

BROAN[®] NuTone

Put all the control you need at your fingertips.

The perfect switch is a beautiful finishing touch, and our attractive options provide the control needed for any spot ventilation solution. All you need is the faceplate to match your décor. Installation is simple. And the results will help you breathe easy.

Model P82WC / 82W

Humidity Sensing

- Up to 4X faster humidity sensing—Reduces mold and improves air quality
- Fast install and programming—No caulking or special tools needed
- Three modes for easy programming:
 - Auto Sense Mode with patented Sensaire[®] technology
 - Duty Cycle (min/hour) Mode (meets ASHRAE 62.2)
 - RH% Humidistat Mode
- User adjustable automatic shutoff timer (in any mode)
- Fits in a single gang box
- Works with any ventilation fan
- LED fan “on” indicator
- Manual operation mode (On/Off)
- Rated: 120V, 9 Amp (fan only or fan/light combo)
- P82WC is packed as a 4-pack PDQ tray for easy display/merchandising

Model P2RW

2 Rocker Switch

- Dual-rocker combo switch manages two devices
- Control any two: fan, light, heater or nightlight
- Save space, conveniently fitting in a single gang box
- Simple installation saves time and money
- Bright, white finish complements any décor
- Rated 120V at 60Hz, max total of 15 amps/switch

Model P3RW

3 Rocker Switch

- Control multiple applications from a single, central location
- Control any exhaust fan, fan/light or heater/fan/light
- Save space, conveniently fitting in a single gang box
- Simple installation saves time and money
- Sleek style complements all design tastes and colour palettes
- Rated 120V at 60Hz, max total of 15 amps/switch

Model MS100W / MS100WR

Occupancy Sensor

- Turns on when motion is sensed and off when motion stops
- Adjust the time the fan/light remains on after motion stops
- Detect motion in rooms up to 900 square feet
- Sense motion up to 35 feet away
- Save energy by operating the fan/light only when motion is detected
- Rated for 120V at 60Hz
- Max total of ½ HP, 300W LED, 300W CFL, 600W incandescent

Model CD60W

20-40-60 Minute Countdown Timer

- Countdown timer that can be set to 20, 40 or 60 minutes or can be set to continuous run
- Automatic countdown ensures that the fan always turns off when you want it to, making sure you are not paying for unnecessary energy
- Allows for continuous ventilation to meet code requirements, including ASHRAE 62.2, in certain markets
- LED lights indicate how much time is remaining
- Bright, white colour fits any modern décor and perfectly complements the complete fan offerings of both Broan[®] and NuTone[®]

Model DD500W

Digital Dehumidistat

- Turn any ordinary fan into a humidity sensing fan – reduces mold and improves air quality
- Precision control with a user adjustable knob that allows you to set at what humidity level you want the fan to start running at
- Allows for continuous ventilation to meet code requirements in certain markets
- LED lights indicate when the fans is running
- Bright, white colour fits any modern décor

Model SC100W

Speed Control

- Turn any PSC fan into an adjustable speed fan, which can reduce noise levels and energy usage
- Precision control with a user adjustable knob that allows you to set what speed you want the fan to run at
- Ability to adjust sound, speed, CFM and energy usage
- Switch fits in a single gang box for ease of install
- Bright, white colour fits any modern décor

Model DT100W

Delay Off Timer

- Use the “delay” setting to ensure proper bathroom ventilation by keeping the fan running for 5 to 60 minutes after you leave
- Use the “ventilation” setting to meet code requirements by ventilating the bathroom for a pre-determined amount of time every hour
- User adjustable “delay” and “ventilation” settings can be changed as many times as desired until the perfect mix is accomplished
- Designed to meet ASHRAE 62.2 for continuous ventilation
- Bright, white colour fits any modern décor
