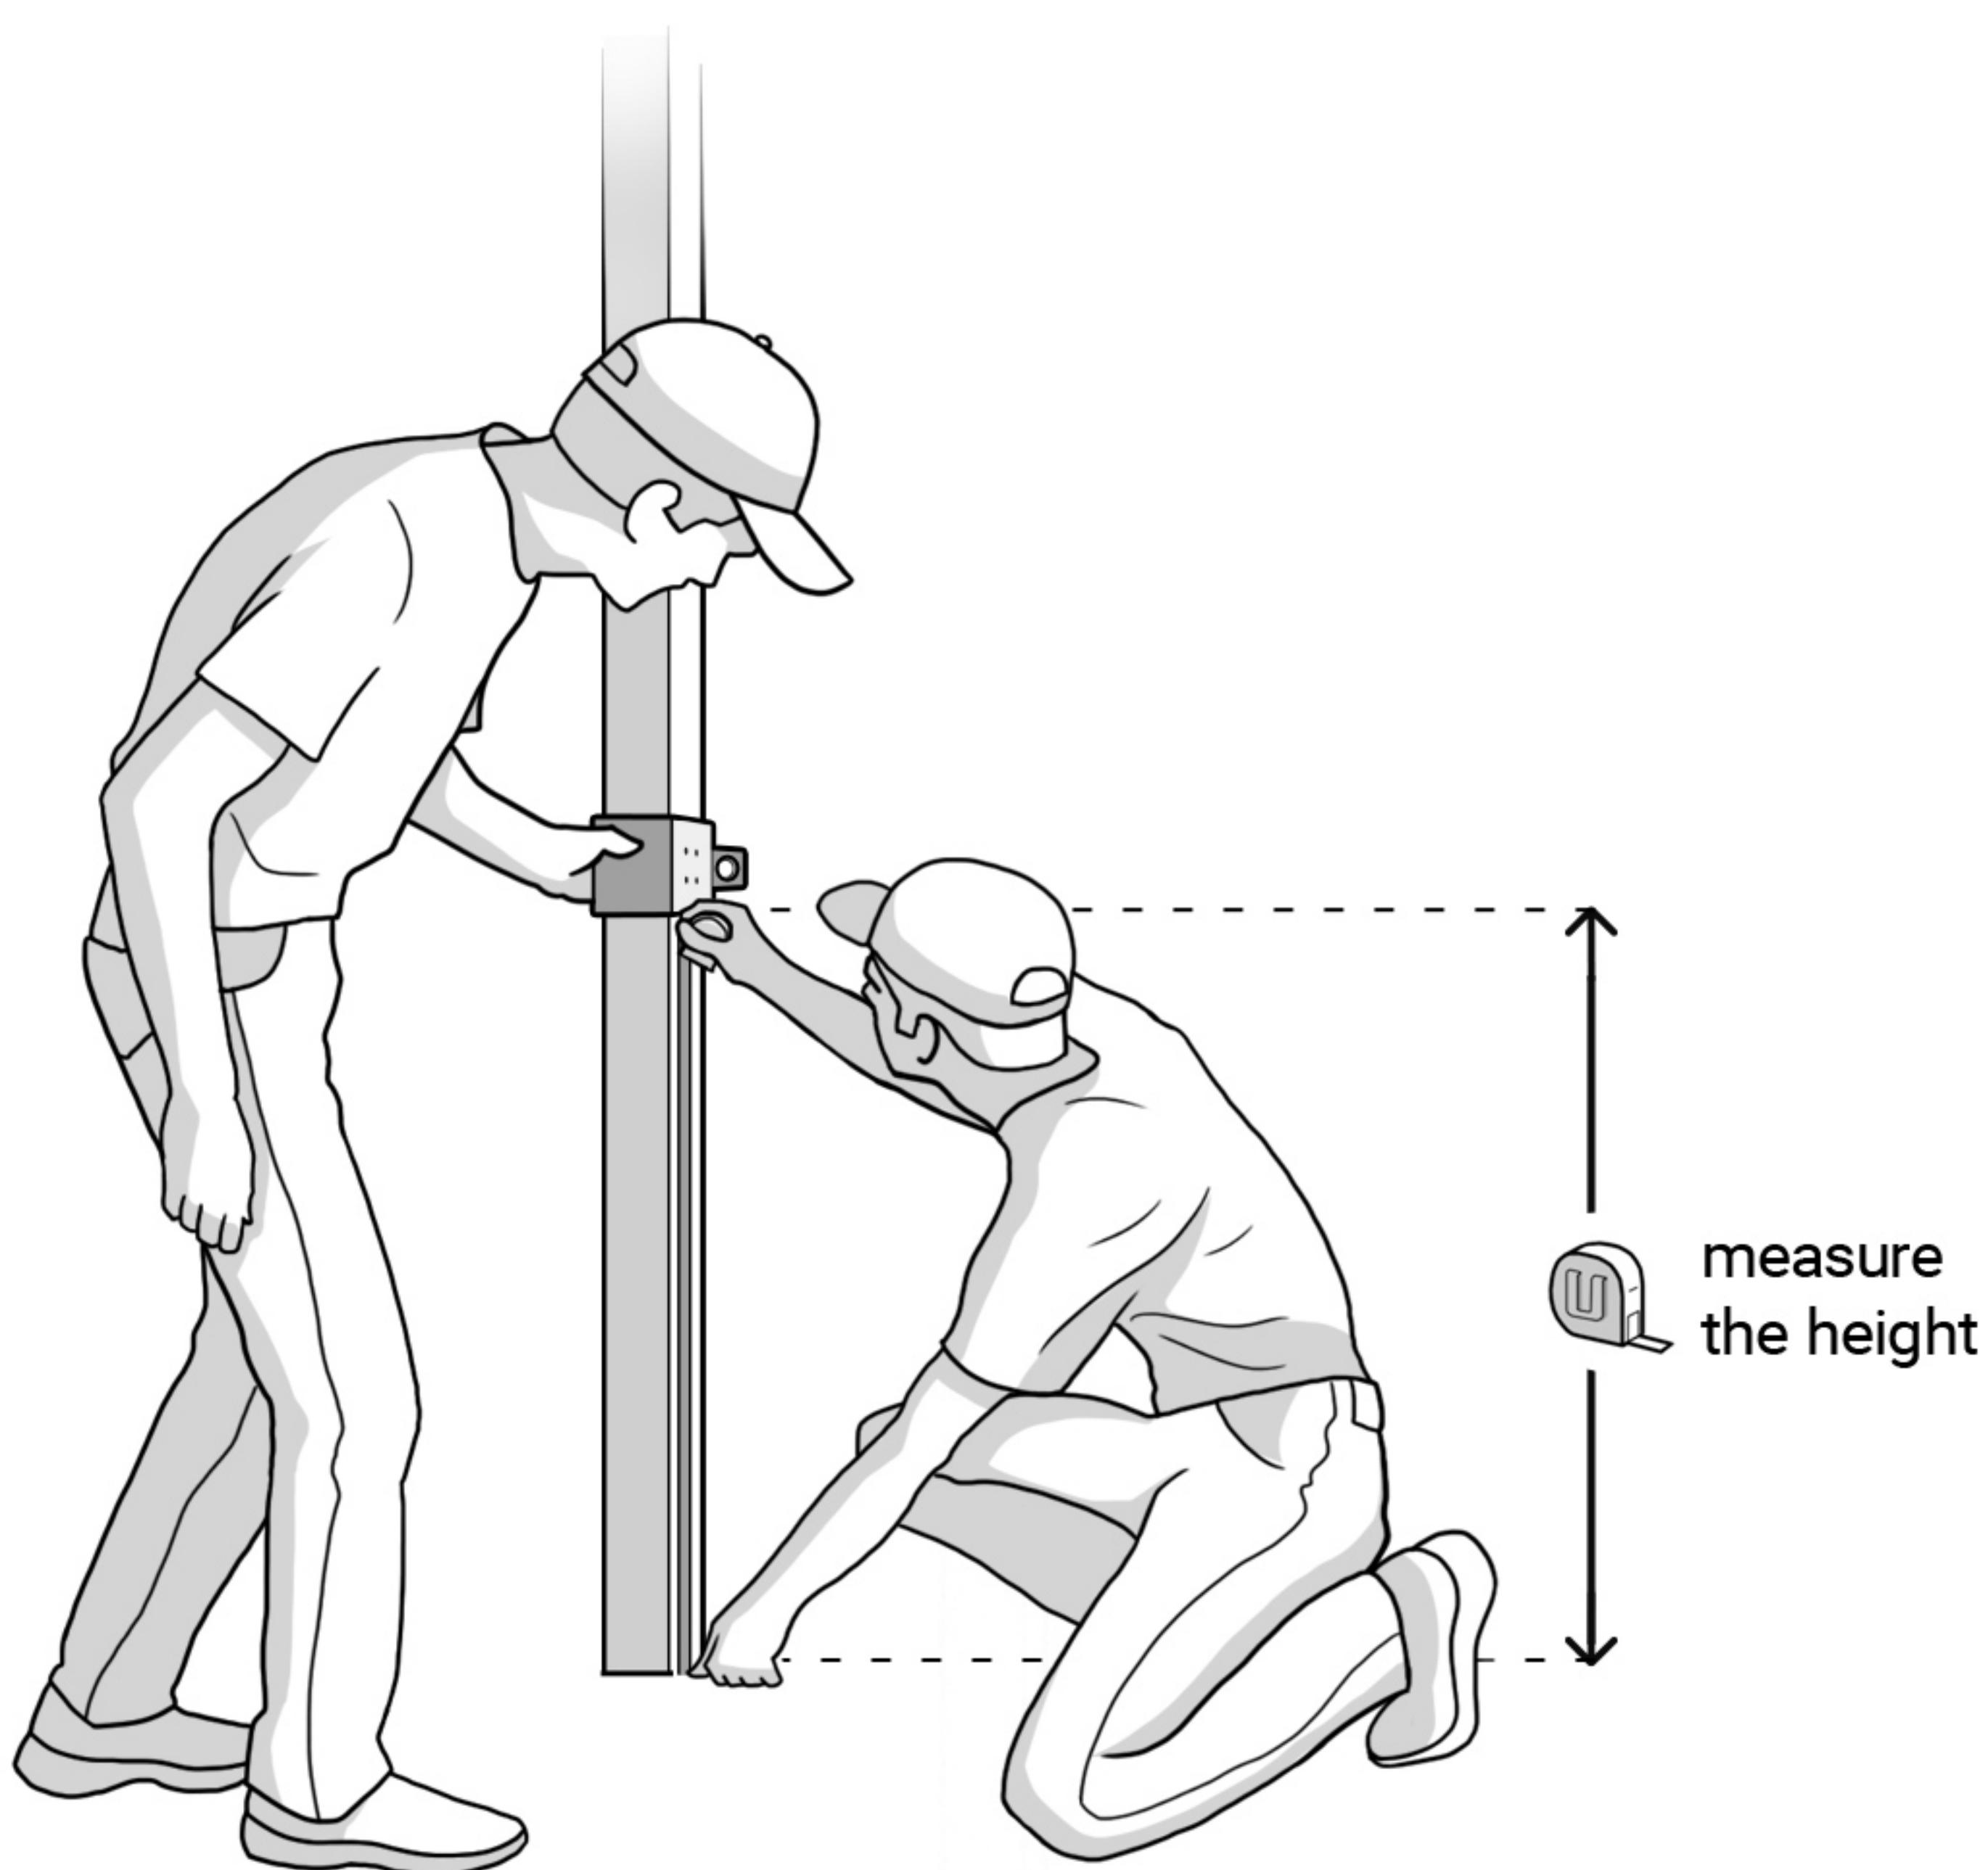

After you've measured and leveled
be sure to anchor all GRID SOLO's

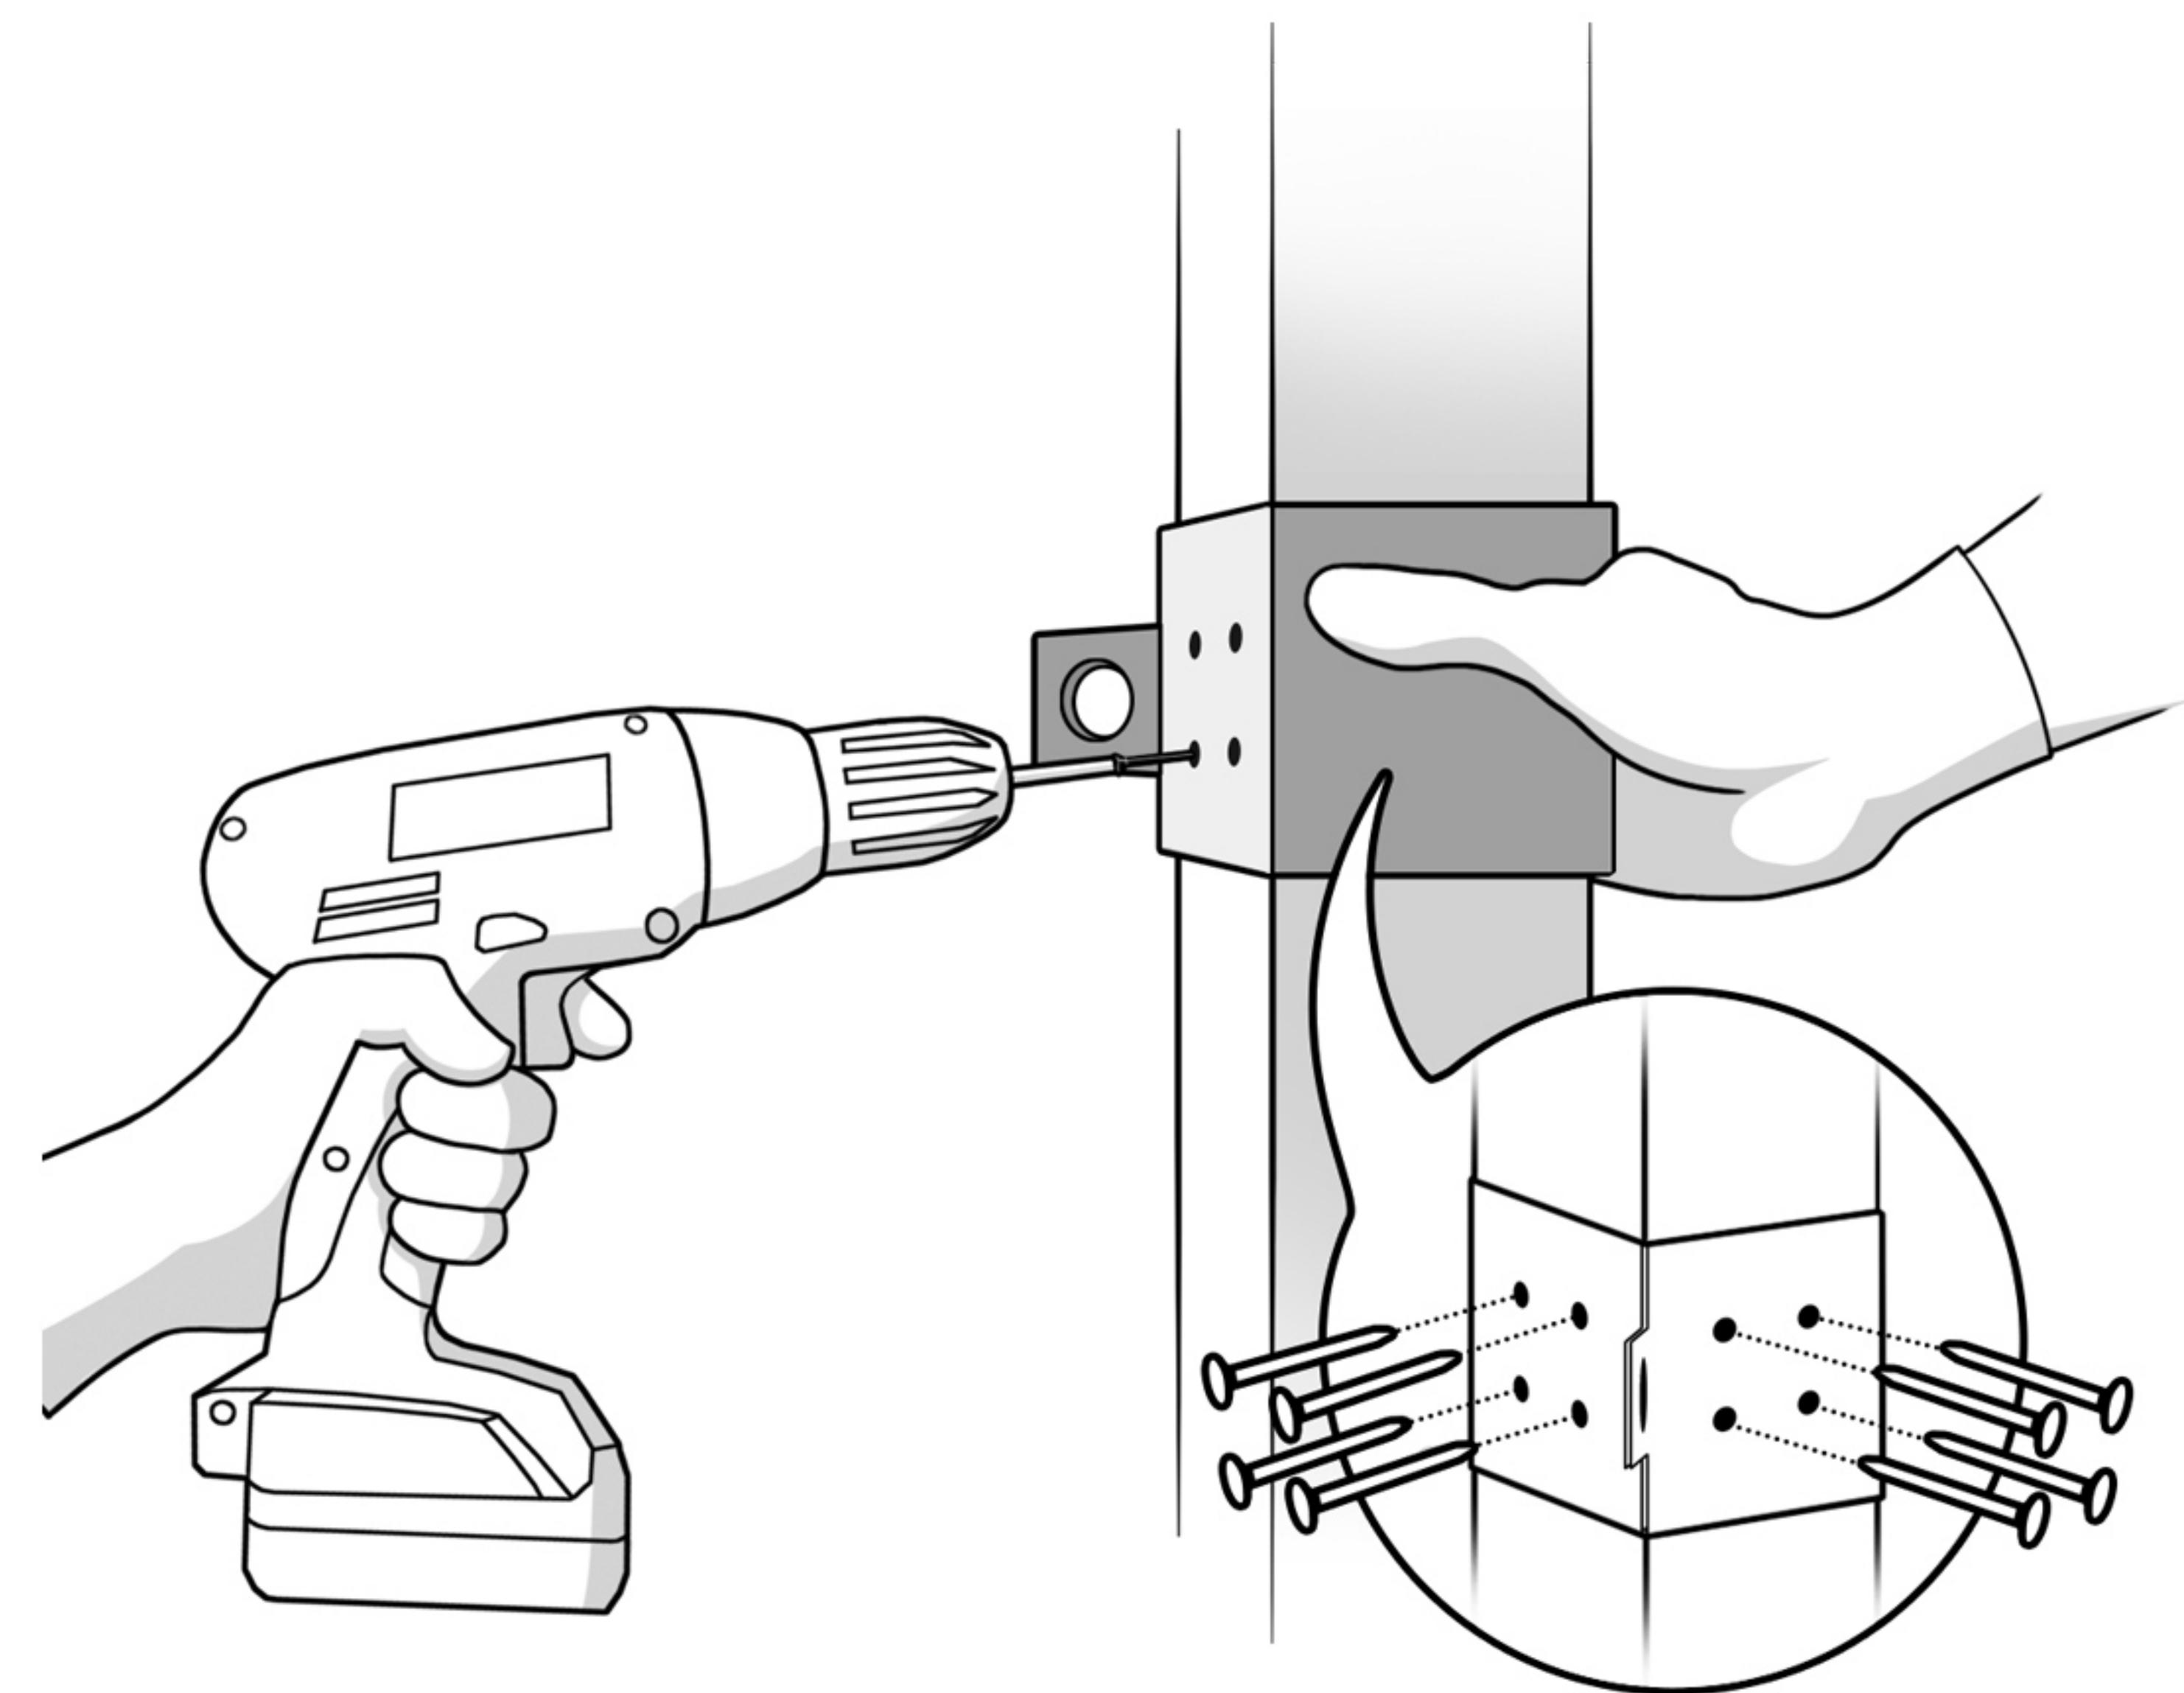

ENJOY!

STEP 8.1**GRID HANGERS**

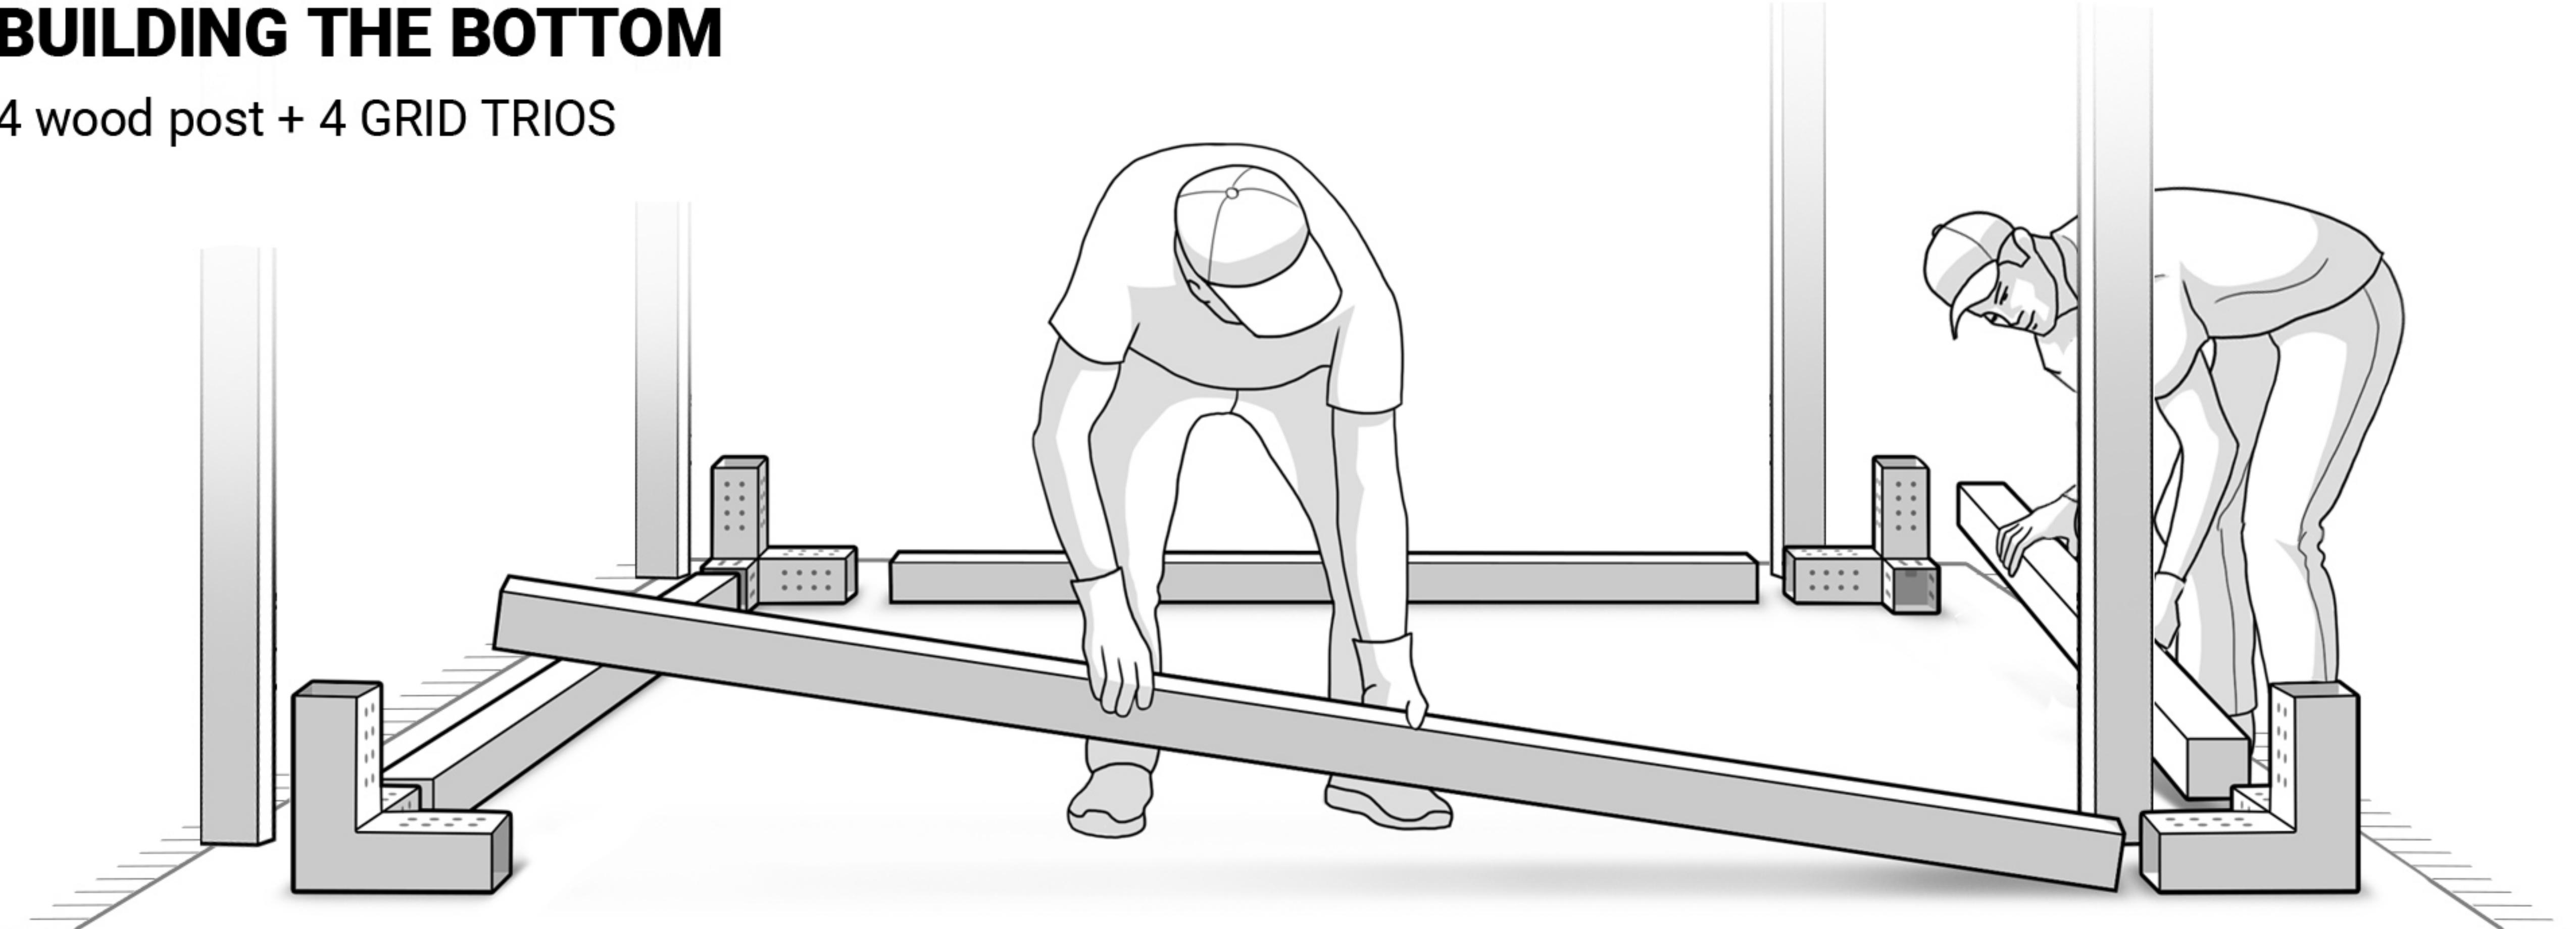

Ensure each hanger is at the same height

**STEP 8.2****GRID HANGERS**

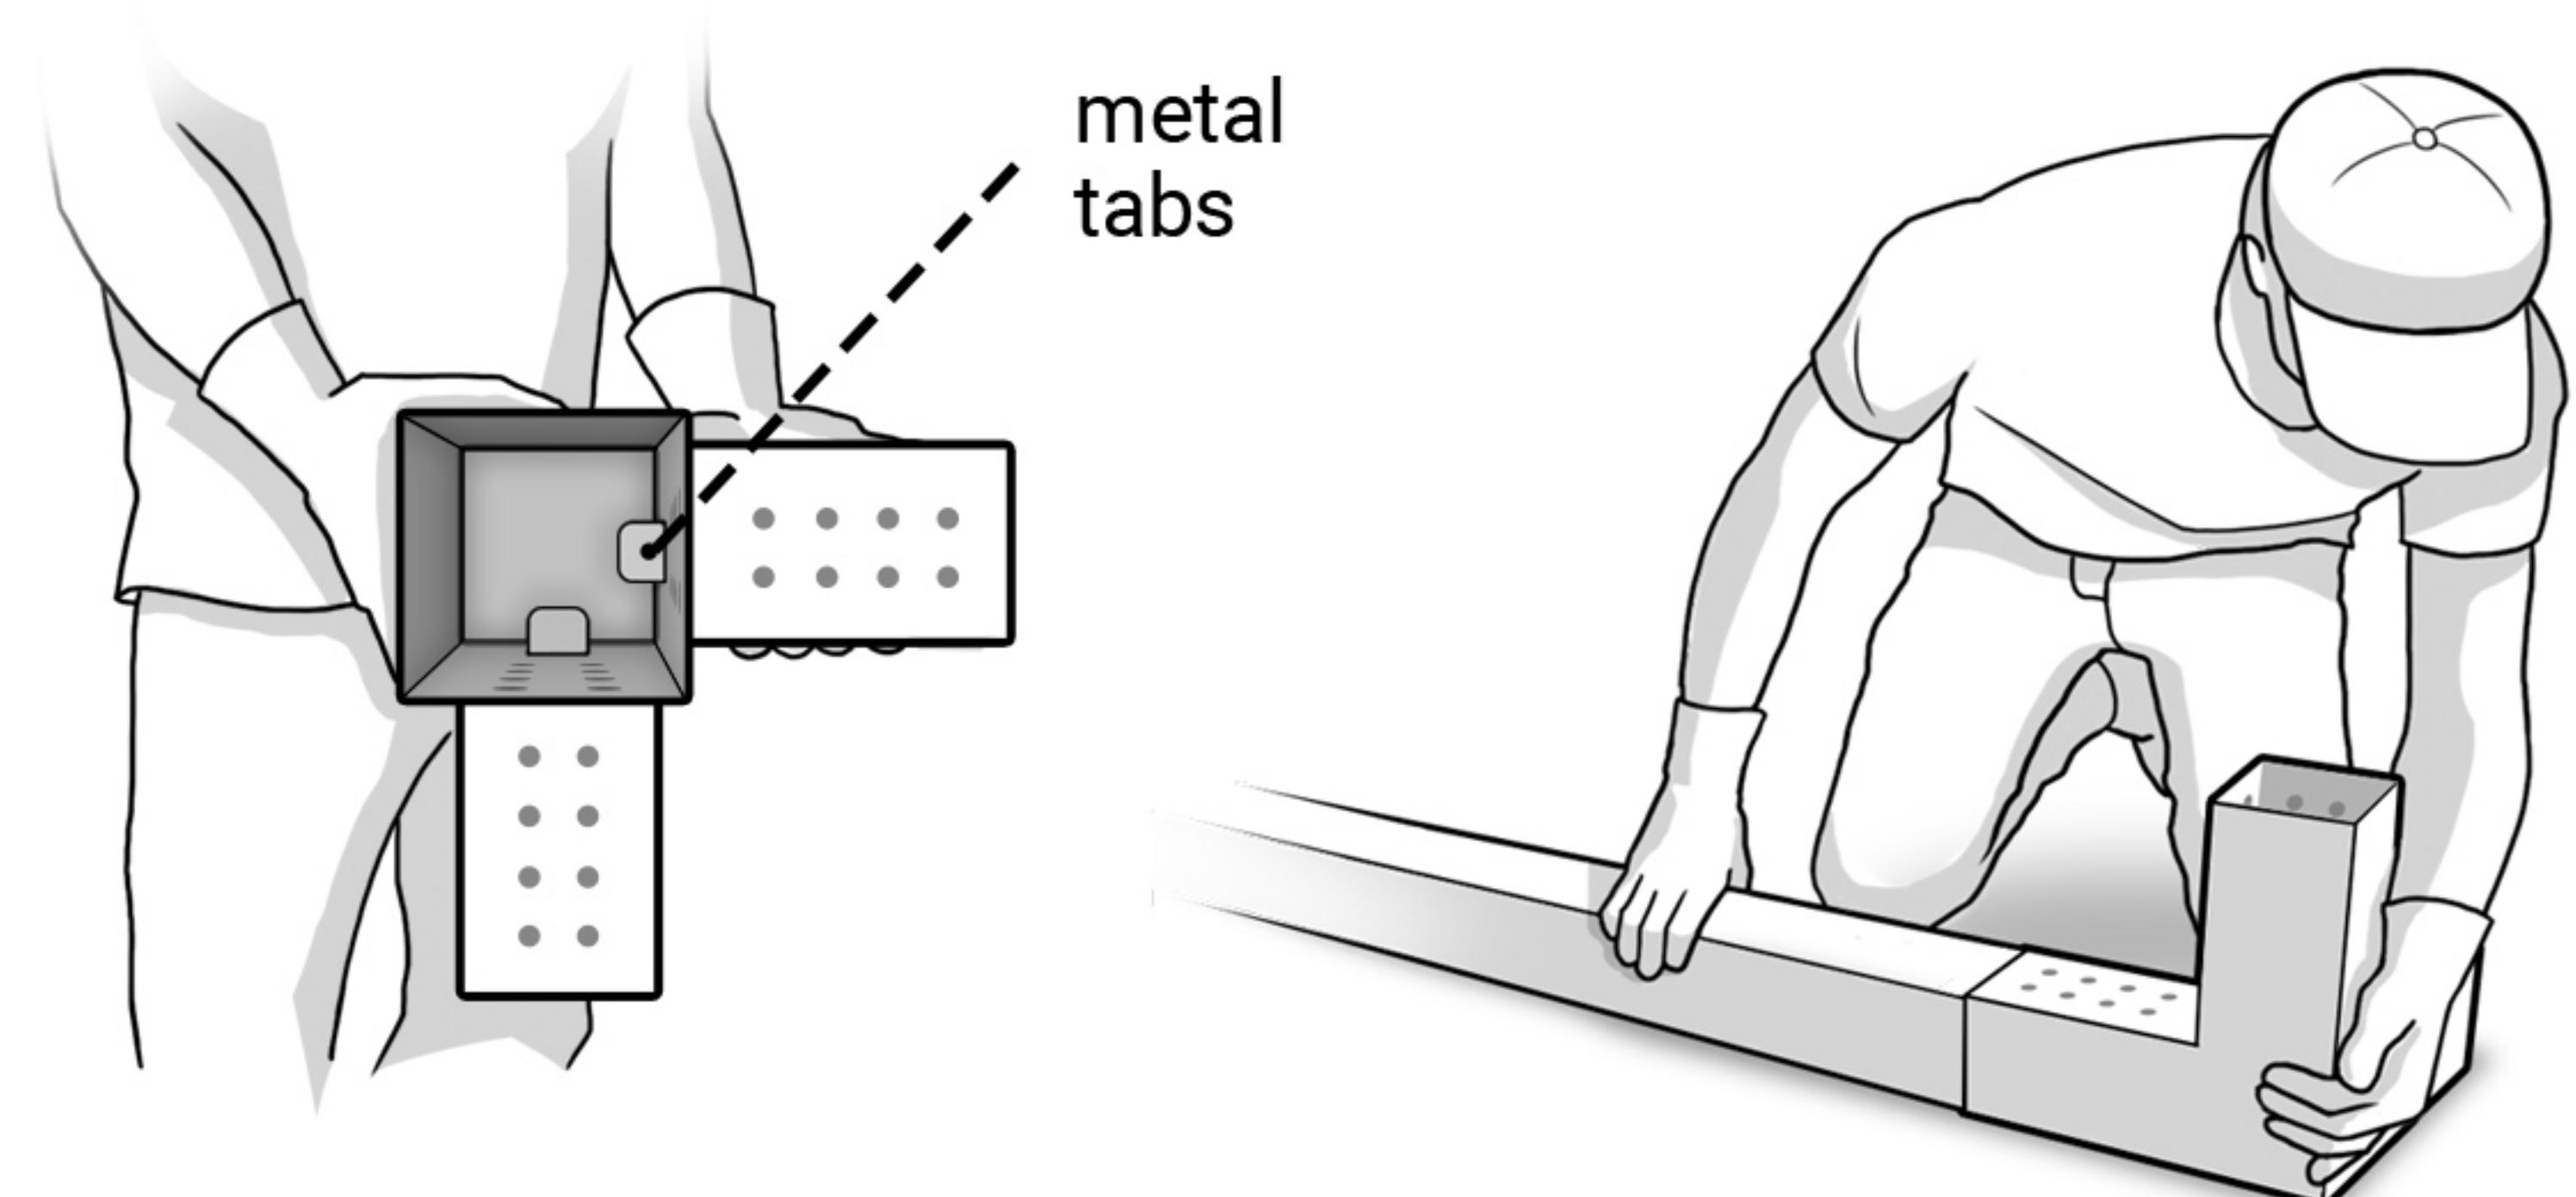

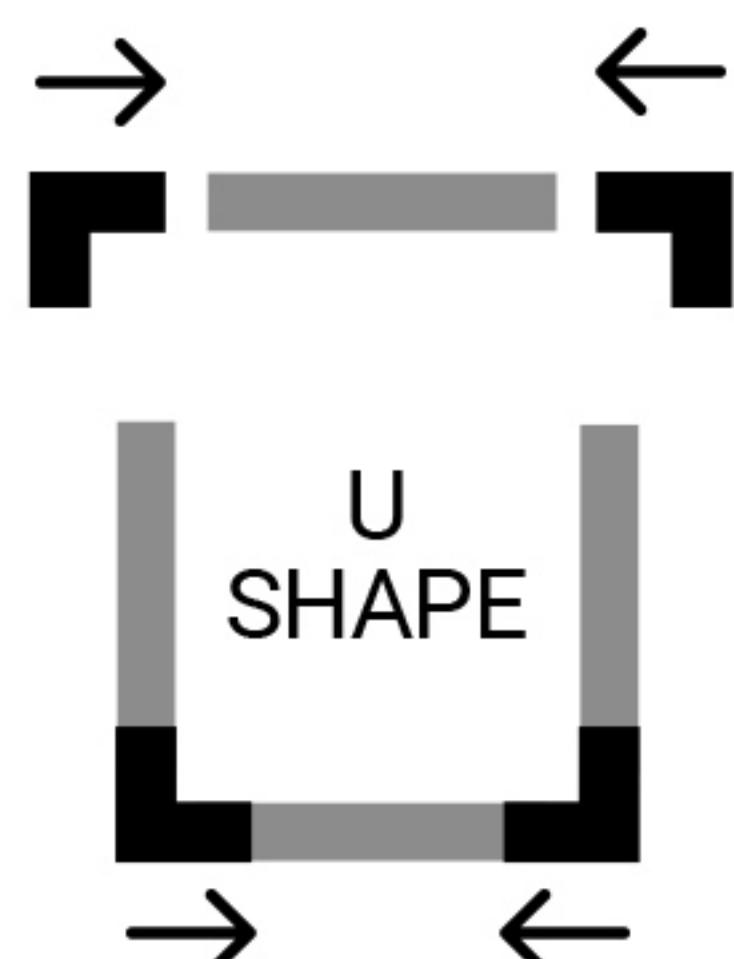

Secure (8 screws per GRID HANGER)

**STEP 9.1****BUILDING THE BOTTOM**

4 wood post + 4 GRID TRIOS

**STEP 9.2****BUILDING THE BOTTOM**

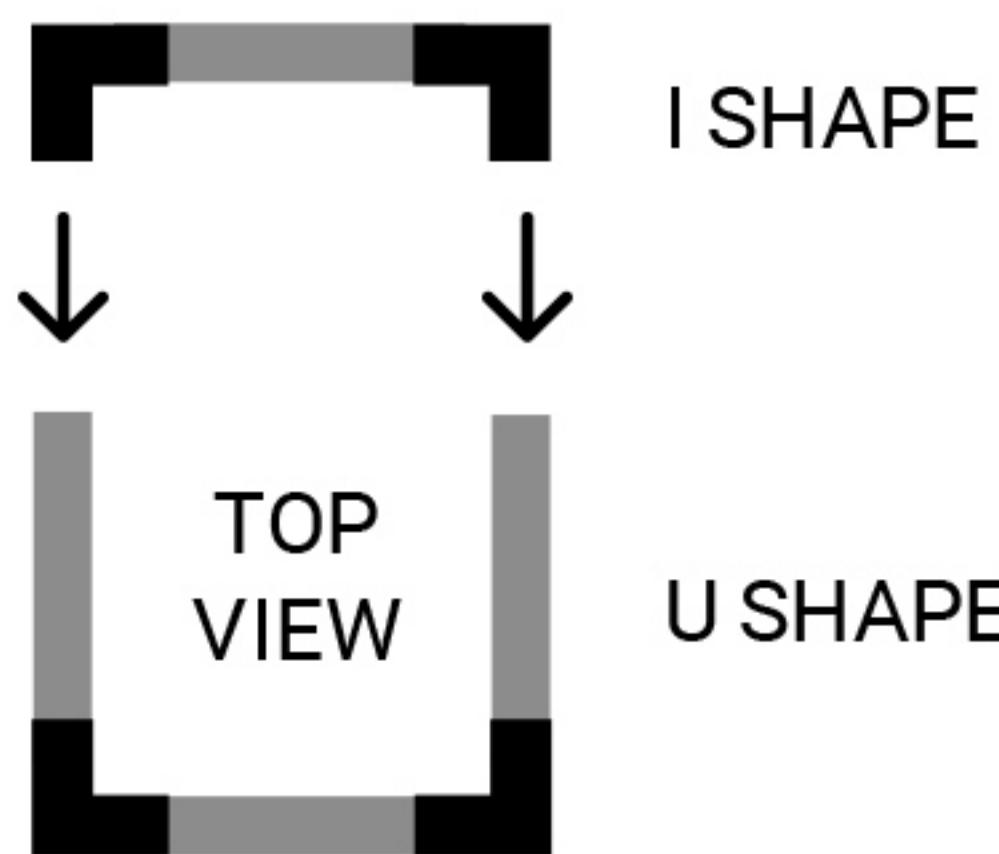

Wood should rest against metal tabs

STEP 9.3

BUILDING THE BOTTOM

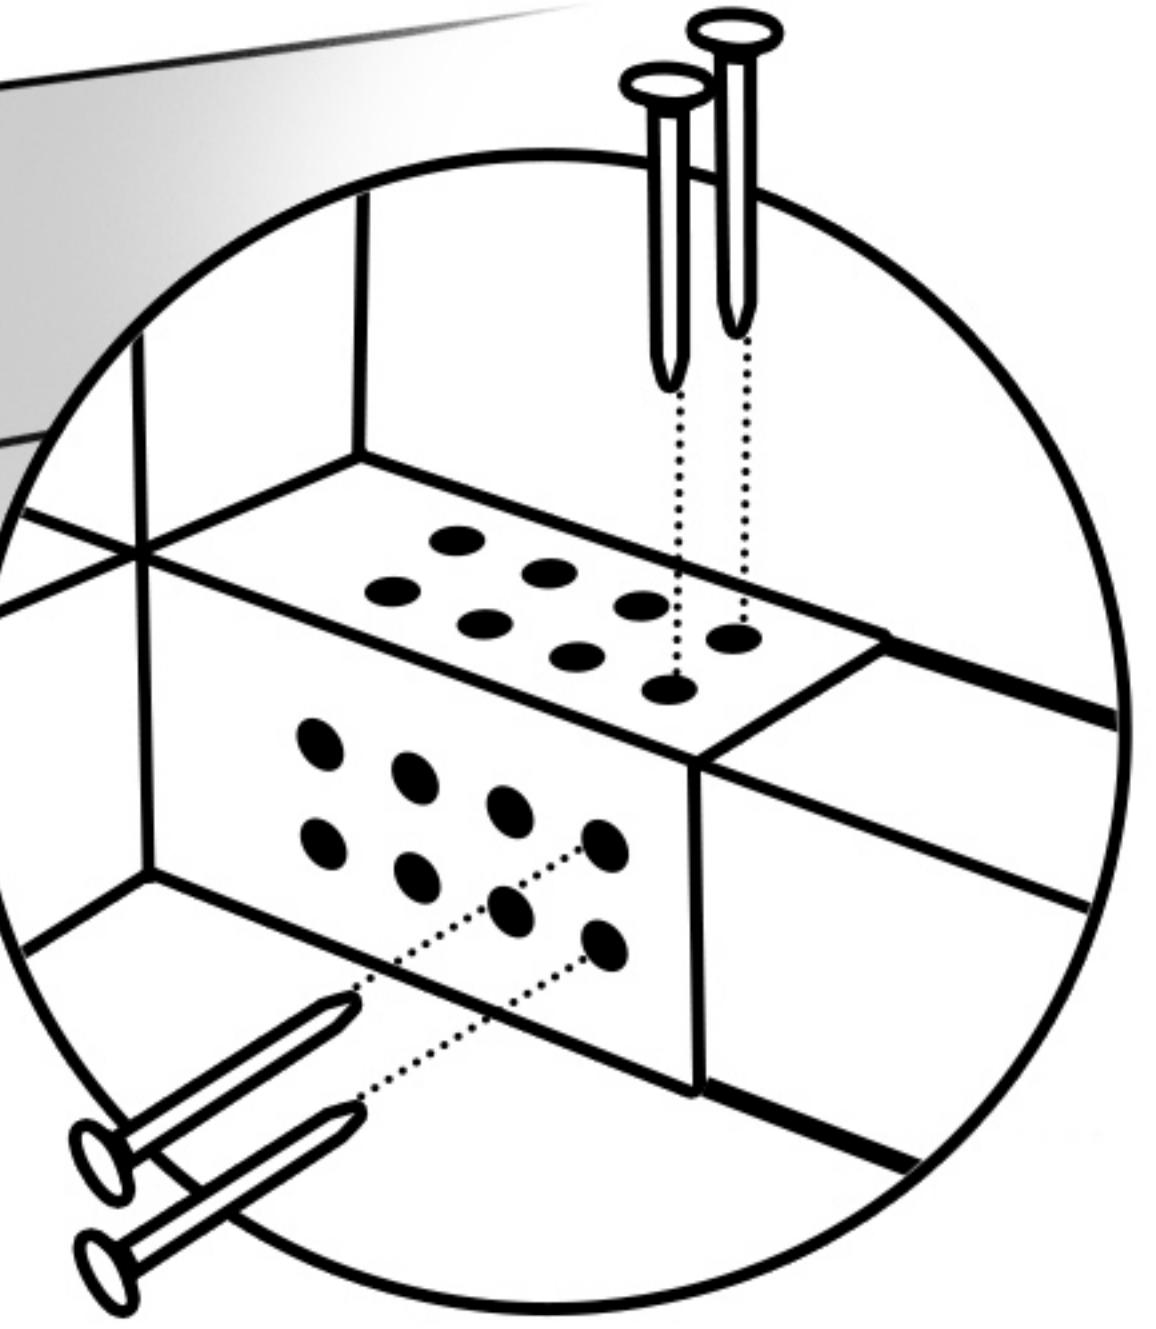

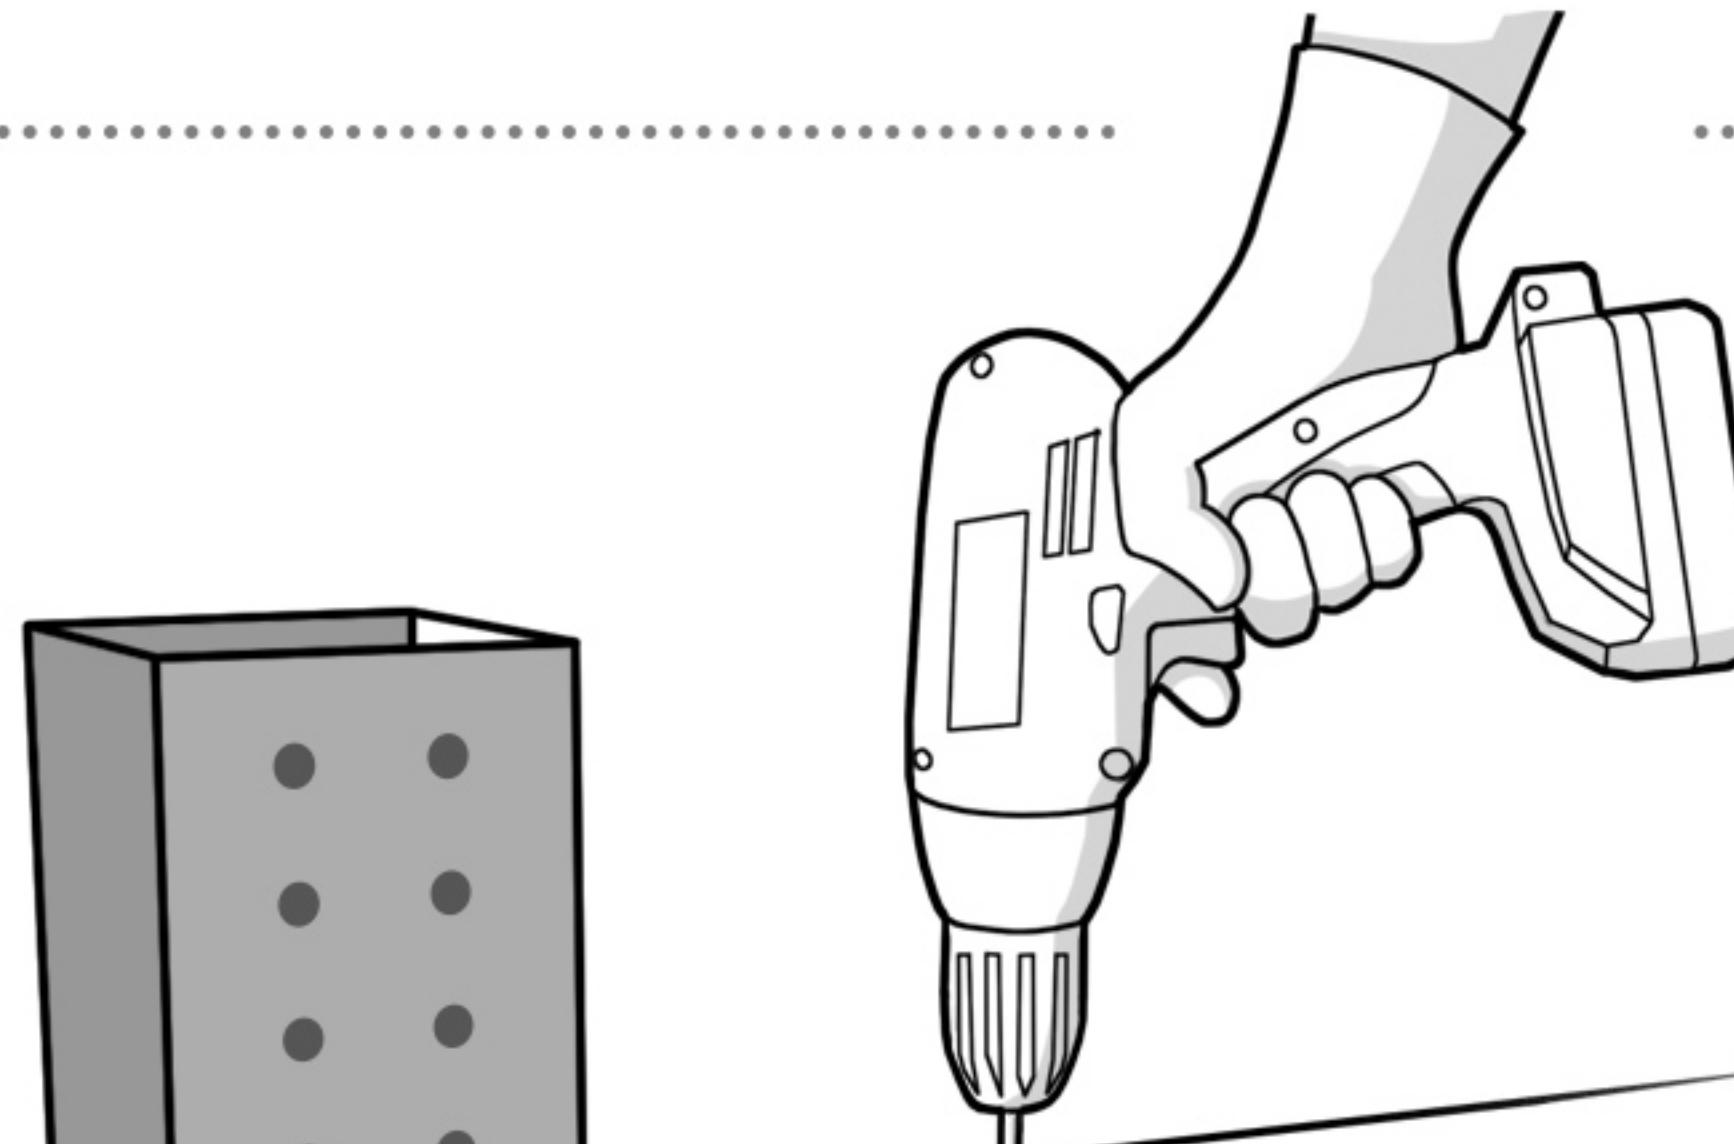

Slide I shape into
U shape and secure

STEP 9.4

BUILDING THE BOTTOM

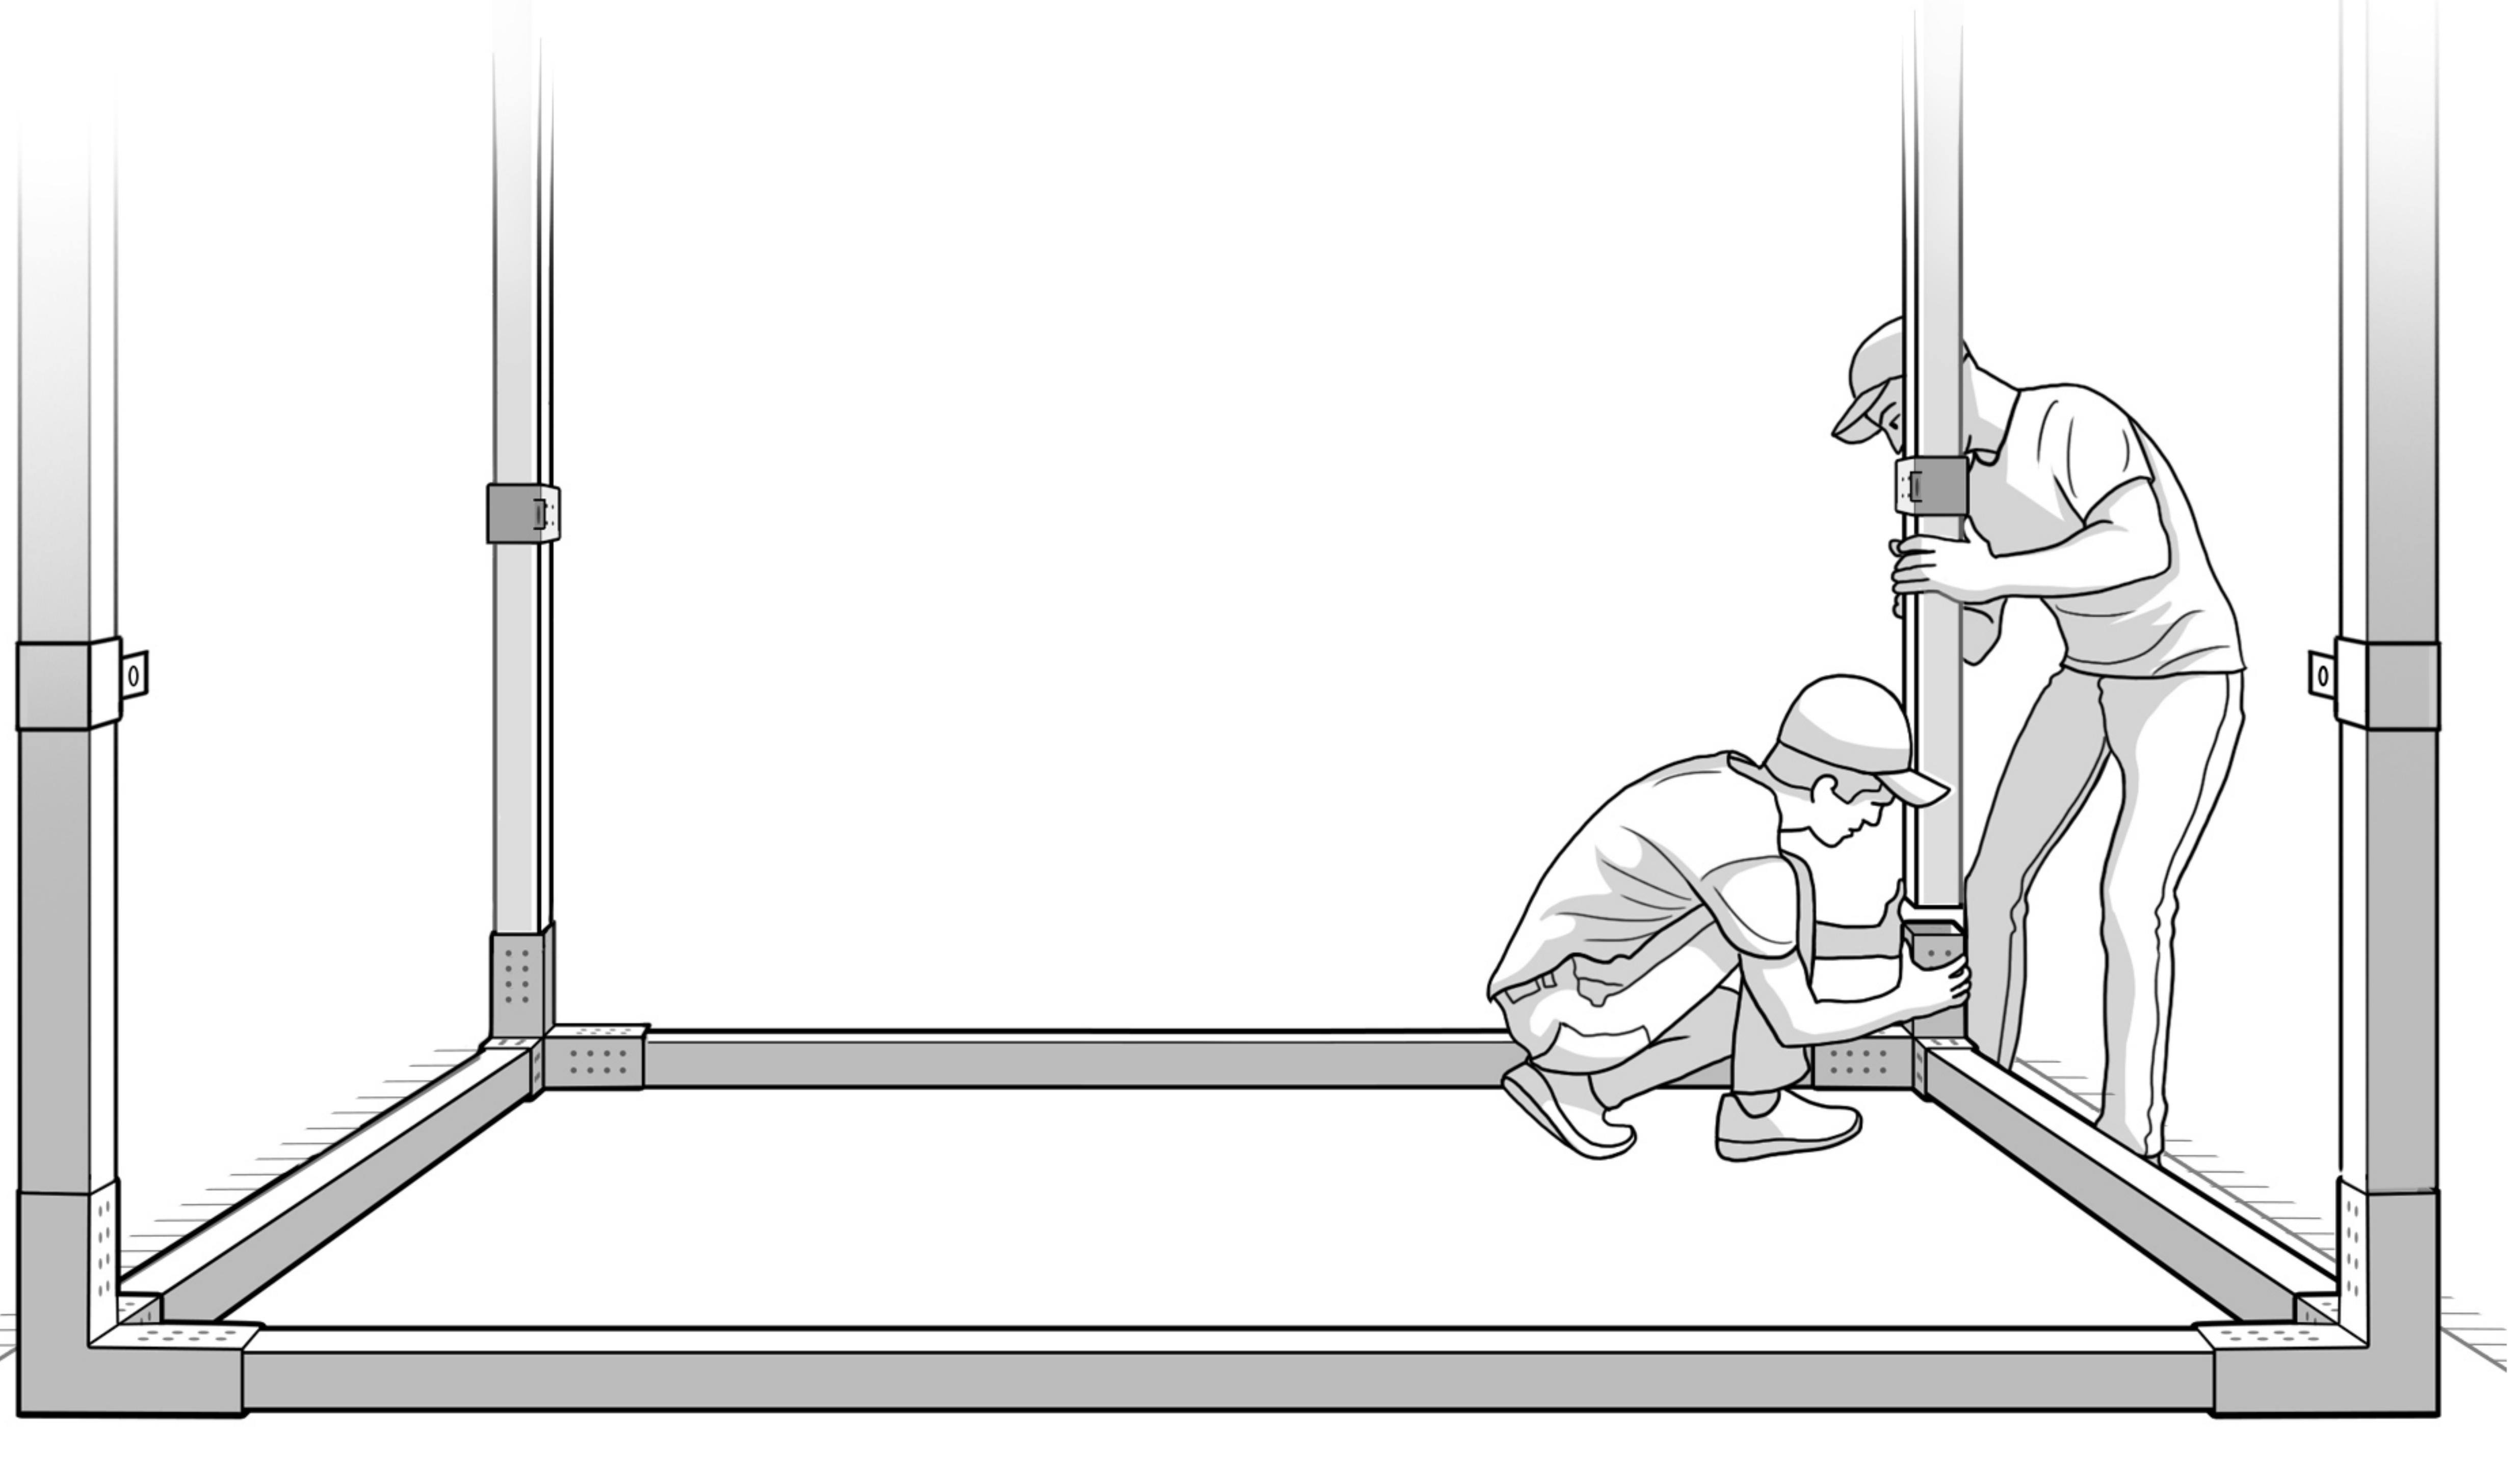

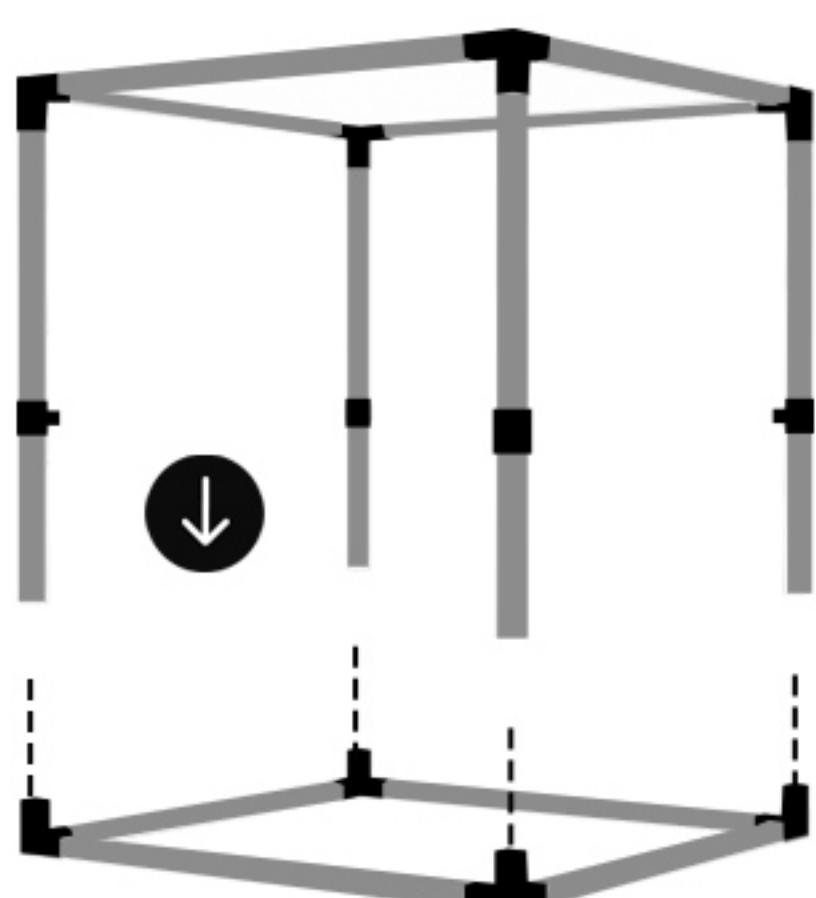

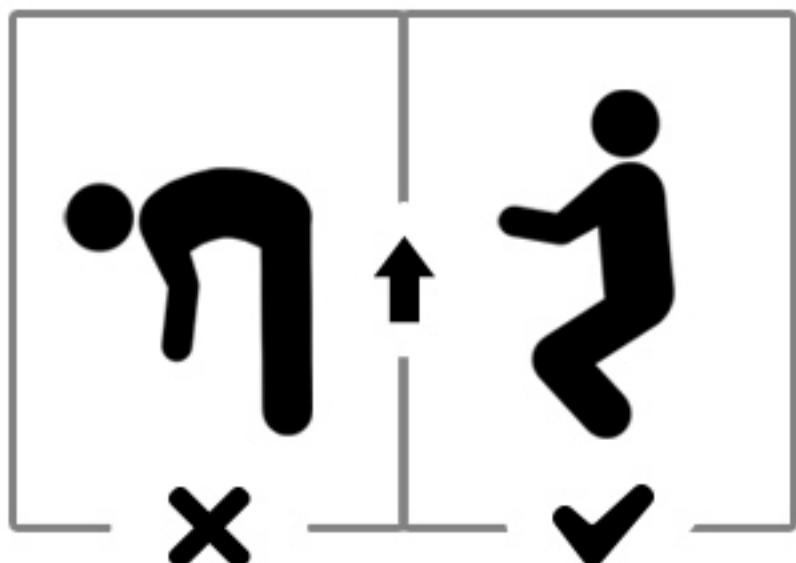

Insert screws (4 per side, 12 per GRID TRIO)

STEP 9.5

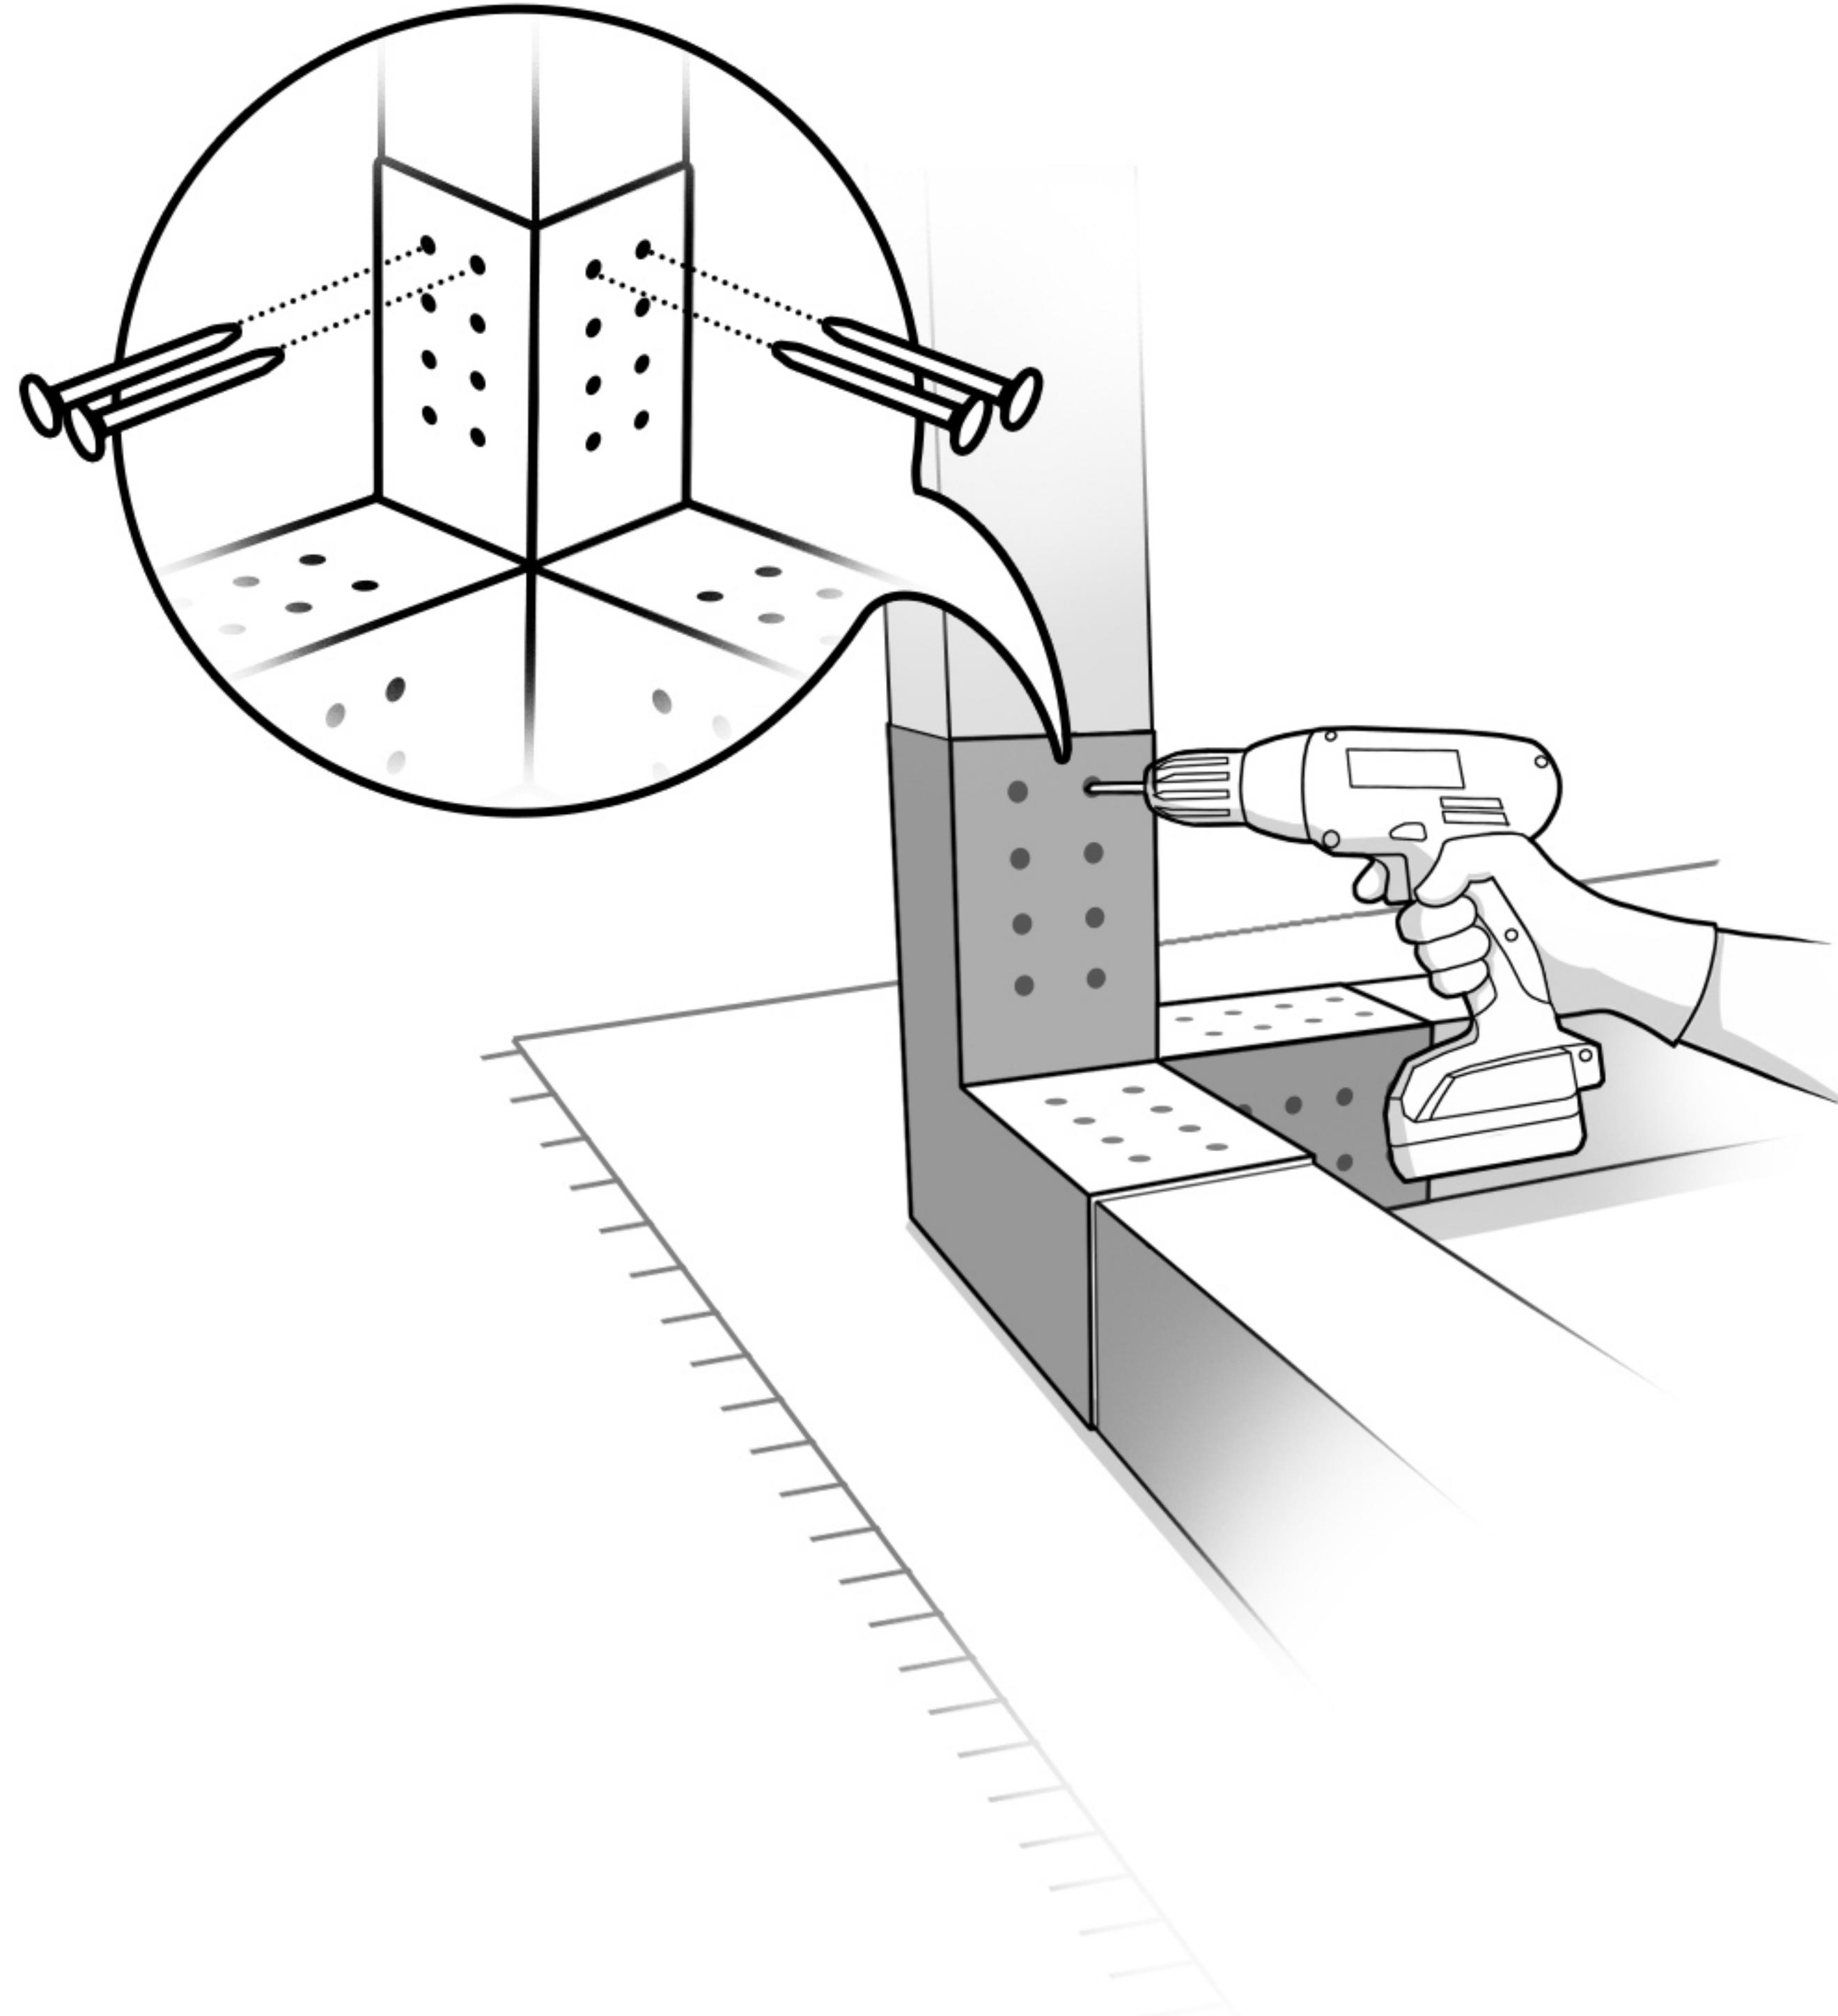

BUILDING THE BOTTOM

Slide 1 post at a time into the GRID TRIO

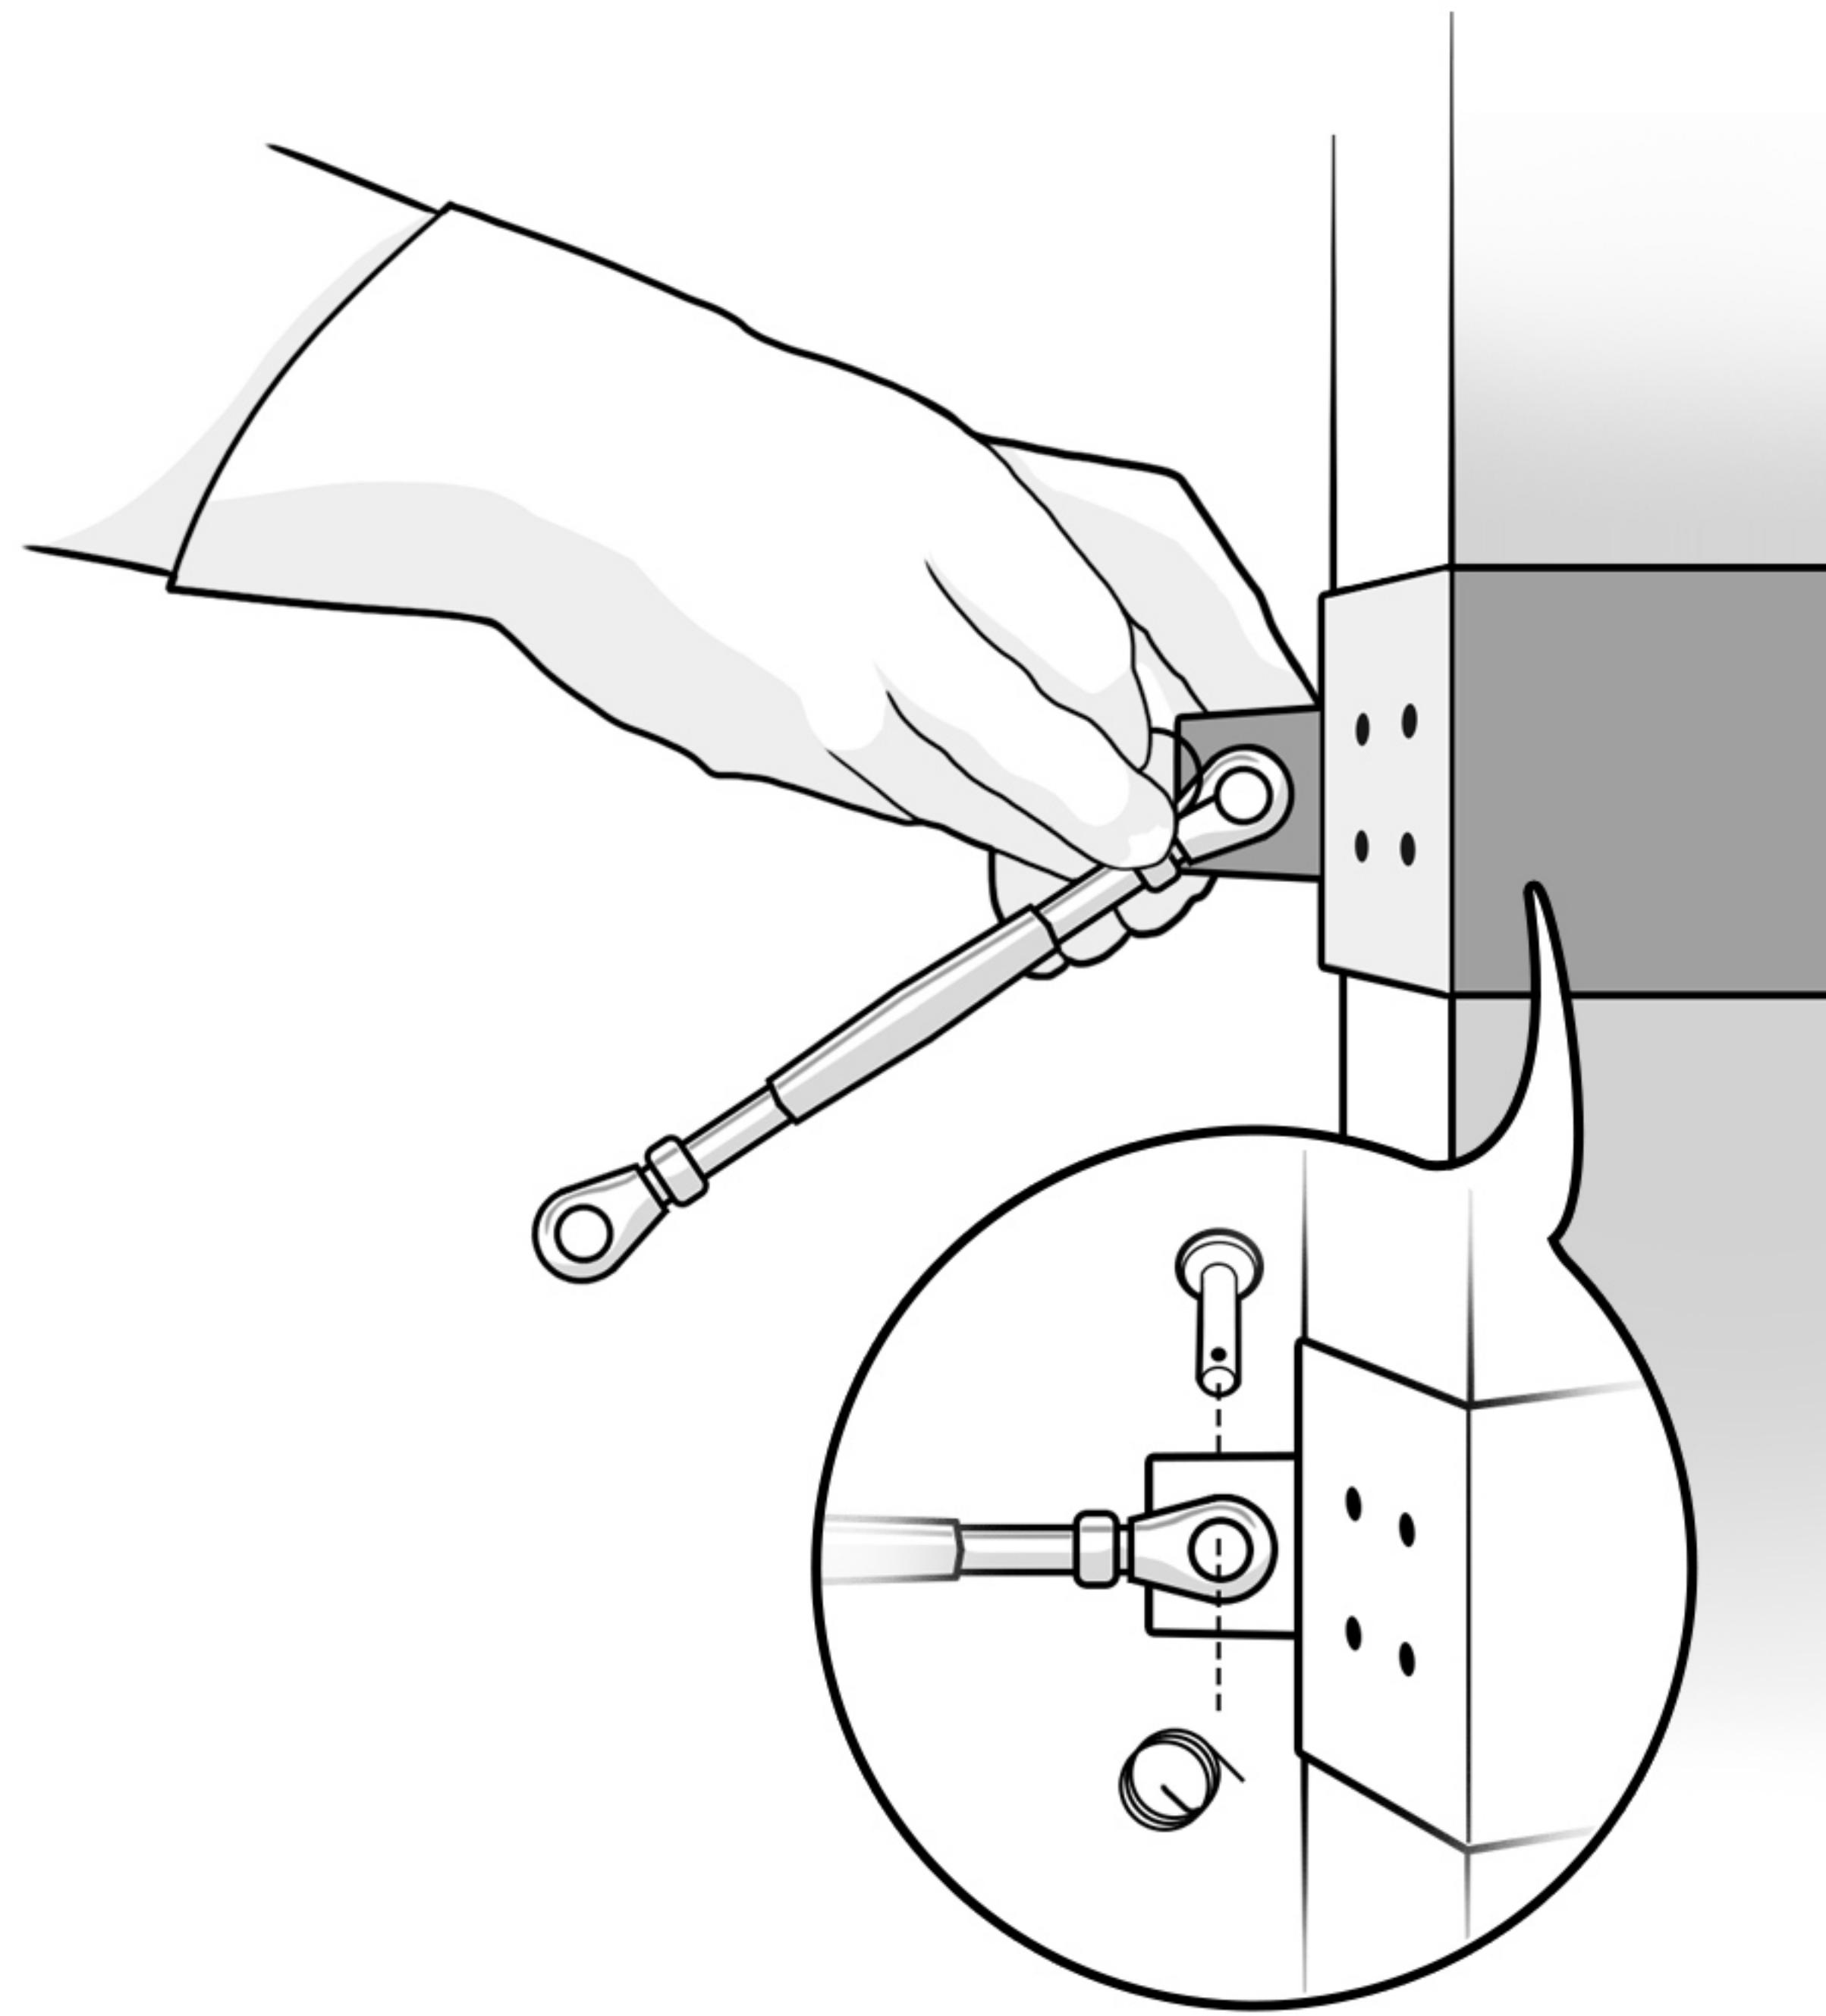

STEP 9.6**BUILDING THE BOTTOM**

Insert screws (4 per side, 12 per GRID TRIO)

**STEP 10.1****ATTACHING THE HAMMOCK**

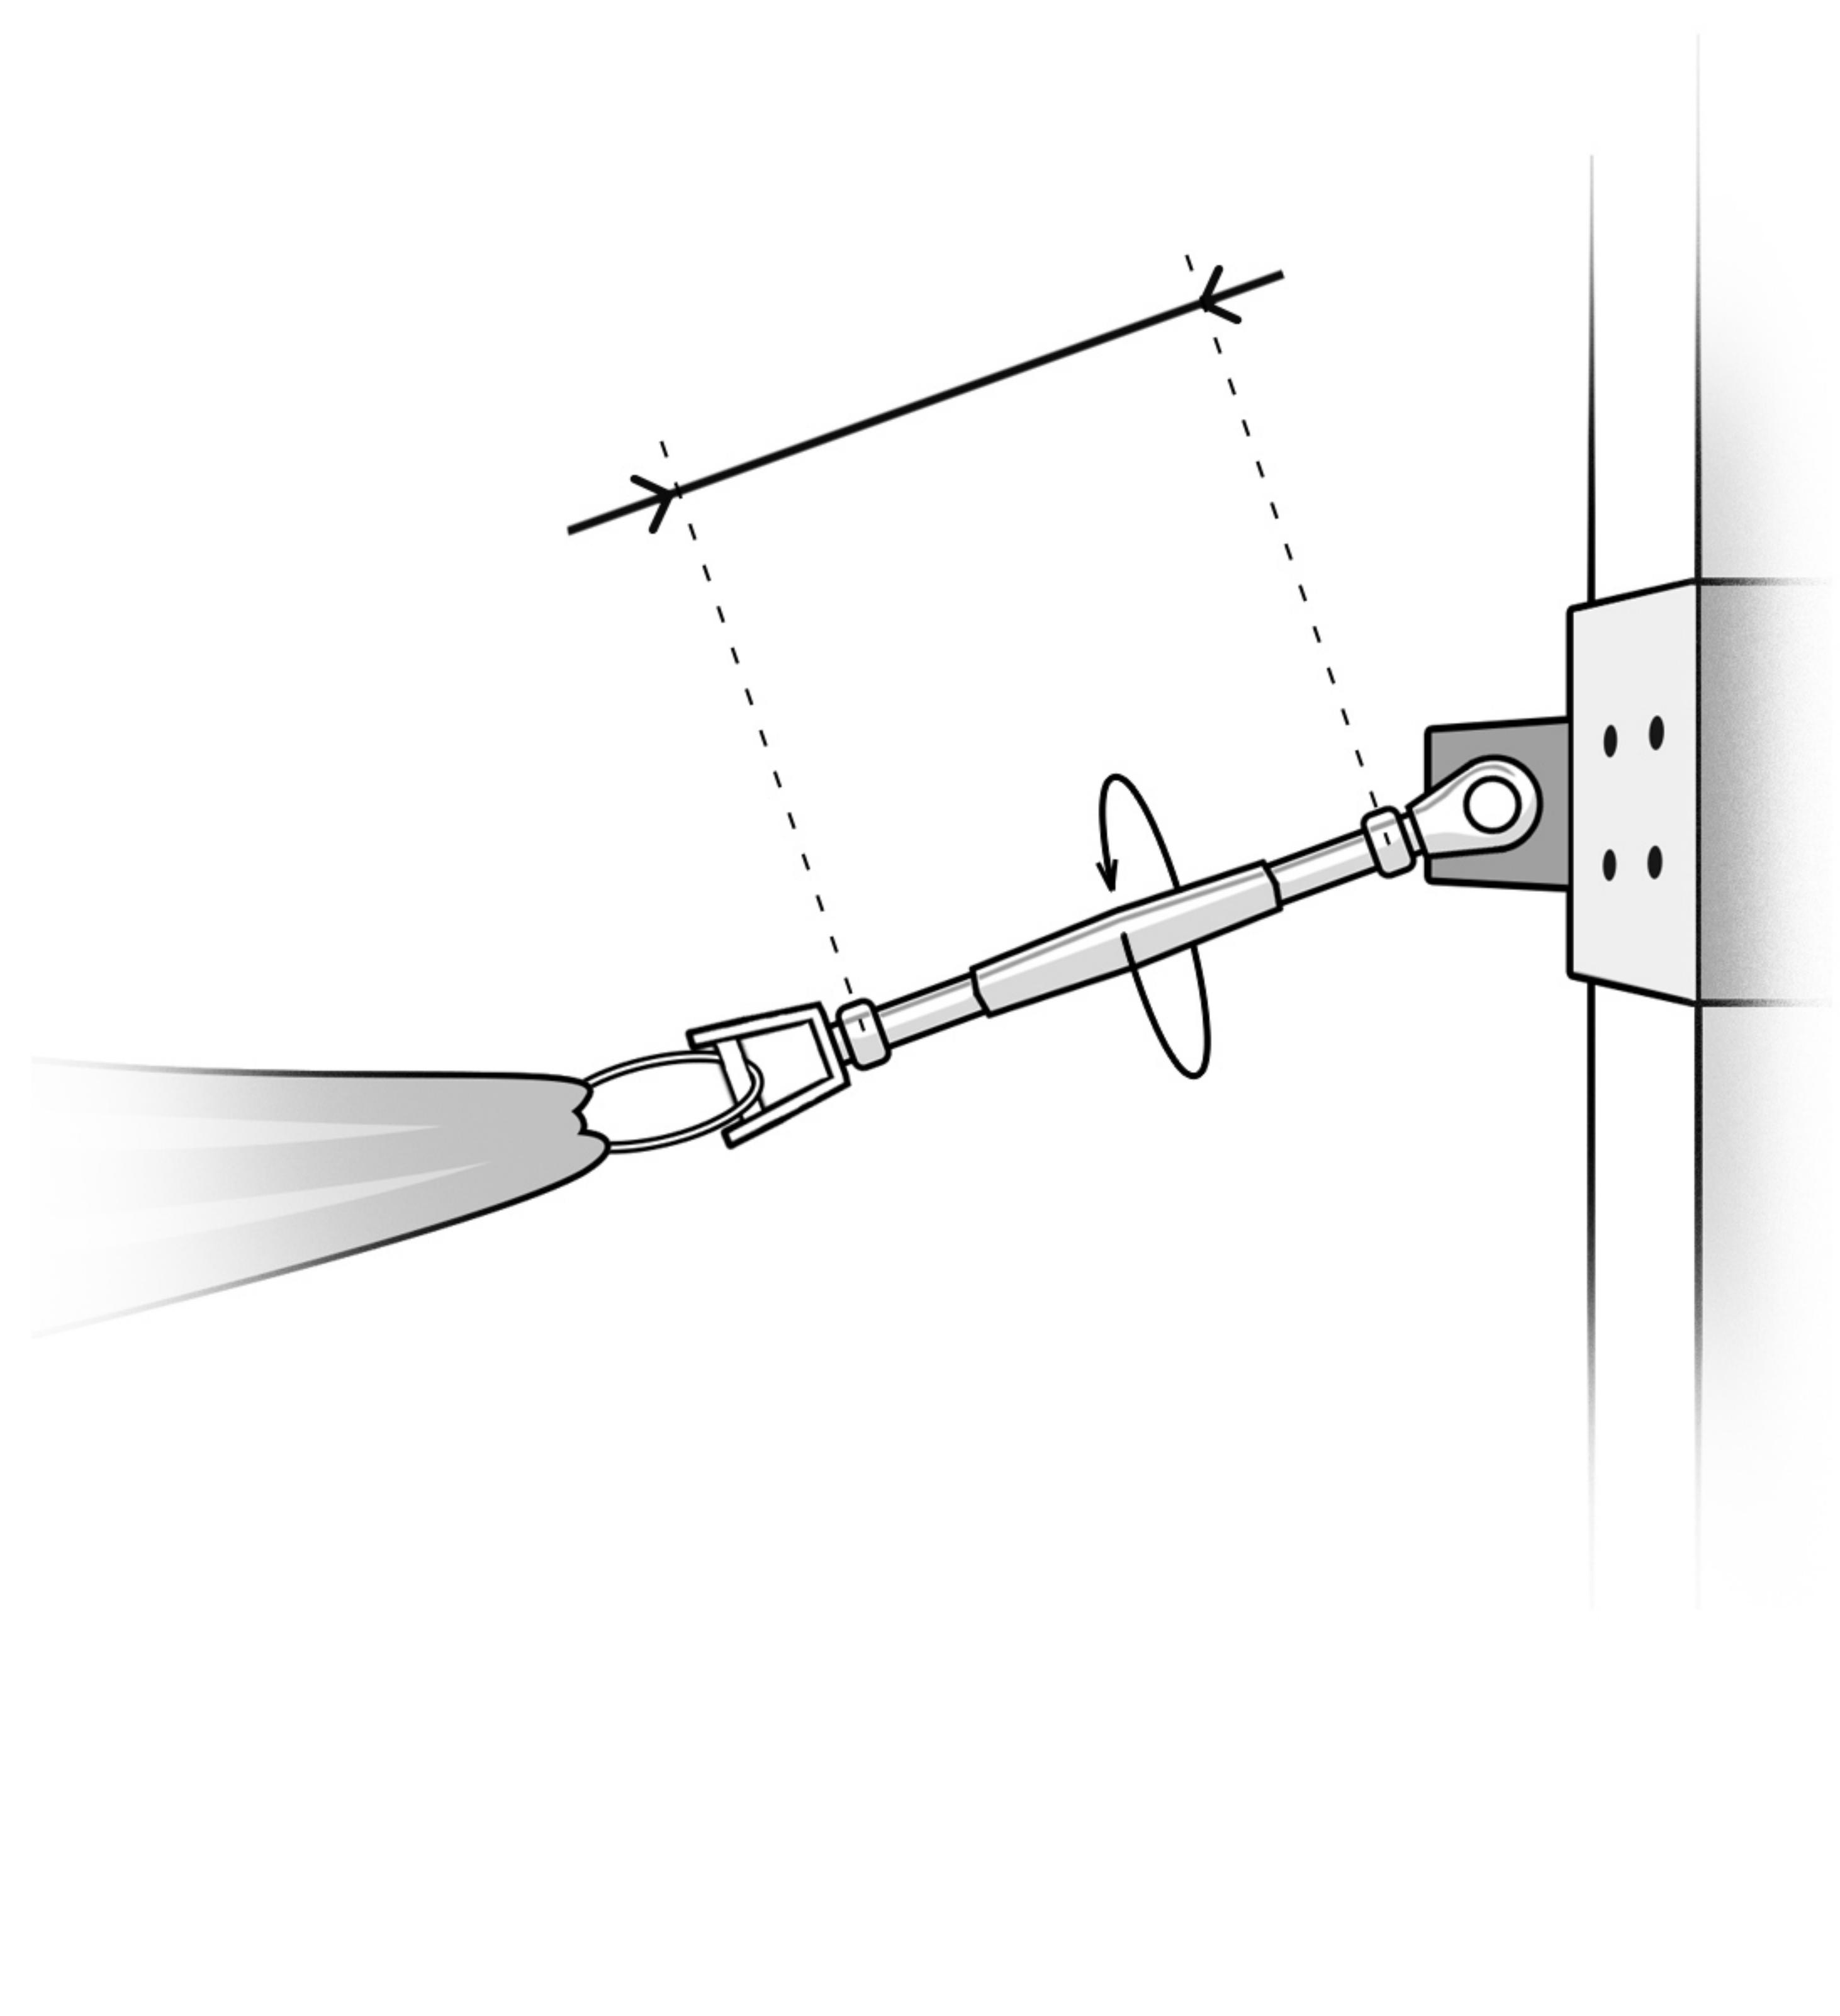

Open turnbuckles and attach to GRID HANGERS

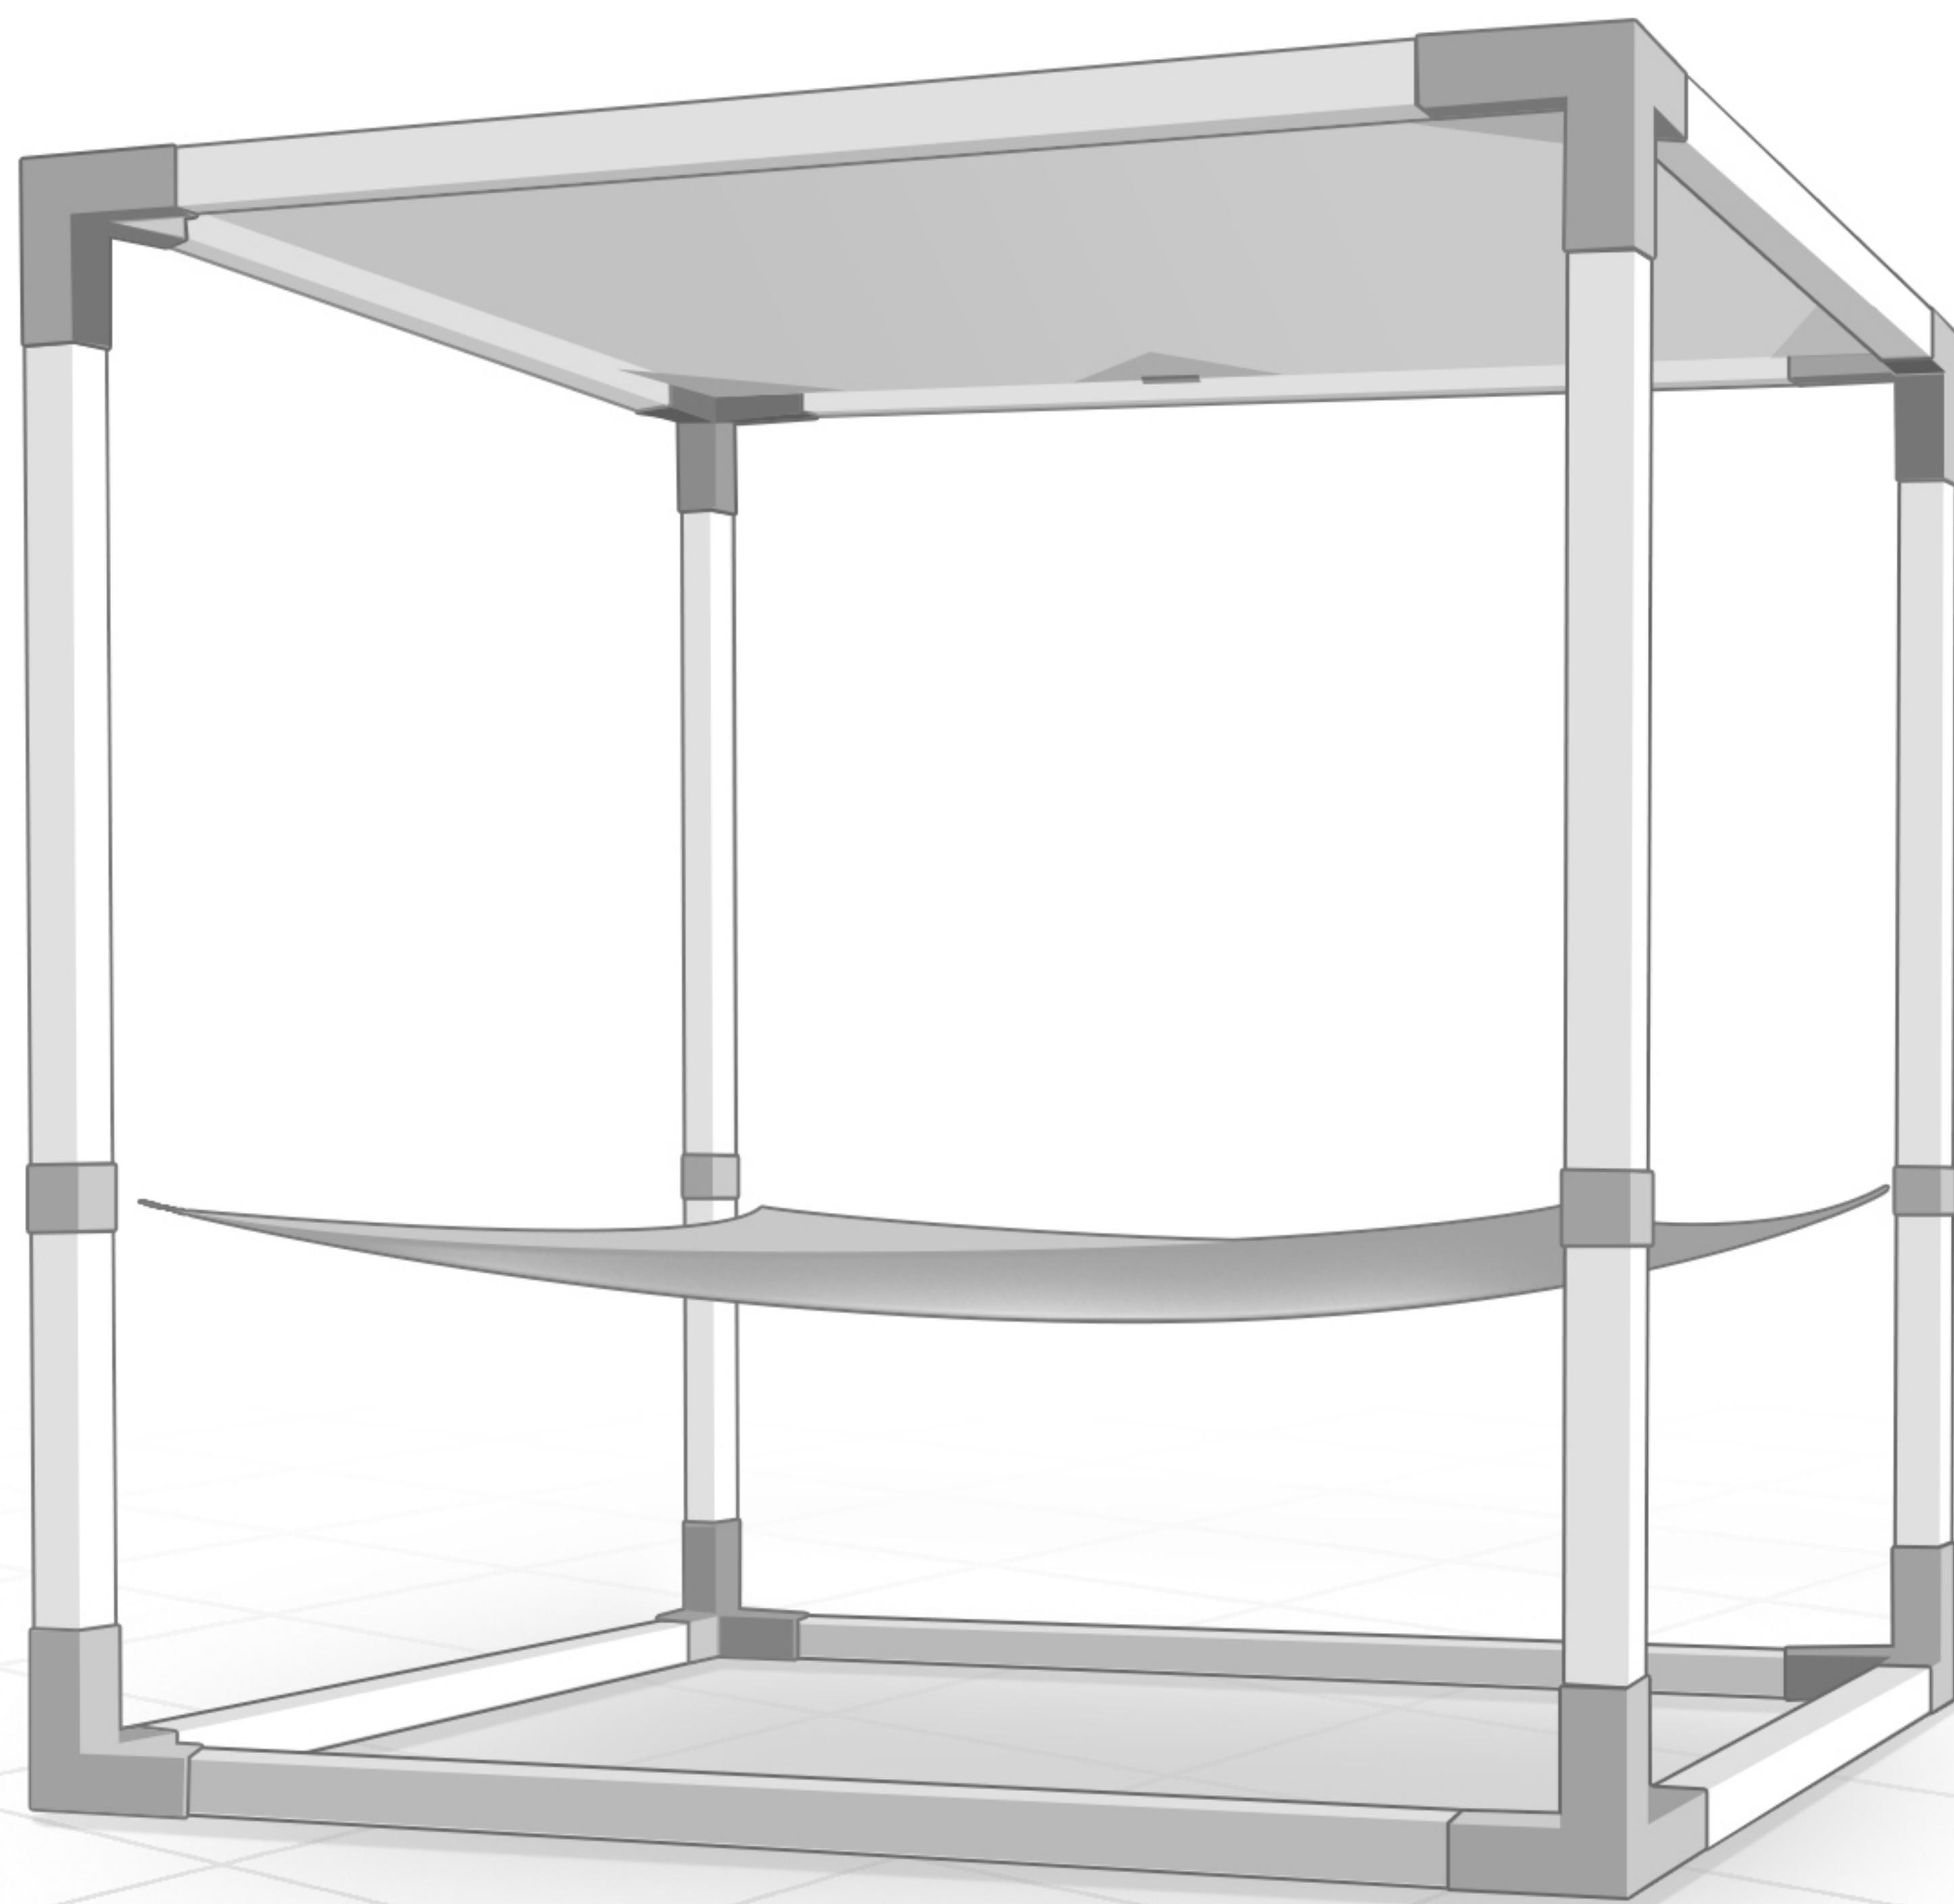

**STEP 10.2****ATTACHING THE HAMMOCK**

Unfold hammock and connect to all 4 turnbuckles

**STEP 10.3****ATTACHING HAMMOCK**

Tighten all 4 turnbuckles to preferred tension

ENJOY!

IMPORTANT

Lire tous les avertissements et les notes avant de commencer l'installation.

- Le matériel d'ancrage n'est PAS inclus avec les supports SOLO. Veuillez consulter votre bureau de permis de construction local pour déterminer les matériaux recommandés dans votre région.
- Note: Les clients acceptent de dégager TOJA GRID INC et tout revendeur autorisé de toute responsabilité cause par installation erroné, de l'entretien et réparation des produits de TOJA GRID INC.
- Avertissement: En cas de pièces manquantes ou cassées, il suffit de nous contacter à info@tojagridinc ou par media sociaux.
- Avertissement: Ne jamais laisser la structure sans surveillance avant d'installer toutes les vis nécessaires et de l'ancré correctement au sol.
- Avertissement: Suivre les instructions fournies lors de l'installation.
- Avertissement: Éviter d'égratigner les pièces pour les protéger contre la rouille.
- Avertissement: Porter des gants et des lunettes de sécurité pendant l'installation.
- Avertissement: Utiliser uniquement du bois sec et droit.
- Avertissement: Éviter l'installation sous la pluie ou dans des conditions de vent fort.

GARANTIE LIMITÉE :

Toja Grid Inc. garantit que les produits sont exempts de défauts de matériel ou de fabrication. Les produits Toja Grid Inc. sont de plus garantis pour adéquation au plan quand utilisés conformément aux limites du plan and quand correctement spécifiés, installés et entretenus. Cette garantie ne s'applique pas aux usages non-conformes aux applications et installation spécifiques, ou aux produits modifiés, ou à la détérioration due aux conditions environnementales.

En raison des caractéristiques particulières des événements d'impact potentiels, le plan spécifique, l'emplacement de la structure, les matériaux de construction utilisés, la qualité de la construction et de la condition du sol, des dommages peuvent néanmoins résulter à la structure et ses composantes même si la charge résultant de l'événement d'impact ne dépasse pas les spécifications de Toja Grid Inc. et que les connecteurs de Toja Grid Inc. sont installés correctement conformément aux codes de construction applicables.

Toutes obligations de garantie de Toja Grid Inc. doit être limité à deux (2) ans contre les défauts de fabrication à la discréption de Toja Grid Inc. pour réparer ou remplacer la pièce défectueuse. Ces recours constituent la seule obligation de Toja Grid Inc. et le seul recours de l'acheteur sous cette garantie. Toja Grid Inc. ne sera en aucun cas responsable pour la perte ou dommage accidentel, signifiant ou spécial, de quelque manière causé.

AVERTISSEMENT :

Les toiles et hamacs devraient être enlevés pendant les orages ou vents forts (plus de 50km/hr).

Pour l'installation sur une terrasse, s'assurer que le bois est adéquatement attaché à la structure principale et qu'il y ait un minimum de 4" de profondeur et un minimum de 6" de largeur sous chaque poteau. Utiliser quatre vis d'un quart de pouce de diamètre et de 2 pouces de longueur à la base de chacun des quatre poteaux.

Pour l'installation dans une fondation en béton s'assurer que le béton n'est pas craqué avec un poids minimum de 120kg (approximativement 0.05m³) et utiliser quatre vis pour le béton avec un minimum d'encastrement de 2" dans du béton sain.

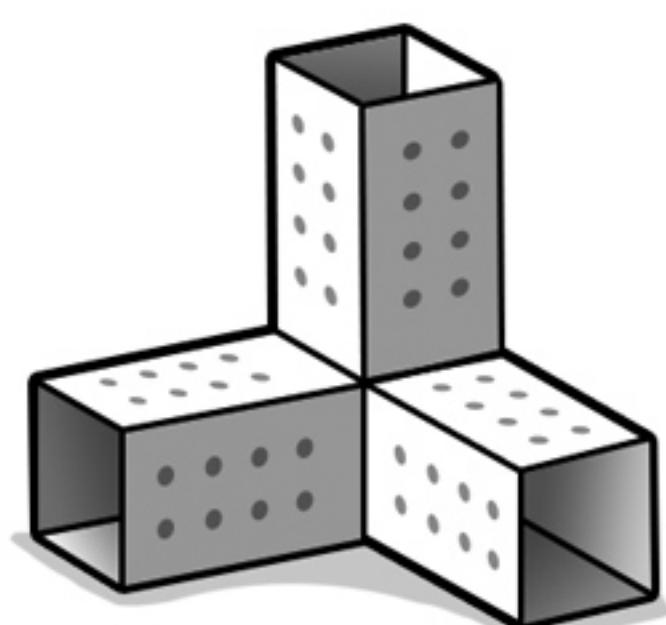

Pour l'installation sur le gazon ou sur le sol, utiliser quatre piquets de clôture 4x4 au lieu des réseaux uniques de base inclus. Suivre les directives du fabricant pour l'utilisation et l'installation des piquets de clôture.
