

SPREADROCK® PROJECT BUYING GUIDE

SpreadRock® is a real stone coating that can deliver years of solid performance and timeless beauty to all kinds of surfaces, both indoors and out.

It's a simple **THREE-STEP** system with these **specific products and quantities** for desired results...

1) PRIME IT WITH...

OR

These will stop the SpreadRock coating from sliding on the floor during installation — and help ensure a uniform look and correct coverage. It also hides underlying patchiness and discoloration.

Coverage: **160 - 200 sq.ft. per gallon**, depending on smoothness of surface and application thickness.

When dry, proceed to SpreadRock application...

2) SPREADROCK IT

SpreadRock® Granite Coating

Coverage: **40 - 60 sq.ft. per gallon, per coat** (two coats required) depending on smoothness of surface and application thickness. **Apply very thin coats for best coverage and results.**

3) SEAL IT

OR

Choose this for slip-resistance on wet interior/exterior walking surfaces.

Coverage: **400 sq.ft. per gallon, per coat** depending on smoothness of surface and application thickness.

Choose this to protect SpreadRock on garage and heavier duty surfaces.

Coverage: **400 sq.ft. per gallon, per coat** depending on smoothness of surface and application thickness.

SPREADROCK® PURCHASE GUIDE FOR COMMON PROJECT SIZES

	Project Size	Textured Primer (Gallons)	SpreadRock (Gallons)	TracSafe (Gallons)
Surface roughness/texture and application thickness can impact SpreadRock coverage. Apply SpreadRock in two very thin coats, pressing firmly with the trowel or squeegee. The purchase quantity suggestions here are calculated using conservative coverage rates to help ensure adequate supply for most projects and user skill levels.	150 Sq.Ft.	1	8	1
	200 sq.ft.	2	10	1
	250 sq.ft.	2	12	2
	300 sq.ft.	2	15	2
	350 sq.ft.	3	18	2
	400 sq.ft.	3	20	2
